14. DME and Supplies:				15. Safety Measures:	
wheelchair, hoyer lift, hospital bed, bath bench				infectious material management, standard precautions, medication safety, medical alert/lifeline, fall precautions, bedrails up while in bed, aspiration precautions, activity supervision	
16. Nutrition:				17. Allergies:	
Z. NO PHYSICIAN-ORDERED DIET				lisinopril	
18.A. Functional Limitations				18.B. Activities Permitted	
Paralysis				Other	
19. Mental & Pyschosocial Status: COGNITION: 3. Requires considerable assistance in routine situations. Is not alert and oriented or is unable to shift attention and recall directions more than half the time., ANXIETY: 3. During the day and evening, but not constantly, SOCIAL ISOLATION: 8. Patient unable to respond, BEHAVIORAL ISSUES: 1. Memory deficit: failure to recognize familiar persons/places, inability to recall events of past 24 hours, significant memory loss so that supervision is required!2. Impaired decision-making: failure to perform usual ADLs or IADLs, inability to appropriately stop activities, jeopardizes safety through actions!3. Verbal disruption: yelling, threatening, excessive profanity, sexual references, etc., HISTORY OF DEPRESSION: No					
20. Prognosis: fair					
22. A Rehabilitation Potential:				22.B.Discharge Plans	
SELF-CARE: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper., MOBILITY: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper.				family/caregiver will be responsible for managing treatment	
Homebound status: Due to diagnosis of Hemiplegia And Hemiparesis Following Cerebral Infarction Affecting Left Non-Dominant Side, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.					
Clinical Condition Requiring Homecare: The patient is an 81-year-old male with a past medical history significant for hypertension, type 2 diabetes mellitus, hyperlipidemia, atrial fibrillation, prior CVA/TIA with left-sided hemiparesis, and dementia, who was admitted to home health after a SNF stay following hospitalization for a CVA and development of a sacral ulcer. He is alert and oriented to person only (A&O x1) and denies pain at this time. On assessment he is incontinent of bladder and bowel; lungs are clear to auscultation and bowel sounds are active. There is trace edema of the left lower extremity and pulses are palpable in all extremities. Vitals were obtained, medications were reviewed with the spouse, and the wound was assessed. Prior to hospitalization he ambulated and performed ADLs without physical assistance; currently he demonstrates significant functional decline: left lower extremity strength is 2-/5 (MMT), he requires moderate assistance for bed mobility, is dependent for transfers (uses a Hoyer lift), dependent for toileting and lower-body dressing and requires maximal assistance for bathing and upper-body dressing; he is chair-bound and unable to self-propel the wheelchair. Right upper extremity strength is approximately 4/5 with limited PROM of the left upper extremity, and he retains movement of the left digits. He would benefit from skilled physical therapy to address left-sided weakness, balance and mobility deficits, transfer and wheelchair training, and caregiver education to improve safety and function and to work toward return to his prior level of function. Date of Order 08/15/2025 Orders Physician Face-to-Face Date: 07/30/2025 Clinical Condition Requiring Home Care per Certifying Physician: sn-disease management pt-eval & treat ot-eval & treat due to Hemiplegia And Hemiparesis Following Cerebral Infarction Affecting Left Non-Dominant Side Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home 1 - SOC - SN Notes: PT Eval Notes: OT Eval Notes: Physician Kapoor, Aarti

PARAMETERS FOR PHYSICIAN NOTIFICATION: temperature < 95 > 100.5, heart rate < 50 > 110, respiratory rate < 8 > 22, blood pressure systolic < 90 > 169, blood pressure diastolic < 60 > 90, O2 saturation < 88 > 100, pain < 0 > 5			GOALS		
CAREGIVER: 2. Non-agency caregiver(s) need training/supportive services to provide assistance			patient/caregiver recalls		
HOSPITALIZATION RISKS: 5. Decline in mental, emotional, or behavioral status in the past 3 months, 6. Reported or observed history of difficulty complying with any medical instructions (for example, medications, diet, exercise) in the past 3 months, 7. Currently taking 5 or more medications, 8. Currently reports exhaustion			* how to take the patient's blood pressure		
STANDING ORDERS: infection control: hygiene, proper hand washing; advance directive: plan if patient is unable to make healthcare decisions ; fall precautions: wear sensible shoes, remove home hazards, living space adequately lit, assistive devices prn; emergency preparedness: plan for prn evacuation, resumption of home health visits; Skin Preservation: Measures to prevent skin breakdown; pressure relief, incontinence care, nutrition, hydration ; Pain: Pain management measures; pain medication, rest, body alignment, ROM, meditation, massage ; Medications: Medication actions, uses, frequency, dose, interactions of all new/change meds			* record the reading		
Advance Directive:No Advance Directive			* recalls related medication(s) purpose, schedule		
08/28/2025 standing_order: Assess the patient's incision on post op day 7 and the nurse or physical therapist will remove aquacel dressing leaving OTA; if incision is draining educate pt/pcg on cleaning with normal saline and covering with dry gauze daily and as needed.			patient/caregiver recalls		
Assess/Instruct Pt/PCg: Ice to ____ x 20 minutes each hour while awake. If cold machine ordered apply 20 minutes on and 20 minutes off for 3-4 times a day.			* how to optimize mental status with cognition therapy		
Assess/Instruct all body systems/vital signs/complications, Blood Pressure; systolic is greater than 169 mm Hg or less than 90 mm Hg; diastolic is greater than 100 mm Hg or less than 55 mm Hg, Clinician to assess comorbidities and report changes in condition to the patient's physician, Pain Rating is greater than 6 on 0-10 scale, Pulse is greater than 110 or less than 50, Respirations are greater than 22 or less than 8, SPO2: is less than 90 % at rest /with exertion, Temperature is greater than 100.5 F or less than 95.0 F, Pain Rating is greater than 6 on 0-10 scale			* home safety		
Implement Fall Prevention Program, Instruct and educate the patient/PCG on wearing compression stockings for the next 4 weeks per discharge instructions.			* optimize mobility with active and passive range of motion therapeutic exercises		
Instruct the pt/PCG on using the incentive spirometer 10 times every 2 hour while awake.			* diet and fluids to optimize peripheral circulation		
Provide education content at patient's level of health literacy.			* recalls related medication(s) purpose, schedule		
Assess/Instruct Pt/PCg: Safety measures to prevent injury.			patient/caregiver recalls		
Assess: Musculoskeletal status.			* prevention exacerbation of anxiety condition including coping patterns		
Teach Pt/PCg to maintain appropriate wt bearing status as ordered by MD, total joint replacement precautions as applicable, Safe stair climbing skills, Safe, effective use of adaptive/assist device			* improved concentration		
Assess/Instruct Pt/PCg: Pain management measures; assess pain level, pain medication, rest, body alignment, ROM, meditation, massage.			* strategies to reduce anxiety		
Pt/PCg educated in pain management techniques including positioning and relaxation techniques			* identification of anxiety precipitants, conflicts, and threats		
Instruct Pt/PCg: Medication actions, uses, frequency, dose, side effects, interactions of all new/change meds, Provide medication education.,			* recalls related medication(s) purpose, schedule		
Assess/Instruct Pt/PCg: Safety measures to prevent injury, Therapeutic Exercise, Transfer Training			patient/caregiver recalls		
Monitor surgical wound for s/s of infection, educate on s/s of concern and infection prevention to promote wound healing.			* how to maintain a diary to monitor effective and non-effective pain relief including documenting time of pain, rating, precipitating events, medications, treatments, and what works best to relieve pain		
PROBLEMS IDENTIFIED ON ASSESSMENT: M1720 - Anxiety, M1745 - Behavioral Issues, M1700 - Cognition, M2102d - Caregiver Performs Treatment, M2102f - Patient Supervision, M2102c - Med Admin, M2020 - Oral Med Management, M1400 - Dyspnea, coughing, swelling in legs/around eyes, M1033 - Exhaustion, abnormal blood pressure (CR), M1620 - Bowel Incontinence, M1610 - Urinary Incontinence, limited range of motion, limited strength, poor muscle tone, withdrawal from conversations, B1000 - Vision Deficit, #1 - Open Wound - Posterior Sacrum -			* teach relaxation skills and diversional activities		
PROCEDURES: Medication review- medications reviewed with patient/caregiver , cough/deep breathing exercises, train caregiver(s) to perform medical/rehabilitation treatments, coordinate/arrange caregiver support to prevent caregiver physical, emotional and mental exhaustion, physician-ordered wound care: To sacral ulcer wound- Cleanse with soap and water, apply aquaphor daily and as needed with each episode of incontinence.			* recalls related medication(s) purpose, schedule		
TEACH PATIENT/CAREGIVER: * how to take the patient's blood pressure record the reading, related medication(s) purpose, schedule, * lifestyle modifications to manage respiratory condition including diet changes and regular exercise strategies to control shortness of breath home remedies to keep lungs healthy, related medication(s) purpose, schedule, * lifestyle modification to manage blood condition including dietary changes bleeding precautions, related medication(s) purpose, schedule, * how to maintain a diary to monitor effective and non-effective pain relief including documenting time of pain, rating, precipitating events, medications, treatments, and what works best to relieve pain			* how to incorporate lifestyle modifications to optimize renal condition including renal-specific diet		
			* exercise		
			* monitoring of blood pressure		
			* blood sugar		
			* home		
			* recalls related medication(s) purpose, schedule remedies		
			patient/caregiver recalls		
			* lifestyle modification to manage blood condition including dietary changes		
			* bleeding precautions
