M54.9		Dorsalgia unspecified				08/07/25									
G89.29		Other chronic pain				08/07/25									
14. DME and Supplies:						15. Safety Measures:									
hospital bed						cardiac precautions, standard precautions, fall precautions, bleeding precautions, medication safety, transfer with assist, anticoagulant precautions									
16. Nutrition:						17. Allergies:									
regular						no known allergies									
18.A. Functional Limitations						18.B. Activities Permitted									
Ambulation, Endurance, Bowel/Bladder Incontinence						Transfer bed/Chair, Exercises Prescribed									
19. Mental & Pyschosocial Status:		COGNITION: 2. Requires assistance and some direction in specific situations (for example, on all tasks involving shifting of attention) or consistently requires low stimulus environment due to distractibility, ANXIETY: 3. During the day and evening, but not constantly, SOCIAL ISOLATION: 0. Never, BEHAVIORAL ISSUES: 6. Delusional, hallucinatory, or paranoid behavior, HISTORY OF DEPRESSION: Yes													
20. Prognosis:		fair													
22. A Rehabilitation Potential:						22.B.Discharge Plans									
SELF-CARE: 1. Dependent - A helper completed all the activities for the patient., MOBILITY: 1. Dependent - A helper completed all the activities for the patient.						family/caregiver will be responsible for managing treatment									
Homebound status:		Due to diagnosis of Hypertensive Chronic Kidney Disease With Stage 1 Through Stage 4 Chronic Kidney Disease, Or Unspecified Chronic Kidney Disease, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.													
Clinical Condition Requiring Homecare:		The patient is a 92-year-old woman recently hospitalized for urinary tract infection, ambulatory dysfunction, dehydration, weakness, and loss of appetite, with a past medical history significant for abdominal aortic aneurysm, GERD/hiatal hernia, anemia, atelectasis, rheumatoid arthritis, depression/anxiety, asthma, CKD stage 4, obesity, chronic back pain, prior falls, and CVA with residual left-sided weakness. She is alert and oriented 3 with a flat affect, bedbound, incontinent of urine and stool, and dependent for all ADLs, including personal hygiene; arthritic changes of the hands are noted. On assessment she denied pain and shortness of breath; lungs were clear anteriorly, appetite was fair, and last bowel movement occurred today. Vital medications were reviewed with dosing, frequency, and side effects; education was provided on strict medication adherence and incontinence care to protect skin integrity, and her daughter-who is the primary caregiver-verbalized understanding. The MOLST indicates No CPR with Option A-1 (intubation permitted). Occupational therapy evaluation identifies marked declines in sitting/standing balance and tolerance, activity endurance, and bilateral upper-extremity strength, resulting in dependence for self-care, transfers, and mobility; skilled OT (and PT) are recommended to address strength, balance, endurance, safety, and caregiver training to optimize function within current medical limitations.Date of Order08/07/2025OrdersPhysician Face-to-Face Date: 07/30/2025Clinical Condition Requiring Home Care per Certifying Physician: SN disease management, PTEval and treat, OT eval and treat HHA due to Hypertensive Chronic Kidney Disease With Stage 1 Through Stage 4 Chronic Kidney Disease, Or Unspecified Chronic Kidney DiseaseHomebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home1 - SOC - SN Notes:PT Eval Notes:OT Eval Notes:Physician:Shivananda, Savitha
