10. Medications: Dose/Frequency/Route (N)ew (C)hanged

Acetaminophen - Acetaminophen 500 MG Oral Tablet ,Tkae 1 tablet by mouth three times a day three times a day for PAIN DO NOT EXCEED 3000 MG/DAY
Azathioprine - Azathioprine Sodium 50 MG Oral Tablet, take 1 tablet by mouth in the evening for IMMUNOSUPPRESSANT FOR AUTOIMMUNE DISEASE MASTHENIA GRAVIS PER PATIENT, HE HAS HX MASTHENIA GRAVIS
Bupropion Hydrobromide - Bupropion Hydrobromide 150 MG Oral Tablet ,take 2 tablet by mouth in the morning for DEPRESSION
Folic Acid - Folic Acid take 1 mg atblet ,take 1 tablet by mouth in the morning for FOLVITE DEFICIENCY
Gabapentin - Gabapentin 300 MG Oral Capsule ,take 1 capsule by mouth every 8 hours for NEUROPATHY Entered
Ibuprofen - Ibuprofen 400 MG Oral Tablet,take 1 tablet by mouth every 8 hours as needed for PAIN
Ipratropium-Albuterol Solution 0.5-2.5 (3) MG/3ML 3 mi inhale inhalant twice a day orally two times a day for CONGESTION/BROMCHOSPASMS
Lidocaine Patch 4% (Lidocaine topical as necessary Apply to RIGHT FLANK topically in the moming for PAIN REMOVE AND DISCARD PATCH WITHIN 12 HRS and remove per schedule
Lidocaine - Lidocaine Patch 4% topical in the morning Apply to right ankle topically in the morning for Pain Management Apply for 12 Hours in a 24 Hour period. Max dose = 3 patches. External use only, and remove per schedule
Lisinopril - Lisinopril 40 MG Oral Tablet, take 0.5 tablet by mouth in the morning for HTN
Loperamide Hydrochloride - Loperamide Hydrochloride 2 MG Oral Tablet ,take1 tablet by mouth every 6 hours as needed for DIARRHEA DO NOT EXCEED 8 MG/DAY
Methocarbamol - Methocarbamol 500 MG Oral Tablet ,take 1 tablet by mouth every 6 hours for MUSCLES SPASMS
Metoprolol Tartrate - Metoprolol Tartrate 25 MG Oral Tablet ,take 0.5 tablet by mouth every 12 hours for HTN
Nicotine Polacrilex - Nicotine Polacrilex 4 MG Throat Lozenge ,Give 1 lozenge by mouth every 4 hours as needed for nicotine dependance for 30 Days
Oxycodone - Ibuprofen: Oxycodone Hydrochloride 5 MG Oral Tablet, take 1 tablet by mouth every 6 hours as needed for PAIN SCALE 1-10
Senna - Senna 8.6-50 MG Oral Tablet ,take 1 tablet by mouth twice a day for BOWEL REGIMEN HOLD FOR LOOSE STOOLS
Spironolactone - Spironolactone 50 MG Oral Tablet, take 1 tablet by mouth in the morning for HTN
Tamsulosin Hydrochloride - Tamsulosin Hydrochloride 0.4 MG Oral Capsule ,take2 capsule by mouth once a day for URINARY RETENTION

14. DME and Supplies:

wheelchair, diabetic supplies, bath bench, walker, cane, grab bars

15. Safety Measures:

medication safety, infectious material management, walker precautions, fall precautions, diabetic precautions, ambulates with device, ambulates with assistance, wheelchair precautions, standard precautions, bathroom safety, activity supervision

16. Nutrition:

regular

17. Allergies:

no known allergies

18.A. Functional Limitations

Endurance, Dyspnea With Minimal Exertion, Ambulation

18.B. Activities Permitted

Exercises Prescribed, Walker, Up As Tolerated

19. Mental & Pyschosocial Status: COGNITION: 1. Requires prompting (cuing, repetition, reminders) only under stressful or unfamiliar conditions., ANXIETY: 1. In new or complex situations only, SOCIAL ISOLATION: 1. Rarely, BEHAVIORAL ISSUES: 7. None of the above behaviors demonstrated, HISTORY OF DEPRESSION: Yes

20. Prognosis: fair

22. A Rehabilitation Potential:

SELF-CARE: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities., MOBILITY: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities.

22.B.Discharge Plans

patient will be responsible for managing treatment
family/caregiver will be responsible for managing treatment

23. Signature and Date of Verbal SOC Where Applicable:

Electronically Signed by Messick, Charles RN on 09/09/2025

25. Date HHA Received Signed POT

24. Physician's Name and Address

Abdul Wahab
6365 Rolling Mill Pl
Springfield , VA 22152
PHONE: 7035696686 FAX: 17034515245 NPI: 1043230980

26. I certify/recertify that this patient is confined to his/her home and needs intermittent skilled nursing care, physical therapy and/or speech therapy or continues to need occupational therapy. The patient is under my care, and I have authorized the services on this plan of care and will periodically review the plan.

F2F date : 08/29/2025

27. Attending Physician's Signature and Date Signed : Date of physician last face-to-face

28. Anyone who misrepresents, falsifies, or conceals essential information required for payment of Federal funds may be subject to fine, imprisonment, or civil penalty under applicable Federal laws.

1073904009

Homebound status:
Due to diagnosis of Multiple Fractures Of Ribs, Right Side, Subsequent Encounter For Fracture With Routine Healing, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.

Clinical Condition Requiring Homecare:
The patient is a 76-year-old Caucasian male who resides in a condominium with his wife and daughter, who share durable power of attorney (DPOA). He is alert and oriented to person, place, and time, and has signed consent for treatment. The patient has elected to remain Full Code. On examination, his skin was warm and dry with pink mucous membranes. Several bruises were observed on the torso, arms, and legs. Non-pitting edema was noted in both lower extremities, with palpable pedal and popliteal pulses. Lungs were clear on auscultation, and the abdomen was soft, non-tender, with positive bowel sounds. The patient was recently discharged from the hospital following a fall resulting in five right-sided rib fractures and hemopneumothorax. During his hospitalization, he also received IV antibiotics for a urinary tract infection. He has a past medical history significant for type 2 diabetes mellitus with long-term insulin use, hypertension, prior cerebrovascular accident, myasthenia gravis, benign prostatic hyperplasia, anemia, depression, anxiety, bilateral lower extremity mononeuropathies, long-term opioid use, and history of recurrent falls. He previously underwent toe amputation of the right foot due to gangrene. On assessment, he reported 7/10 pain localized to the right heel, which worsens with direct palpation; his spouse applied a Lidocaine patch for relief. A blister on the right heel was observed and documented, with a photo uploaded to the chart. He also reported soreness at the superior intergluteal cleft and the right heel, which he attributed to prolonged bedrest and positioning during hospitalization. The patient presents with decreased strength, endurance, balance, standing tolerance, gait stability, and overall functional mobility. He requires use of assistive devices including a wheelchair, rollator, or rolling walker depending on the location within the home. Due to the confined upstairs layout, he uses a single-arm cane in those areas and alternates between a rolling walker and rollator in other living spaces. His wife has been limiting his time spent downstairs since discharge to reduce fall risk. At present, he requires physical assistance for transfers and close supervision during ambulation. He can perform basic ADLs such as bathing, grooming, dressing, toileting, and hygiene independently but supervision is recommended for safety. He requires some assistance with meal preparation and medication management, although he is able to feed himself and take medications if they are set up for him. Education was provided to the patient and his caregiver regarding safe home setup, fall prevention strategies, pressure injury prevention, proper use of assistive devices, and safe mechanics during transfers, stair negotiation, and ambulation. A home exercise program (HEP) was initiated, focusing on seated and standing lower extremity strengthening, transfers, and mobility training. Both patient and caregiver verbalized understanding and agreement with the plan of care. The patient will benefit from skilled physical therapy services to improve strength, endurance, balance, gait stability, standing tolerance, and functional mobility in order to maximize independence and reduce fall risk. Continued skilled nursing monitoring is recommended for wound prevention and pain management. Close follow-up with the primary care provider is advised for ongoing management of comorbidities, pain, and monitoring of heel integrity.
 Date of Order 09/09/2025 Orders Physician Face-to-Face Date: 08/29/2025 Clinical Condition Requiring Home Care per Certifying Physician: sn-disease management pt-eval & treat ot-eval & treat hha-adl's due to Multiple Fractures Of Ribs, Right Side, Subsequent Encounter For Fracture With Routine Healing Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home

CAREGIVER: 1. Non-agency caregiver(s) currently provide assistance

HOSPITALIZATION RISKS: 1. History of falls (2 or more falls - or any fall with an injury - in the past 12 months), 7. Currently taking 5 or more medications, 8. Currently reports exhaustion

STANDING ORDERS: infection control: hygiene, proper hand washing; advance directive: plan if patient is unable to make healthcare decisions ; fall precautions: wear sensible shoes, remove home hazards, living space adequately lit, assistive devices prn; emergency preparedness: plan for prn evacuation, resumption of home health visits; Skin Preservation: Measures to prevent skin breakdown; pressure relief, incontinence care, nutrition, hydration; Pain: Pain management measures; pain medication, rest, body alignment, ROM, meditation, massage; Medications: Medication actions, uses, frequency, dose, interactions of all new/change meds
Advance Directive:Durable power of attorney for health care/Medical power of attorney

PROBLEMS IDENTIFIED ON ASSESSMENT: D0160 - Depression, M2102d - Caregiver Performs Treatment, M2102f - Patient Supervision, M2020 - Oral Med Management, Home Safety, Home Safety, M1400 - Dyspnea, dependent edema, weak pulses in feet, abnormal blood pressure, M1033 - Exhaustion, urine retention, frequent urination, increased urine output, muscle weakness, limited strength, muscle spasms, limited endurance, Pain Effect on Sleep, balance deficit, involuntary movement of extremity, Pain Interference with ADLs, Pain Interference with Therapy activities, bruising/discoloration, #1 - 3 - Full thickness tissue loss. Subcutaneous fat may be visible but bone, tendon, or muscles not exposed. - Posterior Sacrum - 70% Granulation, 30% Slough, #2 - 7 - Unstageable due to suspected deep tissue injury in evolution. - Posterior Right Heel -

PROCEDURES: cough/deep breathing exercises: Several Times A day, incentive spirometer: Several Times A Day, physician-ordered wound care: To Right heel wound- Cleanse with wound cleanser, pat dry. Apply Skin prep. Daily. To Sacral wound- Cleanse with wound cleanser, pat dry, apply medihoney, cover with bordered gauze. Change daily. Train wife to do Sacral Wound Care, glucose testing via monitor: BS testing 3 times A Day Before Meals, coordinate/arrange for adequate patient supervision: Wife and Daughter will monitor, coordinate/arrange repair of inadequate lighting,

SN Goals

PATIENT-STATED GOAL: Patient would like ti walk without falling

GOALS
patient/caregiver recalls
* how to achieve wound healing including cleaning and dressing wound
* position changes
* skin care
* diet modification
* record wound measurements
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* diabetic medication management
* blood sugar testing
* diabetic foot care
* exercise
* diabetic diet
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* how to take the patient's blood pressure
* record the reading
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* lifestyle modification to manage blood condition including dietary changes
* bleeding precautions
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* depression-prevention strategies including avoidance of isolation
* healthy eating
* sleeping habits
* identification of activities that bring pleasure
* preventive care
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* how to optimize mental status with cognition therapy
* home safety
