10. Medications: Dose/Frequency/Route (N)ew (C)hanged					
Furosemide - Furosemide 20 Mg, 1 tablet for fluid by mouth once a day Start Furosemide Tablet, 20 MG, 1 tablet for fluid, Orally, Once a day, 30 days, 30 Tablet, Refills 1					
11. ICD Principal Diagnosis			Date		
M80.0AXD Age-rel osteopor with current path fx other site 7thD			09/20/25		
13. ICD Other Pertinent Diagnoses			Date		
N18.31 Chronic kidney disease stage 3a			09/20/25		
E03.9 Hypothyroidism unspecified			09/20/25		
K21.9 Gastro-esophageal reflux disease without esophagitis			09/20/25		
E78.5 Hyperlipidemia unspecified			09/20/25		
Z87.891 Personal history of nicotine dependence			09/20/25		
Z91.81 History of falling			09/20/25		
14. DME and Supplies:			15. Safety Measures:		
grab bars, bath bench, walker, cane			transfer with assist, walker precautions, , medical alert/lifeline, , emergency phone # clearly displayed, bathroom safety, ambulates with device, ambulates with assistance, activity supervision		
16. Nutrition:			17. Allergies:		
regular			latex		
18.A. Functional Limitations			18.B. Activities Permitted		
Ambulation, Bowel/Bladder Incontinence			Cane, Walker, Up As Tolerated		
19. Mental & Pyschosocial Status: COGNITION: 0. Alert/ oriented, able to focus and shift attention, comprehends and recalls task directions independently., ANXIETY: 0. Never, SOCIAL ISOLATION: 0. Never, BEHAVIORAL ISSUES: 7. None of the above behaviors demonstrated, HISTORY OF DEPRESSION: No					
20. Prognosis: fair					
22. A Rehabilitation Potential:			22.B.Discharge Plans		
SELF-CARE: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities., MOBILITY: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities.			patient will be responsible for managing treatment family/caregiver will be responsible for managing treatment		
Homebound status: Due to diagnosis of Age-Related Osteoporosis With A Current Pathological Fracture At Another Site, 7Thd, With A Subsequent Encounter For Fracture With Routine Healing, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.					
Clinical Condition Requiring Homecare: <div>The patient is an 81-year-old woman referred to home health services following a syncopal episode and two falls within the past 60 days that resulted in a closed fracture of the left pubic/pelvic region currently healing. Her past medical history is significant for chronic kidney disease, hypothyroidism, gastroesophageal reflux disease, and hyperlipidemia. She resides alone in a multilevel row house (bedroom/bath on the 2nd floor) and receives daily assistance/supervision from adult children. On assessment the patient was alert and oriented, skin intact, and reported occasional urinary incontinence. Exam revealed +2 edema of the left lower extremity and trace edema of the right lower extremity; no open wounds were noted. Functionally, she ambulates indoors with a walker using a step-to gait with supervision and verbal cues, requires supervision for bed mobility and transfers, and completed 14 steps with minimal assistance using a partial handrail. Her Tinetti score was 12/28, consistent with high fall risk and homebound status due to the effort required to leave home. The patient tolerated therapeutic activity (10 repetitions each of supine hip flexion, bridging, hook-lying rotation, straight leg raise, hip abduction, knee extension, and ankle pumps) and declined analgesic medication at this time. Interventions and education: PT/OT evaluations were ordered and a home exercise program was reviewed with the patient; skilled nursing follow-up was recommended per agency protocol (SN frequency 1w3) with the next SN visit scheduled Wednesday. Education provided addressed safe ambulation, assisted transfers, fall-prevention strategies, and encouragement to report new or worsening pain, swelling, or changes in continence. Plan of care: begin skilled home physical therapy to improve lower-extremity strength, endurance, balance, stair negotiation and transfer safety; initiate occupational therapy as indicated to address ADL safety and toileting management; continue skilled nursing surveillance for edema, skin integrity, medication review, and care coordination; and reassess mobility, pain control, and discharge needs at the next <mh class="chrome-extension-FindManyStrings chrome-extension-FindManyStrings-style-8 CE-FMS-visits">visits</mh>.</div><div>Date of Order</div><div>09/20/2025</div><div>Orders</div><div>Physician Face-to-Face Date: 09/16/2025</div><div>Clinical Condition Requiring Home Care per Certifying Physician: SN disease management, PT eval and treat, OT eval and treat due to Age-Related Osteoporosis With A Current Pathological Fracture At Another Site, 7Thd, With A Subsequent Encounter For Fracture With Routine Healing</div><div>Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home</div><div>PT Eval Notes:</div><div>PT Eval Notes:</div><div>Physician</div><div>Ramos, Manuel</div></div>

SN WK1: 1 (09/20/25-09/20/25)			PATIENT-STATED GOAL: I don't want anymore falls		
PARAMETERS FOR PHYSICIAN NOTIFICATION: temperature < 95 > 100.5, heart rate < 50 > 110, respiratory rate < 8 > 22, blood pressure systolic < 90 > 169, blood pressure diastolic < 60 > 90, O2 saturation < 88 > 100, pain < 0 > 5			GOALS		
CAREGIVER: 1. Non-agency caregiver(s) currently provide assistance			patient/caregiver recalls		
HOSPITALIZATION RISKS: 1. History of falls (2 or more falls - or any fall with an injury - in the past 12 months), 6. Reported or observed history of difficulty complying with any medical instructions (for example, medications, diet, exercise) in the past 3 months			* how to manage complications of immobility including		
STANDING ORDERS: infection control: hygiene, proper hand washing; advance directive: plan if patient is unable to make healthcare decisions ; fall precautions: wear sensible shoes, remove home hazards, living space adequately lit, assistive devices prn; emergency preparedness: plan for prn evacuation, resumption of home health visits; Skin Preservation: Measures to prevent skin breakdown; pressure relief, incontinence care, nutrition, hydration ; Pain: Pain management measures; pain medication, rest, body alignment, ROM, meditation, massage ; Medications: Medication actions, uses, frequency, dose, interactions of all new/change meds Advance Directive:No Advance Directive			* skin care		
PROBLEMS IDENTIFIED ON ASSESSMENT: M2020 - Oral Med Management, M1400 - Dyspnea, swelling in the arms/legs, dependent edema, M1610 - Urinary Incontinence, muscle weakness, swelling of affected area, limited range of motion, limited strength			* strength, balance		
PROCEDURES: Medication Review- : Medications reviewed with patient/caregiver. , cough/deep breathing exercises			* dexterity and range-of-motion therapeutic exercises		
TEACH PATIENT/CAREGIVER: * lifestyle modifications to manage respiratory condition including diet changes and regular exercise strategies to control shortness of breath home remedies to keep lungs healthy, related medication(s) purpose, schedule, * how to incorporate lifestyle modifications to optimize renal condition including renal-specific diet exercise monitoring of blood pressure blood sugar home, related medication(s) purpose, schedule remedies, * how to manage complications of immobility including skin care strength, balance dexterity and range-of-motion therapeutic exercises promotion of peripheral circulation fluid and diet intake to promote healing and prevent constipation, * urinary incontinence management including bladder training Kegel exercises skin care, related medication(s) purpose, schedule, patient self-administers medications as prescribed, related medication(s) purpose, schedule			* promotion of peripheral circulation		
			* fluid and diet intake to promote healing and prevent constipation		
			patient/caregiver recalls		
			* how to incorporate lifestyle modifications to optimize renal condition including renal-specific diet		
			* exercise		
			* monitoring of blood pressure		
			* blood sugar		
			* home		
			* recalls related medication(s) purpose, schedule remedies		
			patient/caregiver recalls		
			* lifestyle modifications to manage respiratory condition including		
			* diet changes and regular exercise		
			* strategies to control shortness of breath		
			* home remedies to keep lungs healthy		
			* recalls related medication(s) purpose, schedule		
			patient/caregiver recalls		
			* urinary incontinence management including bladder training		
			* Kegel exercises		
			* skin care		
			* recalls related medication(s) purpose, schedule		
			patient self-administers medications as prescribed		
			* recalls related medication(s) purpose, schedule		
PT Careplans			PT Goals		
PT WK1: 1 (09/20/25-09/20/25)			PATIENT-STATED GOAL: Be able to walk by myself without pain		
PROBLEMS IDENTIFIED ON ASSESSMENT: Pain Effect on Sleep, Pain Interference with ADLs, GG0170F1 - Toilet Transfer, GG0170D1 - Sit to Stand, GG0170E1 - Chair to Bed to Chair, GG0170G1 - Car Transfer, GG0170I1 - Walk 10 Feet, GG0170J1 - Walk 50 ft with 2 Turns, GG0170K1 - Walk 150 Feet, GG0170L1 - Walk 10 ft on Uneven Surface, GG0170M1 - 1 - Step (curb), GG0170N1 - 4 Steps, GG0170O1 - 12 Steps, GG0170P1 - Picking Up Object			GOALS		
PROCEDURES: Home exercise program : Supine hip flexion, bridging, hooklying rotation, straight leg raise, hip abduction. Standing knee flexion, hip abduction, plantarflexion, squats, hip extension. Sitting knee extension, ankle pumps, Bed mobility training , gait training on uneven surfaces, gait training/stair training, transfers training			Toilet Transfer - 06. Independent		
TEACH PATIENT/CAREGIVER: * how to maintain a diary to monitor effective and non-effective pain relief including documenting time of pain, rating, precipitating events, medications, treatments, and what works best to relieve pain teach relaxation skills and diversional activities, related medication(s) purpose, schedule, Sit to Stand - 04. Supervision or touching assistance, Chair to Bed to Chair - 04. Supervision or touching assistance, Toilet Transfer - 06. Independent, Car Transfer - 04. Supervision or touching assistance			patient/caregiver recalls
