wheelchair, rolling walker, bath bench, grab bars, commode, wound care supplies			Aspirin 81Mg - Aspirin 81mg, take 1 tablet by mouth once a day stop date 0827/2025 for Heart Ascorbic Acid - Ascorbic Acid: Biotin: Cyanocobalamin: Dexpanthenol: Ergocalciferol: Folic Acid: Niacinamide: Pyridoxine Hydrochloride: Riboflav 250mg, give 1 tablet by mouth twice a day Supplement Olanzapine - Olanzapine 2.5 MG Tablet 1 tablet by mouth twice a day For dementia/ behavior Dorzolamide Hydrochloride And Timolol Maleate - Dorzolamide Hydrochloride: Timolol Maleate 22.3-6.8mg/ml, instill 1 drop both eyes twice a day Glaucoma Xalatan - Latanoprost 0.005 perc Instill 1 drop both eyes at bedtime Glaucoma		
16. Nutrition:			17. Safety Measures:		
regular			infectious material management, bleeding precautions, walker precautions, medication safety, fall precautions, ambulates with device, bedrails up while in bed, wheelchair precautions, standard precautions, hand rails, bathroom safety, anticoagulant precautions		
18.A. Functional Limitations			18. Allergies:		
Ambulation			no known allergies		
19. Mental & Pyschosocial Status:			18.B. Activities Permitted		
COGNITION: 0. Alert/ oriented, able to focus and shift attention, comprehends and recalls task directions independently., ANXIETY: 0. Never, SOCIAL ISOLATION: 0. Never, BEHAVIORAL ISSUES: 1. Memory deficit: failure to recognize familiar persons/places, inability to recall events of past 24 hours, significant memory loss so that supervision is required!2. Impaired decision-making: failure to perform usual ADLs or IADLs, inability to appropriately stop activities, jeopardizes safety through actions, HISTORY OF DEPRESSION: No			No Restrictions		
20. Prognosis:			22. A Rehabilitation Potential:		
fair			SELF-CARE: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities., MOBILITY: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities.		
22. B. Discharge Plans			patient will be responsible for managing treatment		
Homebound status: Due to diagnosis of Pressure ulcer of sacral region stage 3, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.					
Clinical Condition Requiring Homecare: <p class="MsoNoSpacing">The patient is a 99-year-old female with a complex medical history including right-sided hemiplegia, dementia, congestive heart failure, chronic kidney disease, cerebrovascular accident (CVA), and a recent myocardial infarction (MI). She was recently hospitalized after an unwitnessed fall that resulted in bruising on her left hip and is currently recovering in a rehabilitation setting. The patient also has a small, healing sacral pressure ulcer, being treated per wound care orders with normal saline cleansing, Santyl, calcium alginate, and a bordered foam dressing. Due to her cognitive status, consent for care was obtained from her grandson. Although alert and oriented to person, place, and time (A&O x3), she is hard of hearing and uses a left-sided hearing aid. She communicates with the help of a notebook for written questions and responses. She lives with her grandchildren, denies pain, nausea, vomiting, or diarrhea, and has clear lung sounds on auscultation. Vital signs were within normal limits, and medication review was completed with her granddaughter. The patient reports fatigue and demonstrates significant weakness and frailty. She ambulates with the assistance of another person using a rolling walker and was able to walk approximately 10 feet with help during the assessment. She was also assisted in performing therapeutic exercises including marching, long arc quads, and sit-to-stand transitions. Education was provided to the caregiver (granddaughter) on fall prevention strategies, wound care, proper hydration, and maintaining adequate nutrition. Additionally, the caregiver was trained in assisting the patient with home exercise activities to support ongoing mobility and strength.</p><p class="MsoNoSpacing"> </p><p class="MsoNoSpacing">Date of Order<p></p><p class="MsoNoSpacing">09/22/2025 Order<p></p><p class="MsoNoSpacing">Physician Face-to-Face Date: 09/05/2025 Clinical Condition Requiring Home Care per Certifying Physician: sn-disease management pt-eval & treat ot-eval & treat dx: Pressure ulcer of sacral region stage 3 Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home<p></p><p class="MsoNoSpacing"> 1 - SOC - SN Notes: PT Eval Notes:<p></p><p class="MsoNoSpacing">Physician: Orbach, Natalie</p>
