Clinical Condition Requiring Homecare:<div>The patient is a 75-year-old female with a medical history significant for dementia, chronic alcohol abuse, chronic pancreatitis, atrial fibrillation, and seizure disorder. She was recently admitted to home health services following a fall that resulted in rib, clavicle, and scapular fractures. Upon assessment, the patient was alert and oriented 3 but displayed mild cognitive impairment consistent with her dementia diagnosis. She has recently transitioned to a new assisted living facility (ALF) and is still in the process of acclimating to her environment. The patient currently requires assistance for safe transfers and ambulation. At the time of the visit, no walker was present in her room, which increases her risk for falls and further injury. The clinician notified ALF staff of the urgent need for a walker to support safe mobility. A call was also placed to the patient's son, and a voicemail message was left regarding the situation and the need for appropriate mobility equipment. The plan of care includes coordination with facility staff and the patient's family to ensure provision of a walker and continued supervision during mobility and transfers. Ongoing nursing and therapy <mh class="chrome-extension-FindManyStrings chrome-extension-FindManyStrings-style-8 CE-FMS-visits">visits</mh> will focus on fall prevention, reinforcement of safety measures, pain management, and monitoring for potential complications from recent fractures. Education will be provided to ALF staff regarding safe transfer techniques and recognition of changes in cognition or pain levels, given the patient's dementia and elevated fall risk.</div><div> </div><div>"> </div><div>">Date of Order</div><div>">10/07/2025</div><div>">Orders</div><div>">Physician Face-to-Face Date: 09/29/2025</div><div>">Clinical Condition Requiring Home Care per Certifying Physician: PT eval and treat, OT eval and treat due to Multiple Fractures Of Ribs, Right Side, Subsequent Encounter For Fracture With Routine Healing</div><div>">Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home</div><div> </div><div>"> </div><div>">1 - SOC - PT Notes: soc</div><div>">Physician</div><div>">Bharaj, Bhavneet</div></div>
