18.A. Functional Limitations Ambulation			18.B. Activities Permitted No Restrictions			
19. Mental & COGNITION: 1. When reminded, assisted, or supervised by another person, able to get to and from the toilet and transfer, ANXIETY: 1. In new or complex situations Psychosocial Status: only, SOCIAL ISOLATION: , BEHAVIORAL ISSUES: , HISTORY OF DEPRESSION:						
20. Prognosis: fair						
22. A Rehabilitation Potential: SELF-CARE: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities., MOBILITY: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities.			22.B.Discharge Plans family/caregiver will be responsible for managing treatment			
Homebound status: Due to diagnosis of Pleural Effusion Not Elsewhere Classified , the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.						
Clinical Condition The patient is a 91-year-old White male with a complex medical history including cerebrovascular accident (CVA) with residual weakness and impaired gait, Requiring cognitive impairment, benign prostatic hyperplasia (BPH), type 2 diabetes mellitus (DM2), hyperlipidemia, a history of bladder cancer, and a prior gastrointestinal Homecare: bleed. He was recently hospitalized for complications related to aspiration pneumonia and was referred to home health services upon discharge. The patient is alert and oriented but forgetful at baseline. He resides in a single-family home with his wife and daughter and receives 24-hour care, including daytime support from a paid caregiver who assists with activities of daily living (ADLs), personal hygiene, transfers, and ambulation. Vitals are stable at present. A left heel deep tissue injury (DTI) is being treated with wound cleansing, Silvadene application, and bordered foam dressing, managed by the caregiver between skilled nursing <mh class="chrome-extension-FindManyStrings chrome-extension-FindManyStrings-style-8 CE-FMS-visits">visits</mh>. The patient currently demonstrates decreased standing balance, endurance, bilateral upper extremity strength, and overall activity tolerance, contributing to a decline in self-care, functional mobility, and transfer ability. He previously required moderate assistance with lower extremity self-care, transfers, ambulation, and instrumental ADLs. Occupational and physical therapy evaluations have been ordered to address current functional limitations and support the patient's return to greater independence. Skilled nursing <mh class="chrome-extension-FindManyStrings chrome-extension-FindManyStrings-style-8 CE-FMS-visits">visits</mh> are recommended at a frequency of two <mh class="chrome-extension-FindManyStrings chrome-extension-FindManyStrings-style-8 CE-FMS-visits">visits</mh> in week one and one in week three. The next scheduled skilled nursing visit is on Thursday. Given his medical complexity and physical decline, continued interdisciplinary home health care is essential. Date of Order 10/14/2025 Orders Physician Face-to-Face Date: 08/12/2025 Clinical Condition Requiring Home Care per Certifying Physician: sn-disease management pt-eval & treat ot-eval & treat hha-adl's dx: Pleural effusion not elsewhere classified Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home 4 - Recertification Notes: The patient is being recertified due to an unhealed left heel ulcer. Physician Fuentes Leonard, Jessie

PARAMETERS FOR PHYSICIAN NOTIFICATION: temperature < 95 > 100.5, heart rate < 50 > 110, respiratory rate < 8 > 22, blood pressure systolic < 90 > 169, blood pressure diastolic < 60 > 90, O2 saturation < 88 > 100, pain < 0 > 5

CAREGIVER: 1. Non-agency caregiver(s) currently provide assistance

HOSPITALIZATION RISKS: 7. Currently taking 5 or more medications, 8. Currently reports exhaustion, 9. Other risk(s) not listed in 1- 8

STANDING ORDERS: infection control: hygiene, proper hand washing; advance directive: plan if patient is unable to make healthcare decisions ; fall precautions: wear sensible shoes, remove home hazards, living space adequately lit, assistive devices prn; emergency preparedness: plan for prn evacuation, resumption of home health visits; Skin Preservation: Measures to prevent skin breakdown; pressure relief, incontinence care, nutrition, hydration ; Pain: Pain management measures; pain medication, rest, body alignment, ROM, meditation, massage ; Medications: Medication actions, uses, frequency, dose, interactions of all new/change meds
Advance Directive:Living Will

PROBLEMS IDENTIFIED ON ASSESSMENT: abn cholesterol > 200 mg/dL, abnormal blood pressure, balance deficit, open sores/lesions

PROCEDURES: Medication Review-: Medications reviewed with patient/caregiver., cough/deep breathing exercises, incentive spirometer, physician-ordered wound care: Left Heel: To cleanse the left heel wound with NSS, apply Aquacel Alginate, and cover with a foam dressing. Wound care is to be done daily., physician-ordered wound care: Cleanse with mild soap and water pat dry apply silvadene to periwound cover with bordered foam dressing, change daily., physician-ordered wound care: As of 10/15/2025- Discontinue all previous wound care. Left Heel: To cleanse the left heel wound with NSS, apply Betadine moistened gauze, dry gauze and cover with a kerlix. Wound care is to be done daily., glucose testing via monitor, bladder training

TEACH PATIENT/CAREGIVER: * how to take the patient's blood pressure record the reading, related medication(s) purpose, schedule, * lifestyle modifications to manage respiratory condition including diet changes and regular exercise strategies to control shortness of breath home remedies to keep lungs healthy, related medication(s) purpose, schedule, * lifestyle modifications to manage peripheral vascular condition including how to apply compression stockings physical exercise plan diet, related medication(s) purpose, schedule, * lifestyle modification to manage blood condition including dietary changes bleeding precautions, related medication(s) purpose, schedule, * low cholesterol dietary guidelines, related medication(s) purpose, schedule, * management of mental health condition including joining a peer group maintaining regular contact with mental health professional avoiding known stressors controlling impulses, related medication(s) purpose, schedule, * how to achieve wound healing including cleaning and dressing wound position changes skin care diet modification record wound measurements, related medication(s) purpose, schedule, * diabetic medication management blood sugar testing diabetic foot care exercise diabetic diet, related medication(s) purpose, schedule, * bowel incontinence management including dietary changes bowel training skin care, related medication(s) purpose, schedule, * urinary incontinence management including bladder training Kegel exercises skin care, related medication(s) purpose, schedule, * how to incorporate lifestyle modifications to optimize genito-urinary condition including diet exercise home remedies, related medication(s) purpose, schedule, * strategies to minimize fatigue and exhaustion including work simplification energy conservation lifestyle changes diet, related medication(s) purpose, schedule, patient self-administers medications as prescribed, related medication(s) purpose, schedule

SN Goals

PATIENT-STATED GOAL: I was to get around better

GOALS

patient/caregiver recalls

- * bowel incontinence management including dietary changes
- * bowel training
- * skin care
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * how to take the patient's blood pressure
- * record the reading
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * low cholesterol dietary guidelines
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * lifestyle modifications to manage peripheral vascular condition including how to apply compression stockings
- * physical exercise plan
- * diet
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * diabetic medication management
- * blood sugar testing
- * diabetic foot care
- * exercise
- * diabetic diet
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * lifestyle modifications to manage respiratory condition including diet changes and regular exercise
- * strategies to control shortness of breath
- * home remedies to keep lungs healthy
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * how to incorporate lifestyle modifications to optimize genito-urinary condition including diet
- * exercise
- * home remedies
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * management of mental health condition including joining a peer group
- * maintaining regular contact with mental health professional
- * avoiding known stressors
- * controlling impulses
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * how to achieve wound healing including cleaning and dressing wound
- * position changes
- * skin care
- * diet modification
- * record wound measurements
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * strategies to minimize fatigue and exhaustion including work simplification
- * energy conservation
- * lifestyle changes
- * diet
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * lifestyle modification to manage blood condition including dietary changes
- * bleeding precautions
- * recalls related medication(s) purpose, schedule

patient self-administers medications as prescribed

- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * urinary incontinence management including bladder training
- * Kegel exercises
