14. DME and Supplies:				15. Medications: Dose/Frequency/Route (N)ew (C)hanged	
hand held shower, grab bars, wound care supplies, 4 wheeled walker, cane				Acetaminophen - Acetaminophen 325 MG, Give 2 tablet by mouth every 6 hours Give 2 tablet by mouth every 6 hours as needed for General Discomfort Notify physician/midlevel provider if discomfort persists. Do not exceed 3g/day	
16. Nutrition:				Allopurinol - Allopurinol Give 400 mg Tablet by mouth once a day Give 400 mg by mouth one time a day for Gout	
low sodium				Atorvastatin Calcium - Atorvastatin Calcium give 80 MG tablet by mouth at bedtime Give 80 mg by mouth at bedtime for HLD	
18.A. Functional Limitations				Cetirizine Hydrochloride - Cetirizine Hydrochloride 5 MG , Give 1 tablet by mouth once a day Give 1 tablet by mouth one time a day for ALLERGY	
Dyspnea With Minimal Exertion, Ambulation, Endurance				Cholecalciferol Oral Tablet 50 MCG (2000 UT) (Cholecalciferol) give 50 MCG tablet by mouth once a day Give 50 mcg by mouth one time a day for SUPPLEMENT	
19. Mental & Pyschosocial Status:				Dorzolamide Hydrochloride And Timolol Maleate - Dorzolamide Hydrochloride: Timolol Maleate 2-0.5% Solution Instill 1 drop in both eyes both eyes twice a day Instill 1 drop in both eyes two times a day for Glaucoma	
COGNITION: 0. Alert/ oriented, able to focus and shift attention, comprehends and recalls task directions independently., ANXIETY: 1. In new or complex situations only, SOCIAL ISOLATION: 0. Never, BEHAVIORAL ISSUES: 7. None of the above behaviors demonstrated, HISTORY OF DEPRESSION: No				Ferrous Sulfate - Ferrous Sulfate: Folic Acid 325 (65 Fe) MG , Give 1 tablet by mouth once a day Give 1 tablet by mouth one time a day for SUPPLEMENT	
20. Prognosis:				Fluticasone Propionate - Fluticasone Propionate 50 MCG/ACT , 2 spray in both nostrils nasal once a day 2 spray in both nostrils one time a day for ALLERGY	
good				Furosemide - Furosemide 40 MG , Give 2 tablet by mouth once a day Give 2 tablet by mouth in the afternoon for EDEMA	
22. A Rehabilitation Potential:				Gabapentin - Gabapentin Give 100 mg Capsule by mouth twice a day Give 100 mg by mouth two times a day for NECK, SHOULDER, ARM PAIN AND NEUROPATHY	
SELF-CARE: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper., MOBILITY: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper.				Gabapentin - Gabapentin 300 MG Give 1 capsule by mouth at bedtime 300 MG Give 1 capsule by mouth at bedtime for Nerve Pain	
				Jardiance - Empagliflozin 25 MG , Give 12.5 mg tablet by mouth once a day Give 12.5 mg by mouth one time a day for DM	
				Metoprolol Tartrate - Metoprolol Tartrate Give 12.5 milligram Tablet by mouth twice a day Give 12.5 milligram by mouth two times a day related to UNSPECIFIED ATRIAL FIBRILLATION (148.91); ESSENTIAL (PRIMARY) HYPERTENSION (110)	
				Polyethylene Glycol 3350 - Polyethylene Glycol 3350 17 GM/SCOOP Powder , Give 1 scoop by mouth once a day Give 1 scoop by mouth one time a day for Bowel regimen Dissolve in 8oz of water, hold for loose stools	
				Oxybutynin Chloride - Oxybutynin Chloride 5 MG , Give 1 tablet by mouth once a day Give 1 tablet by mouth one time a day for OAB	
				Pradaxa - Dabigatran Etxilate Mesylate 150 MG , Give 1 capsule by mouth twice a day Give 1 capsule by mouth two times a day related to UNSPECIFIED ATRIAL FIBRILLATION (148.91)	
				Spironolactone - Spironolactone 100 mg by mouth once a day	
17. Allergies:				15. Safety Measures:	
penicillin venafaxine cymbalta pradaxa				diabetic precautions, , infectious material management, , , aspiration precautions, avoid temperature extremes, walker precautions, smoke detectors , bathroom safety, ambulates with device,	
18.B. Activities Permitted				17. Allergies:	
Up As Tolerated, Walker, Cane				penicillin venafaxine cymbalta pradaxa	
23. Signature and Date of Verbal SOC Where Applicable:				25. Date HHA Received Signed POT	
Electronically Signed by Messick, Charles RN on 10/03/2025					
24. Physician's Name and Address				26. I certify/recertify that this patient is confined to his/her home and needs intermittent skilled nursing care, physical therapy and/or speech therapy or continues to need occupational therapy. The patient is under my care, and I have authorized the services on this plan of care and will periodically review the plan.

Homebound status: Due to diagnosis of Spinal Stenosis Cervical Region, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.

Clinical Condition <div>The patient is an 85-year-old male with a past medical history significant for spinal stenosis, prior back and neck surgeries, Requiring Homecare:hypertension, and hyperlipidemia. He sustained a fall on August 17, 2025, was hospitalized at Johns Hopkins for two days, and subsequently completed inpatient rehabilitation at Rossville. He currently lives alone in an upstairs apartment with siblings nearby and ambulates with a rolling walker. On assessment he reports generalized weakness and intermittent moderate low-back and leg pain. Clinically he appears frail and fatigues easily with activity; gait is unsteady with absent toe-off, and bilateral pitting pedal edema is present. The patient received education in fall prevention strategies, energy-conservation techniques, and was taught a basic home exercise program to address mobility and lower-extremity activation; he demonstrated understanding. Given his deconditioning, unsteady gait, fall history, and functional limitations, skilled home physical therapy is indicated to improve strength, endurance, gait mechanics (including restoring toe-off/foot clearance), balance, and safety with transfers and mobility. In addition, continued monitoring and management of edema, a home safety assessment (including stair/entrance accessibility), and follow-up with his primary care provider and surgical team as needed are recommended to reduce fall risk and prevent functional decline.</div> </div><div>

SN Careplans

SN WK1: 1 (10/03/25-10/04/25) ,WK2: 1 (10/05/25-10/11/25)

PARAMETERS FOR PHYSICIAN NOTIFICATION: temperature < 95 > 100.5, heart rate < 50 > 110, respiratory rate < 8 > 22, blood pressure systolic < 90 > 169, blood pressure diastolic < 60 > 90, O2 saturation < 88 > 100, pain < 0 > 5

CAREGIVER: 3. Non-agency caregiver(s) are not likely to provide assistance OR it is unclear if they will provide assistance

HOSPITALIZATION RISKS: 1. History of falls (2 or more falls - or any fall with an injury - in the past 12 months), 6. Reported or observed history of difficulty complying with any medical instructions (for example, medications, diet, exercise) in the past 3 months, 7. Currently taking 5 or more medications, 8. Currently reports exhaustion, 9. Other risk(s) not listed in 1- 8

STANDING ORDERS: infection control: hygiene, proper hand washing; advance directive: plan if patient is unable to make healthcare decisions ; fall precautions: wear sensible shoes, remove home hazards, living space adequately lit, assistive devices prn; emergency preparedness: plan for prn evacuation, resumption of home health visits; Skin Preservation: Measures to prevent skin breakdown; pressure relief, incontinence care, nutrition, hydration ; Pain: Pain management measures; pain medication, rest, body alignment, ROM, meditation, massage ; Medications: Medication actions, uses, frequency, dose, interactions of all new/change meds Advance Directive:POLST (Physician Orders for Life-Sustaining Treatment)

PROBLEMS IDENTIFIED ON ASSESSMENT: M2102d - Caregiver Performs Treatment, M2102f - Patient Supervision, M2102c - Med Admin, M2020 - Oral Med Management, A1250 - Lack of Necessary Transportation, M1033 - Exhaustion, M1400 - Dyspnea, abn cholesterol > 200 mg/dL, abnormal blood pressure, constipation, frequent urination, M1610 - Urinary Incontinence, limited endurance, muscle weakness, B0200 - Hearing Deficit, B1000 - Vision Deficit, balance deficit, #2 - Abrasion - Posterior Left Elbow/Forearm - , #1 - Laceration - Anterior Left Elbow/Forearm - , bruising/dyscoloration, swell/redness surround. skin, discolored patches of skin

PROCEDURES: Medication Review- : Medications reviewed with patient/caregiver? , cough/deep breathing exercises, incentive spirometer, train caregiver(s) to perform medical/rehabilitation treatments, physician-ordered wound care: To left arm wound sites- Wash with saline, apply xeroform to base of wound apply kerlix. Three times weekly (M,W,F)., bladder training, teach/coordinate/arrange medication packaging and/or administration, coordinate/arrange for adequate patient supervision, coordinate/arrange resources for vision-impaired, coordinate/arrange home modifications for hearing impaired, i.e. alarms, coordinate/arrange transportation services

TEACH PATIENT/CAREGIVER: * lifestyle modifications to manage cardiac condition including symptom management diet changes regular exercise getting enough sleep, related medication(s) purpose, schedule, * how to take the patient's blood pressure record the reading, related medication(s) purpose, schedule, * lifestyle modifications to manage respiratory condition including diet changes and regular exercise strategies to control shortness of breath home remedies to keep lungs healthy, related medication(s) purpose, schedule, * strict compliance with physician orders for anticoagulant administration avoiding activities that create unnecessary risk for injury monitoring for prolonged bleeding from cuts, blood in urine or stool, or unusual bruising for warfarin, limiting foods high in Vitamin K, such as leafy green vegetables, * low cholesterol dietary guidelines, related medication(s) purpose, schedule, * how to achieve wound healing including cleaning and dressing wound position changes skin care diet modification record wound measurements, related medication(s) purpose, schedule, * how to manage skin condition including physician-prescribed treatment skin care bathing sun protection diet exercise, related medication(s) purpose, schedule, * how to promote optimized mobility with strength balance dexterity range-of-motion therapeutic exercises promotion of

SN Goals

PATIENT-STATED GOAL: I want to stop falling

GOALS

patient/caregiver recalls

- * how to promote optimized mobility with strength
- * balance
- * dexterity
- * range-of-motion therapeutic exercises
- * promotion of peripheral circulation
- * fluid and diet intake to promote healing
- * prevent constipation
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * how to manage inflammatory process
- * optimize mobility with active and passive range of motion exercises
- * fluid and diet intake to promote healing
- * prevent constipation
- * home safety
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * low cholesterol dietary guidelines
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * urinary incontinence management including bladder training
- * Kegel exercises
- * skin care
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * lifestyle modifications to manage respiratory condition including
- * diet changes and regular exercise
- * strategies to control shortness of breath
- * home remedies to keep lungs healthy
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * how to achieve wound healing including cleaning and dressing wound
- * position changes
- * skin care
- * diet modification
- * record wound measurements
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * strategies to minimize fatigue and exhaustion including work simplification
- * energy conservation
- * lifestyle changes
- * diet
- * recalls related medication(s) purpose, schedule
