14. DME and Supplies:			15. Medications: Dose/Frequency/Route (N)ew (C)hanged		
diabetic supplies, , walker, cane, commode			Norvasc - Amlodipine Besylate 10 MG tablet, Take 1 tablet by mouth once a day		
			Aspirin 81Mg - Aspirin 81 MG chewable tablet, Chew 1 tablet by mouth once a day Disp: 90 tablet, Rfl: 2		
			cholecalciferol, vitamin D3, 1,250 mcg (50,000 unit) tablet, Take 1 tablet by mouth once a week., Disp:		
			24 tablet,		
			Flexeril - Cyclobenzaprine Hydrochloride 5 MG tablet, Take 1 tablet by mouth every 8 hours 1 tablet (5 mg total) by mouth every 8 (eight) hours as needed for muscle spasms., Disp: 30 tablet		
			Flonase - Fluticasone Propionate 50 mcg/actuation, 1 spray nasal once a day nasal spray, 1 spray by each nare route daily.		
			Synthroid - Levothyroxine Sodium 50 MCG tablet,Take 1 tablet by mouth once a day		
			Protonix - Pantoprazole Sodium 40 MG EC tablet, Take 1 tablet by mouth once a day		
			Lyrica - Pregabalin 100 MG capsule, Take 1 capsule by mouth three times a day		
			Proventil-Hfa - Albuterol Sulfate 90 mcg/actuation inhaler, Inhale 2 puffs nasal every 4 hours as needed for wheezing or shortness of breath.		
			Coreg - Carvedilol 3.125 MG tablet, Take 1 tablet by mouth twice a day		
			Cymbalta - Duloxetine Hydrochloride 60 MG capsule, Take 1 capsule by mouth once a day		
			Lasix - Furosemide 40 MG tablet, Take 1 tablet by mouth once a day		
			Dilaudid - Hydromorphone Hydrochloride 2 MG tablet, Take 1 tablet by mouth every 6 hours		
			Senokot - Senna 8.6 mg tablet, Take 1 tablet by mouth twice a day		
			Kenalog - Triamcinolone Acetonide 0.1 % cream topical twice a day		
			Rosuvastatin Calcium - Rosuvastatin Calcium 5 mg 5mg by mouth once a day HLD		
			Celexa - Citalopram Hydrobromide eq 10 mg base 10mg by mouth once a day Depression		
			Insulin 70/30 - Insulin Recombinant Human 40 units subcutaneous once a day diabetes		
16. Nutrition:			17. Safety Measures:		
high fiber, diabetic, low cholesterol, low sodium, cardiac diet,			medication safety, fall precautions, diabetic precautions, supervision at all times, standard precautions, bathroom safety, ambulates with assistance, ambulates with device		
18.A. Functional Limitations			17. Allergies:		
Endurance, Ambulation			heparin, hyoscyamine, doxycycline, gabapentin, hydrochlorothiazide, latex, lipid phenobarg-hyoscy-astopine, phenobarbital, sulfa-traimethoprim, ultracet, venla		
19. Mental & Pyschosocial Status:			18.B. Activities Permitted		
COGNITION: 0. Alert/ oriented, able to focus and shift attention, comprehends and recalls task directions independently., ANXIETY: 1. In new or complex situations only, SOCIAL ISOLATION: 0. Never, BEHAVIORAL ISSUES: 7. None of the above behaviors demonstrated, HISTORY OF DEPRESSION: No			Up As Tolerated, Cane, Walker		
20. Prognosis:			22.B.Discharge Plans		
fair			patient will be responsible for managing treatment		
22. A Rehabilitation Potential:					
SELF-CARE: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities., MOBILITY: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities.					
Homebound status:					
Due to diagnosis of Hypertensive heart and chronic kidney disease with heart failure and stage 1 through stage 4 chronic kidney disease, or unspecified chronic kidney disease the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device					
Clinical Condition Requiring Homecare:					
<p class="MsoNoSpacing">The patient is a 73-year-old female with a significant medical history including spinal stenosis, multiple falls, CHF, diabetes mellitus type 2 on insulin therapy, stage 4 hypertensive heart and kidney disease, COPD, chronic pain, thyroid atrophy, constipation, and prior spinal and joint surgeries. She lives alone and uses a walker, cane, and stair lift for mobility. The patient reports multiple falls in the past three months along with lower-extremity weakness and dependent edema. She was educated on home safety measures, including the use of wall railings, daily weight monitoring due to fluid retention, and recognition of CHF symptoms. Medications were reviewed, and she agreed to pillbox education for adherence. She self-administers 40 units of 70/30 insulin daily but lacks a functioning glucometer; the nurse will contact her provider to request a prescription. She also reports difficulty accessing groceries due to lack of transportation. Following a recent hospitalization for CKD, CHF, DM, hyperlipidemia, COPD, chronic pain, spinal stenosis, and multiple orthopedic surgeries, the patient demonstrates limited functional mobility. She ambulates indoors for short distances without a device but relies on wall support and requires supervision for transfers and bed mobility. She can use a stair glide independently for 14 steps. Her home is a two-story row house with six steps at the entrance, and she is homebound due to the taxing effort required to leave the home, supported by a Tinetti score of 14/28. The patient reports increasing numbness in her hands and legs and anticipates the need for further spinal surgery. She has requested social work assistance in finding a smaller, single-level residence. Home therapy is recommended to improve strength, safety, and functional mobility.</p></o:p></p><p class="MsoNoSpacing"></p></o:p></p><p class="MsoNoSpacing">Date of

PROBLEMS IDENTIFIED ON ASSESSMENT: Home Safety, Home Safety, M2102d - Caregiver Performs Treatment, A1250 - Lack of Necessary Transportation, M2020 - Oral Med Management, meal preparation, M2102c - Med Admin, M2102f - Patient Supervision, abnormal blood pressure, abn cholesterol > 200 mg/dL, dependent edema, weight gain > 2lb/24 h OR 5lb/1 wk, swelling in the arms/legs, M1400 - Dyspnea, abnormal BS < 70/140 > mg/dL, abnormal thyroid <> 0.40 - 4.50 mIU/mL, constipation, increased urine output, muscle weakness, limited endurance, muscle spasms, limited strength, poor muscle tone, limited range of motion, weak hand grips, balance deficit, extremity burn/tingle/numb, difficulty sleeping, B1000 - Vision Deficit, pain radiating to arms/legs, involuntary movement of extremity, daytime fatigue, Pain Interference with ADLs, Pain Interference with Therapy activities, Pain Effect on Sleep, obesity, discolored patches of skin

PROCEDURES: Medication Review- : Medications reviewed with patient/caregiver. , cough/deep breathing exercises, glucose testing via monitor, monitor intake & output, teach/coordinate/arrange medication packaging and/or administration, coordinate/arrange for maintenance of clean/uncluttered living area, coordinate/arrange transportation services

TEACH PATIENT/CAREGIVER: * lifestyle modifications to manage cardiac condition including symptom management diet changes regular exercise getting enough sleep, related medication(s) purpose, schedule, * how to take the patient's blood pressure record the reading, related medication(s) purpose, schedule, * lifestyle modifications to manage respiratory condition including diet changes and regular exercise strategies to control shortness of breath home remedies to keep lungs healthy, related medication(s) purpose, schedule, * low cholesterol dietary guidelines, related medication(s) purpose, schedule, * how to maintain a diary to monitor effective and non-effective pain relief including documenting time of pain, rating, precipitating events, medications, treatments, and what works best to relieve pain teach relaxation skills and diversional activities, related medication(s) purpose, schedule, * how to incorporate lifestyle modifications to optimize renal condition including renal-specific diet exercise monitoring of blood pressure blood sugar home, related medication(s) purpose, schedule remedies, * prescribed dietary modifications monitoring intake and output monitoring weight loss or weight gain monitor changes in neurological status, related medication(s) purpose, schedule, * diabetic medication management blood sugar testing diabetic foot care exercise diabetic diet, related medication(s) purpose, schedule, * lifestyle modifications low-residue dietary guidelines alternative medicine options for ulcerative colitis, related medication(s) purpose, schedule, * how to promote optimized mobility with strength balance dexterity range-of-motion therapeutic exercises promotion of peripheral circulation fluid and diet intake to promote healing prevent constipation, related medication(s) purpose, schedule, * how to keep home safe for patient with vision loss including eliminating hazards enhancing lighting using mechanical aids, patient self-administers medications as prescribed, related medication(s) purpose, schedule, patient's transportation needs are met, patient's living environment is clean/uncluttered, patient has access to adequate food storage, patient is adequately supervised, meal preparation is available to patient for all meals, caregiver administers and/or packages medications appropriately, caregiver performs medical/rehabilitation treatments with adequate competence

SN Goals

PATIENT-STATED GOAL: to feel better, I have a lot going on with me

GOALS

patient/caregiver recalls

- * how to incorporate lifestyle modifications to optimize renal condition including renal-specific diet
- * exercise
- * monitoring of blood pressure
- * blood sugar
- * home
- * recalls related medication(s) purpose, schedule remedies

patient/caregiver recalls

- * low cholesterol dietary guidelines
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * lifestyle modifications to manage respiratory condition including
- * diet changes and regular exercise
- * strategies to control shortness of breath
- * home remedies to keep lungs healthy
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * how to promote optimized mobility with strength
- * balance
- * dexterity
- * range-of-motion therapeutic exercises
- * promotion of peripheral circulation
- * fluid and diet intake to promote healing
- * prevent constipation
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * lifestyle modifications
- * low-residue dietary guidelines
- * alternative medicine options for ulcerative colitis
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * how to keep home safe for patient with vision loss including eliminating hazards
- * enhancing lighting
- * using mechanical aids

patient's transportation needs are met

patient's living environment is clean/uncluttered

patient has access to adequate food storage

patient is adequately supervised

meal preparation is available to patient for all meals

caregiver administers and/or packages medications appropriately

caregiver performs medical/rehabilitation treatments with adequate competence

patient/caregiver recalls

- * lifestyle modifications to manage cardiac condition including symptom management
- * diet changes
- * regular exercise
- * getting enough sleep
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * diabetic medication management
- * blood sugar testing
- * diabetic foot care
- * exercise
- * diabetic diet
