G47.09		Other insomnia						09/22/25									
R13.10		Dysphagia unspecified						09/22/25									
Z79.82		Long term (current) use of aspirin						09/22/25									
Z79.899		Other long term (current) drug therapy						09/22/25									
Z91.81		History of falling						09/22/25									
14. DME and Supplies:									15. Safety Measures:								
wheelchair, bath bench, , wound care supplies, hospital bed									bedrails up while in bed, wheelchair precautions, , bathroom safety, , activity supervision								
16. Nutrition:									17. Allergies:								
regular									no known allergies								
18.A. Functional Limitations									18.B. Activities Permitted								
Ambulation									No Restrictions								
19. Mental & Pyschosocial Status: COGNITION: 4. Is totally dependent in toileting., ANXIETY: 0. Never, SOCIAL ISOLATION: , BEHAVIORAL ISSUES: , HISTORY OF DEPRESSION:																	
20. Prognosis: fair																	
22. A Rehabilitation Potential:									22.B.Discharge Plans								
SELF-CARE: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities., MOBILITY: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper.									patient will be responsible for managing treatment family/caregiver will be responsible for managing treatment								

Homebound status: Due to diagnosis of Pressure Ulcer Of Sacral Region Stage 3, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.

Clinical Condition Requiring Homecare: <div>The patient is a 99-year-old female with a complex medical history including right-sided hemiplegia, dementia, congestive heart failure, chronic kidney disease, cerebrovascular accident (CVA), and a recent myocardial infarction (MI). She was recently hospitalized after an unwitnessed fall that resulted in bruising on her left hip and is currently recovering in a rehabilitation setting. The patient also has a small, healing sacral pressure ulcer, being treated per wound care orders with normal saline cleansing, Santyl, calcium alginate, and a bordered foam dressing. Due to her cognitive status, consent for care was obtained from her grandson. Although alert and oriented to person, place, and time (A&O x3), she is hard of hearing and uses a left-sided hearing aid. She communicates with the help of a notebook for written questions and responses. She lives with her grandchildren, denies pain, nausea, vomiting, or diarrhea, and has clear lung sounds on auscultation. Vital signs were within normal limits, and medication review was completed with her granddaughter. The patient reports fatigue and demonstrates significant weakness and frailty. She ambulates with the assistance of another person using a rolling walker and was able to walk approximately 10 feet with help during the <mh class="chrome-extension-FindManyStrings chrome-extension-FindManyStrings-style-8 CE-FMS-assessment">assessment</mh>. She was also assisted in performing therapeutic exercises including marching, long arc quads, and sit-to-stand transitions. Education was provided to the caregiver (granddaughter) on fall prevention strategies, wound care, proper hydration, and maintaining adequate nutrition. Additionally, the caregiver was trained in assisting the patient with home exercise activities to support ongoing mobility and strength.</div><div>
</div><div></div><div>Date of Order</div><div>11/17/2025</div><div>Orders</div><div>Physician Face-to-Face Date: 09/05/2025</div><div>Clinical Condition Requiring Home Care per Certifying Physician: sn-disease management pt-eval & treat ot-eval & treat dx: Pressure ulcer of sacral region stage 3</div><div>Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home</div><div>
</div><div></div><div>4 - Recertification Notes: The patient is being recertified due to an reopened sacral wound.</div><div>
