5QE3E54HU07	11/19/2025	From: 11/19/2025 To: 01/17/2026	19667	217058
6. Patient's Name and Address Mary Green 4103 Old York Rd, Baltimore, MD 21218- 443-990-5178			7. Provider's Name, Address and Telephone Number HomeCentris Healthcare LLC 10 Crossroads Drive, Suite 102 Owings Mills, MD 21117-8284 410-321-8448 1487113239	
Clinical Condition Requiring Homecare: <div>The patient is a 69-year-old adult with a significant recent medical history, including hospitalization on April 17, 2025, for stage I intrahepatic bile duct carcinoma complicated by respiratory failure, followed by an additional admission on August 6, 2025, for pneumonia. The patient was discharged from inpatient rehabilitation on November 14, 2025, and is currently residing with her daughter in an apartment temporarily until her own residence becomes available. The patient continues home-based chemotherapy in oral pill form and remains oxygen-dependent at 2.5 L/min via nasal cannula, with resting pulse consistently above 95 bpm. She exhibits chronic lymphedema of the left upper extremity, which has worsened following recent illness. The patient demonstrates generalized weakness, significant deconditioning, and reduced activity tolerance. She is chair-bound for much of the day and ambulates only short distances with a walker. She is identified as a high fall risk and requires hands-on assistance for transfers and leaving the home. She sleeps in a hospital bed and uses a bedside commode for toileting. Ongoing limitations include decreased strength, impaired functional mobility, reduced endurance, and compromised safety awareness. Occupational therapy evaluation indicates deficits in activities of daily living (ADLs), functional mobility, activity tolerance, and safety, with noted exacerbation of left upper extremity lymphedema. The patient would benefit from skilled OT services focusing on ADL training, adaptive equipment instruction, functional mobility training, therapeutic exercises, a structured home exercise program, and ongoing safety education. Recommended OT frequency includes 1x/week for 1 week, 2x/week for 1 week, 0x/week for 1 week, and 1x/week for 3 additional weeks. Education was provided regarding safety with mobility, proper use of assistive devices, energy conservation, fall-prevention strategies, and lymphedema precautions. The plan of care includes continued monitoring of functional status, reinforcement of safety measures, progression of therapeutic activities as tolerated, and coordination with the interdisciplinary team to support the patient's recovery and maintain medical stability at home.</div><div></div><div> </div><div>Date of Order</div><div> </div><div>11/19/2025</div><div>Orders</div><div> </div><div>Physician Face-to-Face Date: 11/12/2025</div><div>Clinical Condition Requiring Home Care per Certifying Physician: sn-disease management pt-eval & treat ot-eval & treat hha-adl's due to Pneumonia Unspecified Organism</div><div>Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home</div><div></div><div> </div><div>1 - SOC - SN Notes: soc</div><div> </div><div>PT Eval Notes:</div><div> </div><div>OT Eval Notes:</div><div> </div><div>Physician</div><div> </div><div>Brodine, Joseph</div></div>
