14. DME and Supplies: hand held shower, rolling walker, grab bars, bath bench														
16. Nutrition: cardiac diet, fluid restriction, low cholesterol, low sodium														
18.A. Functional Limitations Endurance, Ambulation														
19. Mental & Psychosocial Status: COGNITION: 0. Alert/ oriented, able to focus and shift attention, comprehends and recalls task directions independently., ANXIETY: 0. Never, SOCIAL ISOLATION: 0. Never, BEHAVIORAL ISSUES: 7. None of the above behaviors demonstrated, HISTORY OF DEPRESSION: No														
20. Prognosis: good														
22. A Rehabilitation Potential: SELF-CARE: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities., MOBILITY: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities.														
22.B.Discharge Plans patient will be responsible for managing treatment														
Homebound status: Due to diagnosis of Hypertensive Heart Disease With Heart Failure , the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.														
Clinical Condition Requiring Homecare: <div>The patient is an alert, oriented adult with a medical history significant for HIV, hypertension, hyperlipidemia, gastroesophageal reflux disease (on Protonix), obesity, sleep apnea, and congestive heart failure with bilateral lower-extremity edema. She lives alone with assistance from her daughter and receives a personal care assistant five days per week for five hours per day. Today she reports severe left hip pain rated 10/10 and ambulates with a rollator; no open wounds were noted on inspection. Bowel movement was reported this morning. Medication reconciliation was completed; the patient identified current and discontinued medications and demonstrated understanding of each medication's purpose and common side effects. She uses Midtown Pharmacy for prescriptions and reports nicotine patch use and an episodic cigarette yesterday; education was provided regarding nicotine use and <mh class="chrome-extension-FindManyStrings chrome-extension-FindManyStrings-style-10 CE-FMS-anticoagulant%20precautions">anticoagulant precautions</mh>. Nursing education included daily weight monitoring and fluid/sodium restriction for management of CHF, recognition of signs/symptoms of fluid overload and when to call the provider, and reinforcement of lipid and GERD medication information. Planned coordination of care includes cardiology follow-up on 12/4 and primary care and vascular appointments on 12/3 and 12/5; physical and occupational therapy evaluations were ordered to address mobility and activities-of-daily-living deficits. The skilled nursing plan is weekly <mh class="chrome-extension-FindManyStrings chrome-extension-FindManyStrings-style-9 CE-FMS-visits">visits</mh> for four weeks (1w4) to monitor edema and weight, reassess pain and functional status, reinforce CHF and medication education, coordinate PT/OT and specialist appointments, and escalate care as indicated.</div><div></div><div> </div><div>11/25/2025</div><div>Orders</div><div>Physician Face-to-Face Date: 11/19/2025</div><div>Clinical Condition Requiring Home Care per Certifying Physician: sn-disease management pt-eval & treat ot-eval & treat hha-adl's due to Hypertensive Heart Disease With Heart Failure</div><div>Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home</div><div></div><div> </div><div>1 - SOC - SN Notes: soc</div><div> </div></div>
