R39.14	Feeling of incomplete bladder emptying	10/30/25

10. Medications: Dose/Frequency/Route (N)ew (C)hanged

Aspirin 81Mg - Aspirin Chew 1 tablet by mouth once a day
Vitamin D3 - Alpha-Tocopherol Acetate: Ascorbic Acid: Biotin: Cholecalciferol: Cyanocobalamin: Dexpanthenol: Folic Acid: Niacinamide: Pyridox 1.25 MG (50000 UT) Cap, TAKE 1 CAPSULE by mouth once a week TAKE 1 CAPSULE BY MOUTH ONE TIME PER WEEK
Proscar - Finasteride 5 MG, Take 1 tablet by mouth once a day
Imdur - Isosorbide Mononitrate 30 MG, Take 1 tablet by mouth once a day
Nizoral - Ketoconazole 2% cream, Apply cream topical twice a day Apply topically 2 (two) times daily To rash at groin
senna-docusate (CVS Senna Plus) 8.6-50 MG per tablet, Take 2 tablets by mouth twice a day
Zoloft - Sertraline Hydrochloride 50 MG, Take 1 tablet by mouth once a day
Flomax - Tamsulosin Hydrochloride 0.4 MG , Take 1 capsule by mouth once a day Take 1 capsule (0.4 mg total) by mouth Daily after dinner
Vitamin B-12 - Alpha-Tocopherol Acetate: Ascorbic Acid: Biotin: Cholecalciferol: Cyanocobalamin: Dexpanthenol: Folic Acid: Niacinamide: Pyridox 1000 MCG , Take 1 tablet (1,000 mcg) by mouth once a day
Tylenol - Acetaminophen 500 MG,Take 1 tablet by mouth every 4 hours as needed for Pain
Lipitor - Atorvastatin Calcium 40 MG, Take 1 tablet by mouth at bedtime
carboxymethylcellulose (PF) (REFRESH PLUS) 0.5% solution ,Instill 1 drop both eyes three times a day
Folvite - Folic Acid 500 mcg, Take 500 mcg tablet by mouth once a day
Seroquel - Quetiapine Fumarate 25 MG , Take 0.5 tablets by mouth as necessary Take 0.5 tablets (12.5 mg) by mouth once at bedtime as needed
Klor-Con M20 - Potassium Chloride 40 mEq,Take 40 mEq, tablet by mouth once a day
Saline (Ocean Nasal Spray) 0.65% nasal solution 0.65% solution, 2 sprays nasal cannula every 4 hours as needed

14. DME and Supplies:
urinary/catheter supplies, , hospital bed

15. Safety Measures:
supervision at all times, bedrails up while in bed, , activity supervision

16. Nutrition:
Z. NO PHYSICIAN-ORDERED DIET

17. Allergies:
no known allergies

18.A. Functional Limitations
Bowel/Bladder Incontinence, Ambulation, Hearing

18.B. Activities Permitted
Complete Bedrest

19. Mental & Pyschosocial Status: COGNITION: 2. Someone must help the patient to maintain toileting hygiene and/or adjust clothing., ANXIETY: 4. Constantly, SOCIAL ISOLATION: , BEHAVIORAL ISSUES: , HISTORY OF DEPRESSION:

20. Prognosis: poor

22. A Rehabilitation Potential:
SELF-CARE: , MOBILITY:

22.B.Discharge Plans
family/caregiver will be responsible for managing treatment

Homebound status: Due to diagnosis of Other Mechanical Complication Of Indwelling Urethral Catheter , the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.

23. Signature and Date of Verbal SOC Where Applicable:
Electronically Signed by Messick, Charles RN on 12/26/2025

25. Date HHA Received Signed POT

24. Physician's Name and Address
Regina Kasun
2700 Prosperity Ave Ste 270
Fairfax, VA 22031
PHONE: 7036982431 FAX: 15716656878 NPI: 1356574867

26. I certify/recertify that this patient is confined to his/her home and needs intermittent skilled nursing care, physical therapy and/or speech therapy or continues to need occupational therapy. The patient is under my care, and I have authorized the services on this plan of care and will periodically review the plan.
F2F date : 10/23/2025

27. Attending Physician's Signature and Date Signed : Date of physician last face-to-face

28. Anyone who misrepresents, falsifies, or conceals essential information required for payment of Federal funds may be subject to fine, imprisonment, or civil penalty under applicable Federal laws.

Clinical Condition Requiring Homecare:

The patient is a 94-year-old Korean male who resides with his wife in a single-family home. He is primarily Korean-speaking and is noted to yell out intermittently. His wife reports that he experiences occasional hallucinations. The patient is currently bedbound and resting in a hospital bed. A Foley catheter is in place, draining clear yellow urine. The admission packet was provided to the wife, and paper consent was signed. The patient has no durable power of attorney (DPOA) or advance directives on file and is designated as Full Code. His medical history is significant for unspecified dementia, urinary tract infection (UTI), congestive heart failure (CHF), chronic kidney disease (CKD) stage 3, bilateral carotid stenosis, benign prostatic hyperplasia (BPH), coronary artery disease (CAD), bilateral hearing loss, and anemia. Additional history includes hypertensive heart disease, atherosclerotic heart disease of native coronary artery without angina pectoris, chronic pain, dorsalgia, and status post aortocoronary bypass graft. The patient also has a history of urinary retention and frequency, as well as a prior myocardial infarction. On <mh class="chrome-extension-FindManyStrings chrome-extension-FindManyStrings-style-8 CE-FMS-assessment">assessment</mh>, the patient was alert but confused, oriented only to self, and intermittently agitated-attempting to pull at his Foley catheter. His wife administered a dose of Seroquel to calm him. Physical examination revealed skin warm and dry to touch, with pink mucous membranes. Bilateral breath sounds were clear upon auscultation. The abdomen was soft, non-tender, with active bowel sounds in all quadrants. Moderate (2+) bilateral lower extremity edema was noted. Pedal pulses were diminished but palpable. No shortness of breath was reported, and vital signs were stable. The patient's appetite was poor. The physical therapy evaluation noted that the patient was referred to home health following hospitalization for decreased urinary output related to a suspected kinked Foley catheter, which has since been resolved. He remains bedbound due to severe deconditioning and bilateral lower extremity weakness. The patient has exhausted his rehabilitation benefits and is being managed at home by his wife and private caregivers. He resides on the entry level of a multilevel home, utilizing a hospital bed, wheelchair, and diaper for toileting. His hearing impairment is profound; although he has a cochlear implant, it is currently malfunctioning and cannot be repaired or replaced until January 2026 per insurance restrictions. The patient demonstrates significant deficits in strength, endurance, postural control, cognition, and functional mobility. He is nonverbal, requiring maximum assistance of one to two persons for all mobility, transfers, and activities of daily living (ADLs), including grooming, bathing, toileting, feeding, and dressing. Transfers from supine to sitting, sitting balance, and standing or pivoting all require maximum physical assistance. The wife serves as the primary caregiver, with additional private caregiver support provided from 9:00 AM-3:00 PM and 9:00 PM-5:00 AM daily. The patient was reportedly able to ambulate short distances with a front-wheeled walker and assistance prior to his recent hospitalization. A follow-up appointment with a urologist is scheduled for Friday to evaluate the Foley catheter and determine the need for removal. The care plan includes continued skilled nursing and physical therapy services to promote strength, improve functional mobility, and prevent further decline. Education was provided to the wife and caregiver regarding Foley care, infection prevention, <mh class="chrome-extension-FindManyStrings chrome-extension-FindManyStrings-style-2 CE-FMS-fall%20precautions">fall precautions</mh>, and safe transfer techniques. Ongoing monitoring of fluid status, edema, and cognitive behavior is recommended, with emphasis on maintaining patient comfort, preventing complications of immobility, and supporting caregiver education and safety in the home setting.
 Date of Order 12/26/2025 Orders Physician Face-to-Face Date: 10/23/2025 Clinical Condition Requiring Home Care per Certifying Physician: sn-disease management pt-eval & treat ot-eval & treat due To Other Mechanical Complication Of Indwelling Urethral Catheter Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home
 4 - Recertification Notes: The patient is being recertified due to Urinary tract infection and urinary catheter management.
 Physician Kasun, Regina

SN Careplans

SN WK2: 1 (01/04/26-01/10/26) ,WK5: 1 (01/25/26-01/31/26) ,WK8: 1 (02/15/26-02/21/26) ,WK9: 1 (02/22/26-02/25/26)

PARAMETERS FOR PHYSICIAN NOTIFICATION: temperature < 95 > 100.5, heart rate < 50 > 110, respiratory rate < 8 > 22, blood pressure systolic < 90 > 169, blood pressure diastolic < 60 > 90, O2 saturation < 88 > 100, pain < 0 > 5

CAREGIVER: 2. Non-agency caregiver(s) need training/supportive services to provide assistance

HOSPITALIZATION RISKS: 5. Decline in mental, emotional, or behavioral status in the past 3 months, 7. Currently taking 5 or more medications

STANDING ORDERS: infection control: hygiene, proper hand washing; fall precautions: wear sensible shoes, remove home hazards, living space adequately lit, assistive devices prn; emergency preparedness: plan for prn evacuation, resumption of home health visits; Skin Preservation: Measures to prevent skin breakdown; pressure relief, incontinence care, nutrition, hydration; Pain: Pain management measures; pain medication, rest, body alignment, ROM, meditation, massage; Medications: Medication actions, uses, frequency, dose, interactions of all new/change meds Advance Directive:No Advance Directive

PROBLEMS IDENTIFIED ON ASSESSMENT: poor muscle tone, limited range of motion, limited strength, limited endurance, weak hand grips, skin breakdown r/t incontinence

PROCEDURES: Medication Review- : Medications reviewed with patient/caregiver. , cough/deep breathing exercises: Patient unable to perform this task due to inability to follow cues, incentive spirometer: Patient unable to perform this task due to inability to follow cues, apply anti-embolitic stockings, train caregiver(s) to perform medical/rehabilitation treatments, monitor intake & output, catheter change, care & irrigation: Per PCP Regina Kasun IF issues with Foley Catheter send patient to ER. Patient / Family cancelled outpatient visit with urology. Foley orders received, catheter change, care & irrigation: Change patients suprapubic catheter every 3 weeks with 16 Fr 10cc Balloon silicone catheter. Flush with 30-60cc of sterile water or normal saline PRN for obstruction/clogging. Catheter last changed on 10/30/2025, teach/coordinate/arrange medication packaging and/or administration, monitor dialysis schedule

TEACH PATIENT/CAREGIVER: * lifestyle modifications to manage cardiac condition including symptom management diet changes regular exercise getting enough sleep, related medication(s) purpose, schedule, * lifestyle modifications to manage respiratory condition including diet changes and regular exercise strategies to control shortness of breath home remedies to keep lungs healthy, related medication(s) purpose, schedule, * lifestyle modifications to manage peripheral vascular condition including how to apply compression stockings physical exercise plan diet, related medication(s) purpose, schedule, * lifestyle modification to manage blood condition including dietary changes bleeding precautions, related medication(s) purpose, schedule, * how to optimize mental status with cognition therapy home safety optimize mobility with active and passive range of motion therapeutic exercises diet and fluids to optimize peripheral circulation, related medication(s) purpose, schedule, * how to keep home safe for patient with dementia coping strategies for the caregiver, related medication(s) purpose, schedule, * how to incorporate lifestyle modifications to optimize renal condition including renal-specific diet exercise monitoring of blood pressure blood sugar home, related medication(s) purpose, schedule remedies, * management of mental health

SN Goals

PATIENT-STATED GOAL: Patient has Dementia and speaking Korean only. Caregiver would like Patient to be alert and not Bedbound

GOALS
patient/caregiver recalls
* lifestyle modifications to manage peripheral vascular condition including how to apply compression stockings
* physical exercise plan
* diet
* recalls related medication(s) purpose, schedule

patient self-administers medications as prescribed
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* strategies to minimize fatigue and exhaustion including work simplification
* energy conservation
* lifestyle changes
* diet
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* urinary catheter management including how to flush catheter
* change and wash drainage bags
* prevent infection including proper handwashing
* positioning of catheter
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* management of mental health condition including joining a peer group
* maintaining regular contact with mental health professional
* avoiding known stressors
* controlling impulses
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* lifestyle modifications to manage respiratory condition including
* diet changes and regular exercise
* strategies to control shortness of breath
* home remedies to keep lungs healthy
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* low-fat diet
* lifestyle modifications to manage esophageal condition
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
