| Homebound status: Due to diagnosis of Pressure Ulcer Of Left Hip Stage 4, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |                       |                                                                                        |                                                                                                                           |  |
| Clinical Condition Requiring Homecare: <div>The patient is a fully contracted quadriplegic with a left hip pressure ulcer and requires total assistance with all activities of daily living (ADLs) and instrumental activities of daily living (IADLs). The patient is nonverbal but demonstrates awareness by following caregivers' movements with their eyes and occasionally smiling. They are primarily bedbound, with only rare periods out of bed to a wheelchair. Nutritional support is provided via tube feeding using a pump at 150 mL three times daily, with 120 mL water flushes before and after each feeding. The patient has regular bowel movements every other day. Medication management is overseen by the patient's mother and a skilled nurse.</div><div><br></div><div><span style="white-space: pre; white-space: normal;"></span></div><div>Date of Order</div><div>12/01/2025</div><div>Orders</div><div>Physician Face-to-Face Date: 05/27/2025</div><div>Clinical Condition Requiring Home Care per Certifying Physician: sn-wound management due to due to Pressure Ulcer Of Left Hip Stage 4</div><div>Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home</div><div><br></div><div><span style="white-space: pre; white-space: normal;"></span></div><div>4 - Recertification Notes: Patient is being recertified due to stage 4 pressure ulcer wound</div><div><br></div><div>Physician</div><div>Thomas, Keri</div></div>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |                       |                                                                                        |                                                                                                                           |  |

| PROBLEMS IDENTIFIED ON ASSESSMENT: involuntary movement of extremity, #1 - 4 - Full thickness tissue loss with visible bone, tendon, or muscle. Slough or eschar may be present. - Other - Left lateral buttock -                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |                       | * diet modification                                                                    |                                                                                                                           |  |
| PROCEDURES: Wound care: Discontinue all previous wound care. Cleanse L buttock healing pressure ulcer with wound cleanser, apply skin prep to periwound, apply collagen to wound base, and cover with bordered gauze dsg 2Xweek and PRN soiling or dislodging until healed. , Wound Center Order-As of 10/9/2025: Hold Home Health for one week. , cough/deep breathing exercises, incentive spirometer, physician-ordered wound care: As of 8/22/2025 Discontinue all previous wound care. To left hip wound- Cleanse with Vashe. Apply hydrofera blue Transfer ( no substitutions), cut to fit and tuck into base and undermining of wound, Fluff 2x2 inch gauze, DO NOT PACK!. Cover with 4x4 inch bordered mepilex. Change dressing 3 times a week. Begin Negative Pressure Wound Therapy once receiving wound vac. Remove dressing and cleanse wound with Vashe. Prep periwound with cavilon, apply Duoderm to periwound. Hydrofera Blue Transfer ( no substitutions), cut to fit and tuck into base and undermining of wound. Black foam. Seal NPWT Drape and connect to 125mmHG suction, continuous. Change NPWT dressing 3 times a week. (Do not forget Hydrofera Blue Transfer to touch base and follow with Black Foam) , physician-ordered wound care: As of 9/8/2025 Discontinue all previous wound care. To the left hip pressure ulcer wound- remove dressing and cleanse wound with Vashe. Prep periwound with Cavilon. Apply Duoderm to periwound, Hydrofera Blue Transfer (no substitutions) cut to fit and tuck into base and undermining of wound. Black foam into wound, do not pack in. Bridge suction pad (Trac Pad) to abdominal area using black foam. (Keep offloading wound). Seal with NPWT drape and connect to 150mmHG suction, continuous. Change NPWT dressing 3 times per week. Do not forget Hydrofera Blue Transfer to touch base (do not over pack) and follow with black foam. To Right Abdomen- Change Daily or as needed. Cleanse with soap and water. Use of interdry and wicking product.(No Aquaphor) . , physician-ordered wound care: As of 9/8/2025 Discontinue all previous wound care. To the left hip pressure ulcer wound- remove dressing and cleanse wound with Vashe. Prep periwound with Cavilon. Apply Duoderm to periwound, Hydrofera Blue Transfer (no substitutions) cut to fit and tuck into base and undermining of wound. Black foam into wound, do not pack in. Bridge suction pad (Trac Pad) to left upper thigh area using black foam. (Keep offloading wound). Seal with NPWT drape and connect to 150mmHG suction, continuous. Change NPWT dressing 3 times per week. Do not forget Hydrofera Blue Transfer to touch base (do not over pack) and follow with black foam. , physician-ordered wound care: As of 9/15/2025 Discontinue all previous wound care. To the left hip pressure ulcer wound- remove dressing and cleanse wound with Vashe. Prep periwound with Cavilon. Apply Duoderm to periwound, Hydrofera Blue Transfer (no substitutions) cut to fit and tuck into base and undermining of wound. Black foam into wound, do not pack in.
