10. Medications: Dose/Frequency/Route (N)ew (C)hanged

Multivitamin - Alpha-Tocopherol Acetate: Ascorbic Acid: Biotin: Cholecalciferol: Cyanocobalamin: Dexpanthenol: Folic Acid: Niacinamide: Pyridox 1 tab by mouth once a day supplement
Atorvastatin - Atorvastatin Calcium Take 40 mg tablet by mouth at bedtime Take 40 mg tablet at bedtime
cholesterol
Vitamin C - Alpha-Tocopherol Acetate: Ascorbic Acid: Biotin: Cholecalciferol: Cyanocobalamin: Dexpanthenol: Folic Acid: Niacinamide: Pyridox 500mg; 1 tab by mouth once a day supplement
Vitamin D3 - Alpha-Tocopherol Acetate: Ascorbic Acid: Biotin: Cholecalciferol: Cyanocobalamin: Dexpanthenol: Folic Acid: Niacinamide: Pyridox 50 mcg (2,000 IU); 1 TAB by mouth once a day SUPPLEMENT
Colace - Docusate Sodium 100mg; 1 tab by mouth once a day bowel regimen
Miralax - Polyethylene Glycol 3350 Take 17 gram (powder) by mouth once a day 17 gram oral powder packet
as needed for constipation
Latanoprost - Latanoprost 0.005 perc 0.005%; 1 drop right eye in the evening glaucoma
Dorzolamide Hydrochloride And Timolol Maleate - Dorzolamide Hydrochloride: Timolol Maleate eq 2 perc base;eq 0.5 perc base 1 drop right eye twice a day glaucoma
Tylenol - Acetaminophen Take 650 mg, tablet by mouth every 8 hours As nded, PRN, 8 Hour 650 mg tablet, extended release for pain
Albuterol Sulfate And Ipratropium Bromide - Albuterol Sulfate: Ipratropium Bromide 0.5/2.5mL/3mL inhalant every 4 hours PRN, every 4 hours q4h neb for SOB

14. DME and Supplies:
wheelchair, , hospital bed

15. Safety Measures:
ambulates with assistance, activity supervision, wheelchair precautions, , supervision at all times, , infectious material management, , bedrails up while in bed

16. Nutrition:
pureed

17. Allergies:
no known allergies

18.A. Functional Limitations
Speech, Ambulation, Contracture

18.B. Activities Permitted
Up As Tolerated

19. Mental & Pyschosocial Status: COGNITION: 4. Is totally dependent in toileting., ANXIETY: 4. Constantly, SOCIAL ISOLATION: , BEHAVIORAL ISSUES: , HISTORY OF DEPRESSION:

20. Prognosis: poor

22. A Rehabilitation Potential:
SELF-CARE: , MOBILITY:

22.B.Discharge Plans
family/caregiver will be responsible for managing treatment

Homebound status:
Due to diagnosis of Hypertensive Chronic Kidney Disease With Stage 1 Through Stage 4 Chronic Kidney Disease, Or Unspecified Chronic Kidney Disease, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.

Clinical Condition Requiring Homecare:
The patient is an 86-year-old female with a significant past medical history including Alzheimer's disease, cerebrovascular accident (CVA), chronic obstructive pulmonary disease (COPD), chronic kidney disease (CKD), hypertension, dyslipidemia, type 2 diabetes mellitus, osteoarthritis, obstructive sleep apnea, history of urinary tract infections, carpal tunnel syndrome, history of retinal detachment, and prior right knee replacement. She was referred by her primary care provider for skilled nursing, physical therapy, and occupational therapy evaluations due to progressive functional decline and complete dependence in activities of daily living (ADLs). Upon nursing assessment, the patient was nonverbal and drowsy but responsive to voice stimuli. She appeared comfortable and in no acute distress. The patient is bedbound and incontinent of both urine and stool, with the last bowel movement noted on the day of visit. Vital signs were stable. Skin was intact, and caregivers have been diligent with hygiene and repositioning. The patient resides at home with 24-hour paid caregivers and is also closely supervised by her daughter, both of whom are competent and attentive to her needs. Physical therapy evaluation determined that the patient has been non-ambulatory for approximately one year and demonstrates minimal active movement in all extremities. She is completely dependent for transfers and mobility. Given the extent of her cognitive impairment and physical limitations, she is not an appropriate candidate for active skilled physical therapy at this time, as she is unable to follow even one-step commands or participate meaningfully in therapy tasks. Caregivers currently perform passive range of motion exercises and transfer the patient to a wheelchair multiple times daily for positioning and pressure relief. PT recommended the use of a Barton chair to minimize caregiver strain and facilitate safer transfers. Nursing interventions included review of all medications, education on incontinence management, and reinforcement of pressure injury prevention techniques, including frequent repositioning and use of cushioning devices. The daughter and caregivers verbalized full understanding of all instructions. Skilled nursing will continue at a frequency of twice weekly for two weeks, then weekly for two weeks, to monitor the patient's overall condition, ensure caregiver compliance with skin integrity measures, and reinforce ongoing education. Occupational therapy evaluation is pending to assess the need for adaptive equipment and caregiver training to optimize patient comfort and safety in the home environment.
 Date of Order 12/29/2025 Orders Physician Face-to-Face Date: 10/27/2025 <span style="font-size:

CAREGIVER: 2. Non-agency caregiver(s) need training/supportive services to provide assistance

HOSPITALIZATION RISKS: 5. Decline in mental, emotional, or behavioral status in the past 3 months

STANDING ORDERS: infection control: hygiene, proper hand washing; advance directive: plan if patient is unable to make healthcare decisions ; fall precautions: wear sensible shoes, remove home hazards, living space adequately lit, assistive devices prn; emergency preparedness: plan for prn evacuation, resumption of home health visits; Skin Preservation: Measures to prevent skin breakdown; pressure relief, incontinence care, nutrition, hydration ; Pain: Pain management measures; pain medication, rest, body alignment, ROM, meditation, massage ; Medications: Medication actions, uses, frequency, dose, interactions of all new/change meds
Advance Directive:Living Will

PROBLEMS IDENTIFIED ON ASSESSMENT: cough/gag/pain chew/swallow, #1 - Open Wound - Other - Posterior middle of buttock on coccyx - Open no bleeding, slough present., #2 - Other - Posterior Left Ankle/Foot - Hard skin

PROCEDURES: physician-ordered wound care: #2 - Other - Posterior Left Ankle/Foot - Hard skin, physician-ordered wound care: #1 - Open Wound - Other - Posterior middle of buttock on coccyx - Open no bleeding, slough present., Medication Review- : Medications reviewed with patient/caregiver. , cough/deep breathing exercises, train caregiver(s) to perform medical/rehabilitation treatments, wound vacuum, teach/coordinate/arrange medication packaging and/or administration, coordinate/arrange for adequate patient supervision, coordinate/arrange resources for vision-impaired, venipuncture: WEEK OF 11/3/25. SN TO OBTAIN CMP, LIPID PANEL; CBC WITH DIFF, TSH, VIT D, 25, HYDROXY VIA VENIPUNCTURE. OBTAIN URINALYSIS. STRAIGHT CATH TO OBTAIN URINE. FAX RESULTS TO DR.HASHMI SHOAIB (410) 383-0054., monitor dialysis schedule

TEACH PATIENT/CAREGIVER: * lifestyle modifications to manage respiratory condition including diet changes and regular exercise strategies to control shortness of breath home remedies to keep lungs healthy, related medication(s) purpose, schedule, * lifestyle modifications to manage peripheral vascular condition including how to apply compression stockings physical exercise plan diet, related medication(s) purpose, schedule, * how to maintain a diary to monitor effective and non-effective pain relief including documenting time of pain, rating, precipitating events, medications, treatments, and what works best to relieve pain teach relaxation skills and diversional activities, related medication(s) purpose, schedule, * how to manage sleep disorder including changes to daytime habits and bedtime routine maintaining a journal to track sleep patterns, related medication(s) purpose, schedule, * how to keep home safe for patient with dementia coping strategies for the caregiver, related medication(s) purpose, schedule, * how to incorporate lifestyle modifications to optimize renal condition including renal-specific diet exercise monitoring of blood pressure blood sugar home, related medication(s) purpose, schedule remedies, * management of mental health condition including joining a peer group maintaining regular contact with mental health professional avoiding known stressors controlling impulses, related medication(s) purpose, schedule, * how to achieve wound healing including cleaning and dressing wound position changes skin care diet modification record wound measurements, related medication(s) purpose, schedule, * how to keep home safe for patient with vision loss including eliminating hazards enhancing lighting using mechanical aids, patient self-administers medications as prescribed, related medication(s) purpose, schedule, patient is adequately supervised, meal preparation is available to patient for all meals, caregiver administers and/or packages medications appropriately, caregiver performs medical/rehabilitation treatments with adequate competence

SN Goals

PATIENT-STATED GOAL: want some improvement

GOALS
patient/caregiver recalls
* how to achieve wound healing including cleaning and dressing wound
* position changes
* skin care
* diet modification
* record wound measurements
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* how to keep home safe for patient with dementia
* coping strategies for the caregiver
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* management of mental health condition including joining a peer group
* maintaining regular contact with mental health professional
* avoiding known stressors
* controlling impulses
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* how to keep home safe for patient with vision loss including eliminating hazards
* enhancing lighting
* using mechanical aids

patient self-administers medications as prescribed
* recalls related medication(s) purpose, schedule

meal preparation is available to patient for all meals

patient is adequately supervised

caregiver administers and/or packages medications appropriately

caregiver performs medical/rehabilitation treatments with adequate competence

patient/caregiver recalls
* lifestyle modifications to manage peripheral vascular condition including how to apply compression stockings
* physical exercise plan
* diet
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* how to manage sleep disorder including changes to daytime habits and bedtime routine
* maintaining a journal to track sleep patterns
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* lifestyle modifications to manage respiratory condition including
* diet changes and regular exercise
* strategies to control shortness of breath
* home remedies to keep lungs healthy
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* how to incorporate lifestyle modifications to optimize renal condition including renal-specific diet
* exercise
* monitoring of blood pressure
* blood sugar
* home
* recalls related medication(s) purpose, schedule remedies

patient/caregiver recalls
* how to maintain a diary to monitor effective and non-effective pain relief including documenting time of pain, rating, precipitating events, medications, treatments, and what works best to relieve pain
