Homebound status:	patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home, medical condition could get worse if patient leaves home
Clinical Condition	Requiring Home Care per Certifying Physician: Chronic wounds on bilateral feet, Diabetes, Medication management. SN to assess Cardiopulmonary, GI/GU, Neuro, Requiring Homecare: Musculoskeletal and Integumentary systems, Safety with ADLs and fall precautions, medication management and education, diagnoses management and education, and wound care per orders 3 times weekly and as needed for complications.

SN Careplans

SN FREQUENCY: SN 3w8 and prn wound complications

CLINICAL SUMMARY:

Recertification visit completed today. Pt saw podiatrist on Wednesday and non-removable dressing in place. SN to see pt on Monday to remove the dressing and continue previous wound care (betadine to wound bed, aquacel ag dressing coverd with gauze). Pt reports pain in left foot has decreased since the doctor's appointment. Left leg appears more reddened than at previous visit. No warmth noted. Recently completed antibiotics for left foot wound infection. Nurse performed head to toe assessment today. Lungs clear, heart sounds normal. Bowel sounds active x4 quadrants. Pt has chronic pain and sees pain management. She recently was seeing OP PT but has not attended in serveraw weeks due to increased pain in left foot r/t new wound. Diabetes well controlled and recently blood sugar levels have been under 200. Pt ambulates with a cane and has requested DME from PCP (quad cane). HH MSW recently spoke with pt and may need additional visits to assist with community resources. Nurse will continue visits 3 times per week until wound heals. Next podiatry visit is scheduled for January 29th.

PARAMETERS FOR PHYSICIAN NOTIFICATION: temperature < 95 > 101, heart rate < 50 > 120, respiratory rate < 12 > 29, blood pressure systolic < 85 > 170, blood pressure diastolic < 50 > 90, O2 saturation < 88 > 100, pain < 0 > 8, blood sugar < 60 > 300

CAREGIVER: 0. No assistance needed - patient is independent or does not have needs in this area

HOSPITALIZATION RISKS: 1. History of falls (2 or more falls- or any fall with an injury- in the past 12 months), 7. Currently taking 5 or more medications, 8. Currently reports exhaustion

STANDING ORDERS:

infection control: hygiene, proper hand washing;

advance directive: plan if patient is unable to make healthcare decisions; MPOA;

fall precautions: wear sensible shoes, remove home hazards, living space adequately lit, assistive devices prn;

emergency preparedness: plan for prn evacuation, resumption of home health visits

PROBLEMS IDENTIFIED ON ASSESSMENT: #3 - 3 - Full thickness tissue loss. Subcutaneous fat may be visible but bone, tendon, or muscles not exposed. - Anterior Left Foot - new wound

PROCEDURES:

Left Foot physician-ordered wound care: foot and toe wounds: cleanse the area, pat dry, apply betadine, apply aquacel ag, cover with dry dressing and secure with tape or bandaid Frequency: 3 times per week and prn,

glucose testing via monitor: Nurse to review logs

TEACH PATIENT/CAREGIVER: * how to take the patient's blood pressure record the reading, related medication(s) purpose, schedule, * lifestyle modifications to manage respiratory condition including diet changes and regular exercise strategies to control shortness of breath home remedies to keep lungs healthy, related medication(s) purpose, schedule, * lifestyle modifications to manage peripheral vascular condition including how to apply compression stockings physical exercise plan diet, related medication(s) purpose, schedule, * low cholesterol dietary guidelines, related medication(s) purpose, schedule, * how to keep home safe for patient with dementia coping strategies for the caregiver, related medication(s) purpose, schedule, * how to achieve wound healing including cleaning and dressing wound position changes skin care diet modification record wound measurements, related medication(s) purpose, schedule, * how to manage complications of immobility including skin care strength, balance dexterity and range-of-motion therapeutic exercises promotion of peripheral circulation fluid and diet intake to promote healing and prevent constipation, * how to manage skin condition including physician-prescribed treatment skin care bathing sun protection diet exercise, related medication(s) purpose, schedule, * diabetic medication management blood sugar testing diabetic foot care exercise diabetic diet, related medication(s) purpose, schedule, * diet weight-bearing exercises to promote bone healing and strengthening fluids to prevent constipation home safety pain control, related medication(s) purpose, schedule, * how to optimize joint mobility with active and passive range of motion exercises fluid and diet intake to promote healing prevent constipation home safety pain control, related medication(s) , * how to optimize joint mobility with active and passive range of motion exercises fluid and diet intake to promote healing prevent constipation home safety pain control, related medication(s) purpose, schedule

SN Goals

PATIENT-STATED GOAL: wound care, skin care, prevent pressure ulcer developement

GOALS

patient/caregiver recalls

- * how to take the patient's blood pressure
- * record the reading
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * how to manage skin condition including physician-prescribed treatment
- * skin care
- * bathing
- * sun protection
- * diet
- * exercise
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * how to optimize joint mobility with active and passive range of motion exercises
- * fluid and diet intake to promote healing
- * prevent constipation
- * home safety
- * pain control
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * how to achieve wound healing including cleaning and dressing wound
- * position changes
- * skin care
- * diet modification
- * record wound measurements
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * diabetic medication management
- * blood sugar testing
- * diabetic foot care
- * exercise
- * diabetic diet
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * how to manage complications of immobility including
- * skin care
- * strength, balance
- * dexterity and range-of-motion therapeutic exercises
- * promotion of peripheral circulation
- * fluid and diet intake to promote healing and prevent constipation

patient/caregiver recalls

- * how to optimize joint mobility with active and passive range of motion exercises
- * fluid and diet intake to promote healing
- * prevent constipation
- * home safety
- * pain control
- * recalls related medication(s)

patient/caregiver recalls

- * lifestyle modifications to manage peripheral vascular condition including how to apply compression stockings
- * physical exercise plan
- * diet
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * low cholesterol dietary guidelines
- * recalls related medication(s) purpose, schedule
