10. Medications: Dose/Frequency/Route (N)ew (C)hanged

Coumadin - Warfarin Sodium 10 mg take 10 mg tablet by mouth once a day 10 mg, 1 time daily for a fib
Crestor - Rosuvastatin Calcium take 5 mg tablet by mouth once a day 5 mg, 1 time daily at bedtime
Flomax - Tamsulosin Hydrochloride take 0.4 mg capsules by mouth once a day 0.4 mg, 1 time daily every evening for Urinary retention
Tylenol - Acetaminophen take 650 mg Tablet by mouth every 6 hours 650 mg, Oral, every 6 hours PRN for fever and pain
Mupirocin - Mupirocin 2% topical once a day Once daily for wound care
Advair - Fluticasone Propionate: Salmeterol Xinafoate 100-50 MCG/ACT , take 1 puff inhaler inhalant twice a day 1 puff, 2 times daily
Miralax - Polyethylene Glycol 3350 take 17 g powder by mouth once a day 17 g, Oral, 1 time daily, Stir and dissolve 1 packet in any 4-8 ounces of non-carbonated beverage. PT taking as needed
Pulmicort - Budesonide Take 0.5 mg inhalant twice a day 0.5 mg, 2 times daily
Senokot - Senna take 17.2 mg tablet by mouth twice a day 17.2 mg, Oral, 2 times daily PRN
Hydralazine - Hydralazine Hydrochloride 50mg by mouth three times a day Take 1/2 Tablet (25mg) by mouth TID for hypertension.
Potassium - Potassium Chloride 20meq by mouth once a day for low potassium
Alginate - topical two times per week 2-3 times a week for wound care to right ankle

14. DME and Supplies:
urinary/catheter supplies, wound care supplies

15. Safety Measures:
supervision at all times, , cardiac precautions, , activity supervision

16. Nutrition:
low sodium

17. Allergies:
no known allergies

18.A. Functional Limitations
Ambulation, Bowel/Bladder Incontinence, Endurance

18.B. Activities Permitted
Complete Bedrest

19. Mental & Pyschosocial Status: COGNITION: 4. Is totally dependent in toileting., ANXIETY: 0. Never, SOCIAL ISOLATION: , BEHAVIORAL ISSUES: , HISTORY OF DEPRESSION:

20. Prognosis: fair

22. A Rehabilitation Potential:
SELF-CARE: , MOBILITY:

22.B.Discharge Plans
family/caregiver will be responsible for managing treatment

Homebound status: Due to diagnosis of Encounter for surgical aftercare following surgery on the digestive system, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.

Clinical Condition Requiring Homecare:

The patient is a 72-year-old male who is bedbound and fully dependent on care. He is alert, oriented, and presents as pleasant. His wife, who is his primary caregiver, manages all aspects of his care at home. The patient reports no pain and maintains intact vision and hearing. He is currently being treated for a C. difficile infection, resulting in loose stools, which his wife finds challenging to manage alongside his wound care. He has an indwelling urinary catheter with clear urine output, though his wife reports frequent clogs and a catheter-associated UTI. Multiple pressure ulcers were noted, including unstageable wounds on both heels and the left second toe, a Stage II ulcer above the right ankle, and a Stage II sacral wound. The RN assisted with hygiene and wound care during the visit and advised that concerns regarding catheter management and wound care would be addressed with the healthcare team. The patient's wife expressed difficulty in managing his care alone and requested a home health aide and additional wound care supplies, expressing concerns about insurance coverage. The RN assured her these concerns would be relayed to the case manager and noted that a follow-up would also be made with their Kaiser social worker regarding catheter supplies. The patient is scheduled for a virtual follow-up on September 30 due to difficulty transferring him, as he cannot bend his knees and requires full assistance with repositioning. A recent PT evaluation noted significant physical decline following a femur fracture earlier this year, resulting in bilateral knee contractures. PT recommended the use of a bolster for passive stretching and initiation of a home exercise program to reduce further contractures and prevent skin breakdown. The patient would benefit from continued skilled PT services.
 Date of Order 01/19/2026 Orders Physician Face-to-Face Date: 09/19/2025 Clinical Condition

23. Signature and Date of Verbal SOC Where Applicable:
Electronically Signed by Messick, Charles RN on 01/19/2026

25. Date HHA Received Signed POT

SN Careplans

SN WK3: 1 (02/01/26-02/07/26) ,WK5: 1 (02/15/26-02/21/26) ,WK7: 1 (03/01/26-03/07/26) ,WK9: 1 (03/15/26-03/21/26)

PARAMETERS FOR PHYSICIAN NOTIFICATION: temperature < 95 > 100.5, heart rate < 50 > 110, respiratory rate < 8 > 22, blood pressure systolic < 90 > 169, blood pressure diastolic < 60 > 90, O2 saturation < 88 > 100, pain < 0 > 5

CAREGIVER: 1. Non-agency caregiver(s) currently provide assistance

HOSPITALIZATION RISKS: 7. Currently taking 5 or more medications

STANDING ORDERS: infection control: hygiene, proper hand washing; advance directive: plan if patient is unable to make healthcare decisions ; fall precautions: wear sensible shoes, remove home hazards, living space adequately lit, assistive devices prn; emergency preparedness: plan for prn evacuation, resumption of home health visits; Skin Preservation: Measures to prevent skin breakdown; pressure relief, incontinence care, nutrition, hydration ; Pain: Pain management measures; pain medication, rest, body alignment, ROM, meditation, massage ; Medications: Medication actions, uses, frequency, dose, interactions of all new/change meds ; foley catheter change as directed 18fr silicone; Assess the patient's incision on post op day 7 and the nurse or physical therapist will remove aquacel dressing leaving OTA; if incision is draining educate pt/pcg on cleaning with normal saline and covering with dry gauze daily and as needed.
Assess/Instruct Pt/Pcg: Ice to ____ x 20 minutes each hour while awake. If cold machine ordered apply 20 minutes on and 20 minutes off for 3-4 times a day.
Assess/Instruct all body systems/vital signs/complications, Blood Pressure; systolic is greater than 169 mm Hg or less than 90 mm Hg; diastolic is greater than 100 mm Hg or less than 55 mm Hg, Clinician to assess comorbidities and report changes in condition to the patient's physician, Pain Rating is greater than 6 on 0-10 scale, Pulse is greater than 110 or less than 50, Respirations are greater than 22 or less than 8, SPO2: is less than 90 % at rest /with exertion, Temperature is greater than 100.5 F or less than 95.0 F, Pain Rating is greater than 6 on 0-10 scale
Implement Fall Prevention Program, Instruct and educate the patient/PCG on wearing compression stockings for the next 4 weeks per discharge instructions.
Instruct the pt/PCG on using the incentive spirometer 10 times every 2 hour while awake.
Provide education content at patient's level of health literacy.
Assess/Instruct Pt/Pcg: Safety measures to prevent injury.
Assess: Musculoskeletal status.
Teach Pt/Pcg to maintain appropriate wt bearing status as ordered by MD, total joint replacement precautions as applicable, Safe stair climbing skills, Safe, effective use of adaptive/assist device
Assess/Instruct Pt/Pcg: Pain management measures; assess pain level, pain medication, rest, body alignment, ROM, meditation, massage.
Pt/Pcg educated in pain management techniques including positioning and relaxation techniques
Instruct Pt/Pcg: Medication actions, uses, frequency, dose, side effects, interactions of all new/change meds, Provide medication education,.
Assess/Instruct Pt/Pcg: Safety measures to prevent injury, Therapeutic Exercise, Transfer Training
Monitor surgical wound for s/s of infection, educate on s/s of concern and infection prevention to promote wound healing.

Cleanse all wounds with normal saline, pat dry Patient with unstageable pressure injuries noted to bilat heels, present on admission. Wounds present as thin black eschar. No erythema noted. No drainage noted. Recommend offload in heel offloading boots at all times. Remove for assessment of skin and replace. Patient with loss of pigment and several partial thickness wounds noted to bilat buttocks, present on admission. Wounds etiology from a combination of pressure, stage 2, friction, shear, incont associated skin damage. Recommend foam dressing is stool incontinence can be managed. Change every three days. Patient with stage 2 pressure injury to right lateral lower leg, present on admission. Wound mostly epithelialized. Small partial thickness wound noted with pink base. Recommend foam dressing and change every three days.
Advance Directive:POLST (Physician Orders for Life-Sustaining Treatment)

PROBLEMS IDENTIFIED ON ASSESSMENT: #1 - 1 - Intact skin with non-blanchable redness of a localized area usually over a bony prominence. - Posterior Left Heel - , #2 - 6 - Unstageable due to coverage of wound bed by slough and/or eschar. - Posterior Left Heel - 2nd left toe. Small reddened surface , #3 - 6 - Unstageable due to coverage of wound bed by slough and/or eschar. - Posterior Right Heel - Wound is unstageable due to thickened, dried skin over the surface, #4 - 6 - Unstageable due to coverage of wound bed by slough and/or eschar. - Posterior Right Ankle/Foot - , #5 - 1 - Intact skin with non-blanchable redness of a localized area usually over a bony prominence. - Posterior Sacrum -

PROCEDURES: physician-ordered wound care: #1 - 1 - Intact skin with non-blanchable redness of a localized area usually over a bony prominence. - Posterior Left Heel -, physician-ordered wound care: #2 - 6 - Unstageable due to coverage of wound bed by slough and/or eschar. - Posterior Left Heel - 2nd left toe. Small reddened surface, physician-ordered wound care: #3 - 6 - Unstageable due to coverage of wound bed by slough and/or eschar. - Posterior Right Heel - Wound is unstageable due to thickened, dried skin over the surface, physician-ordered wound care: #4 - 6 - Unstageable due to coverage of wound bed by slough and/or eschar. - Posterior Right Ankle/Foot -, physician-ordered wound care: #5 - 1 - Intact skin with non-blanchable redness of a localized area usually over a bony prominence. - Posterior Sacrum -, Medication Review- : Medications reviewed with patient/caregiver.

SN Goals

PATIENT-STATED GOAL: "Continue to get better and stronger";foley catheter

GOALS
patient's transportation needs are met

patient/caregiver recalls
* lifestyle modifications to manage cardiac condition including symptom management
* diet changes
* regular exercise
* getting enough sleep
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* urinary catheter management including how to flush catheter
* change and wash drainage bags
* prevent infection including proper handwashing
* positioning of catheter
* recalls related medication(s) purpose, sch

patient/caregiver recalls
* urinary incontinence management including bladder training
* Kegel exercises
* skin care
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* how to manage inflammatory process
* optimize mobility with active and passive range of motion exercises
* fluid and diet intake to promote healing
* prevent constipation
* home safety
* recalls related medic

caregiver administers and/or packages medications appropriately

meal preparation is available to patient for all meals

patient is adequately supervised

patient/caregiver recalls
* urinary catheter management including how to flush catheter
* change and wash drainage bags
* prevent infection including proper handwashing
* positioning of catheter
* recalls related medication(s) purpose, schedule

caregiver performs medical/rehabilitation treatments with adequate competence

patient self-administers medications as prescribed
* recalls related medication(s) purpose, schedule

caregiver recalls how to
* inspect regularly for gaps where patient can become trapped between the mattress, rail, or bed frame
* ensure the top of the bed rail is at least 4 inches (100mm) above the mattress
* to avoid using bed rails with a soft mattress to decrease entrapment risk

patient/caregiver recalls
* prevention including increase fluid intake
* increase Vitamin C intake to promote acidic bladder environment (cranberry juice)
* perineal hygiene
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* lifestyle modifications to manage peripheral vascular condition including how to apply compression stockings
* physical exercise plan
* diet
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
