14. DME and Supplies:				15. Medications: Dose/Frequency/Route (N)ew (C)hanged	
walker, diabetic supplies				mirabegron (mybetrig) 50mg oral tablet , extended release) 1 tablet by mouth once a day Bladder	
				ocular lubricant (refresh dry eye therapy) 1 drops each eye drops as necessary As needed for dryness	
				apixaban 2.5mg oral tablet, 1 tablet by mouth twice a day Blood thinner	
				Livalo - Pitavastatin Calcium 2mg oral tablet, 1 tablet by mouth once a day	
				Cholesterol	
				Lexapro - Escitalopram Oxalate 20mg oral tablet , 1 tablet by mouth once a day Depression	
				Furosemide - Furosemide 20mg oral tablet, take 1 tablet by mouth once a day Edema	
				Amiodarone - Amiodarone Hydrochloride 200mg by mouth once a day Heart rate	
				Metoprolol Tartrate - Metoprolol Tartrate 25 mg 1 tablet by mouth twice a day Blood pressure	
				Oxygen - Oxygen 2L/min nasal cannula as necessary For dyspnea	
				semaglutide (rybelsus 14 mg oral tablet) by mouth once a day	
				Levothyroxine - Levothyroxine Sodium 137 mcg(0.125mg) oral capsule , 1 capsule by mouth once a day Thyroid	
				Buspirone Hcl - Buspirone Hydrochloride 5 mg by mouth twice a day Mood anxiety	
				Pantoprazole - Pantoprazole Sodium 40 mg 1 tab by mouth before meal Stomach	
				Calcitriol - Calcitriol 0.25mcg 1 tab by mouth threee times per week	
				Folic Acid - Folic Acid 5 mg/ml 1 tab by mouth in the morning	
				Basaglar - Insulin Glargine 8.5 intramuscular in the morning DM	
				Novolog - Insulin Aspart Recombinant 100 units/ml 4 units intramuscular twice a day DM am and pm	
				Aristocort A - Triamcinolone Acetonide 0.1 perc To affected area topical three times a day Prn for rash	
				Loratidine - Loratadine 10 mg by mouth in the morning Rash	
				Kenalog - Triamcinolone Acetonide 0.1 perc topical three times a day Apply to skin 2-3 times daily as needed for dermatitis	
				Methylprednisolone - Methylprednisolone 4 mg Follow directions by mouth before meal Prednisone pack started Saturday ends on Thursday	
				Acetaminophen - Acetaminophen 500 mg by mouth every 6 hours For pain	
				Lidocaine Patch - Lidocaine 4 mg transdermal once a day To left ankle	
				Vitamin C - Alpha-Tocopherol Acetate: Ascorbic Acid: Biotin: Cholecalciferol: Cyanocobalamin: Dexpantenol: Folic Acid: Niacinamide: Pyridox 500 by mouth in the morning	
				Rosuvastatin Calcium - Rosuvastatin Calcium 40 mg by mouth at bedtime	
				Ezetimibe - Ezetimibe 10mg by mouth once a day	
				Aspirin 81Mg - Aspirin 81 by mouth in the morning	
16. Nutrition:				17. Safety Measures:	
cardiac diet, diabetic				walker precautions, , sharps precautions, , diabetic precautions, cardiac precautions, ambulates with device, , ambulates with assistance	
18.A. Functional Limitations				18. Allergies:	
Dyspnea With Minimal Exertion, Legally Blind, Ambulation, Endurance, Bowel/Bladder Incontinence				no known allergies	
19. Mental & Pyschosocial Status:				18.B. Activities Permitted	
COGNITION: 1. Requires prompting (cuing, repetition, reminders) only under stressful or unfamiliar conditions., ANXIETY: 3. During the day and evening, but not constantly, SOCIAL ISOLATION: 0. Never, BEHAVIORAL ISSUES: 1. Memory deficit: failure to recognize familiar persons/places, inability to recall events of past 24 hours, significant memory loss so that supervision is required!2. Impaired decision-making: failure to perform usual ADLs or IADLs, inability to appropriately stop activities, jeopardizes safety through actions, HISTORY OF DEPRESSION: Yes				Walker, Up As Tolerated

Homebound status:

Due to diagnosis of Hypertensive Heart And Chronic Kidney Disease With Heart Failure And Stage 1 Through Stage 4/Unspecified Chronic Kidney Disease, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.

Clinical Condition Requiring Homecare:

<div>The patient is a 90-year-old individual who returned home following a recent hospitalization and subsequent rehabilitation stay related to sepsis, multiple falls, and functional decline, with additional complications including left eye blindness and bilateral visual impairment. The patient is alert but forgetful at baseline and is oriented to self only (A+Ox1). Past medical history is significant for hypertension, diabetes mellitus, congestive heart failure, chronic kidney disease, atrial fibrillation, chronic obstructive pulmonary disease, anemia, hypothyroidism, osteoarthritis, depression, and anxiety. The patient resides with family support and requires continuous supervision and assistance. Conflicting housing details were noted in prior documentation; however, the patient currently lives with a daughter and receives aide services in the morning and evening. The patient is considered homebound due to the significant effort required to leave the home and is further supported by a Tinetti score of 12/28, indicating a high fall risk. The patient is incontinent, though skin integrity is intact at this time. Functionally, the patient ambulates approximately 30 feet twice with a rolling walker and requires contact guard assistance, as well as supervision at all times for safety. Transfers to and from bed and chair are performed with supervision, and bed mobility requires supervision and verbal encouragement. The patient demonstrates decreased endurance, strength, and functional mobility, with increased assistance needed for activities of daily living following the recent illness and hospitalization. Due to visual impairment and generalized weakness, the patient remains at high risk for falls. During therapy sessions, the patient tolerated therapeutic exercises including supine hip flexion, bridging, hooklying trunk rotation, straight leg raises, hip abduction, seated knee extension, and ankle pumps, performing 10 repetitions of each with verbal cues for proper technique. Outside ambulation, stair negotiation, and car transfers were not assessed at this time. The patient has been referred to home health services for skilled nursing, physical therapy, and occupational therapy evaluations. Skilled nursing <mh class="chrome-extension-FindManyStrings chrome-extension-FindManyStrings-style-9 CE-FMS-visits">visits</mh> are recommended at a frequency of two <mh class="chrome-extension-FindManyStrings chrome-extension-FindManyStrings-style-9 CE-FMS-visits">visits</mh> in the first week followed by one visit per week for three weeks, with the next skilled nursing visit scheduled for Wednesday. Physical therapy is recommended to address deficits in strength, balance, gait, and functional mobility to reduce fall risk and improve safety within the home. Occupational therapy is indicated to address limitations in activities of daily living, functional endurance, and safety awareness, particularly in the context of visual impairment. Education has been initiated regarding safe ambulation with a walker, the importance of supervision, and adherence to prescribed therapy. The plan of care focuses on maximizing functional independence, improving mobility and endurance, maintaining skin integrity, and supporting the patient and family in managing ongoing medical and functional needs safely within the home environment.</div><div> </div><div>
