1487113239

8. DOB 12/31/1950 | **9.Sex** Female

11. ICD	Principal Diagnosis	Date
E11.9	Type 2 diabetes mellitus without complications	02/23/26

13. ICD	Other Pertinent Diagnoses	Date
E55.9	Vitamin D deficiency unspecified	02/23/26
I70.0	Atherosclerosis of aorta	02/23/26
E83.42	Hypomagnesemia	02/23/26
G89.29	Other chronic pain	02/23/26
M54.50	Low back pain unspecified	02/23/26
Z79.84	Long term (current) use of oral hypoglycemic drugs	02/23/26
Z79.4	Long term (current) use of insulin	02/23/26
Z79.85	Lng trm (crnt) use injectable non-insulin antidiabetic drugs	02/23/26
Z79.82	Long term (current) use of aspirin	02/23/26

10. Medications: Dose/Frequency/Route (N)ew (C)hanged

Metformin Hcl - Metformin Hydrochloride 500 MG,Give 1000 mg tablet by mouth once a day Give 1000 mg by mouth one time a day for DM
Atorvastatin Calcium - Atorvastatin Calcium 40 MG,Give 40 mg tablet by mouth at bedtime Give 40 mg by mouth at bedtime for HLD
Senna Plus Tablet 8.6-50 MG (Sennosides-Docusate Sodium) 8.6-50 MG, Give 2 tablet by mouth every 12 hours Give 2 tablet by mouth every 12 hours as needed for constipation
Bupropion Hydrochloride - Bupropion Hydrochloride 450mg, Give 1 tablet by mouth once a day DEPRESSION
Acetaminophen - Acetaminophen 325mg, take 2 tablets by mouth every 6 hours as needed for mild pain
Gabapentin - Gabapentin 300 mg take 2 capsules by mouth once a day neuropathy
Melatonin - Melatonin 3mg, take 1 tablet by mouth at bedtime Insomnia
Insulin glargine yfrn inject 40 units subcutaneous at bedtime DM

14. DME and Supplies:

wheelchair, diabetic supplies, bath bench, walker

15. Safety Measures:

diabetic precautions, ambulates with device, walker precautions, , bathroom safety, activity supervision

16. Nutrition:

diabetic

17. Allergies:

no known allergies

18.A. Functional Limitations

Ambulation

18.B. Activities Permitted

No Restrictions

19. Mental & Pyschosocial Status: COGNITION: 0. Alert/ oriented, able to focus and shift attention, comprehends and recalls task directions independently., ANXIETY: 0. Never, SOCIAL ISOLATION: 0. Never, BEHAVIORAL ISSUES: 7. None of the above behaviors demonstrated, HISTORY OF DEPRESSION: Yes

20. Prognosis: fair

22. A Rehabilitation Potential:

SELF-CARE: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper., MOBILITY: 9. Not Applicable

22.B.Discharge Plans

patient will be responsible for managing treatment

Homebound status:

Due to diagnosis of Type 2 Diabetes Mellitus Without Complications, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.

Clinical Condition Requiring Homecare:

Comprehensive assessment completed for this 75-year-old female referred to home health services following a recent hospital admission and subsequent subacute rehabilitation stay related to poorly controlled diabetes mellitus. The patient is alert and oriented to person, place, time, and situation (AOx4). She reports that prior to hospitalization she experienced worsening depression, discontinued her prescribed medications, and subsequently developed severe hyperglycemia with blood glucose levels reportedly reaching 600 mg/dL. During that period, she sustained a fall resulting in bruising to her left side. She was treated in the hospital and then transferred to a rehabilitation facility. At the time of this assessment, her skin is intact and prior bruising has resolved. Her past medical history is significant for diabetes mellitus, hypomagnesemia, vitamin D deficiency, depression, chronic pain, aortic stenosis status post aortic valve replacement, hypertension, hyperlipidemia, osteoarthritis, heart failure, chronic kidney disease, lymphoma, and chronic low back pain. She currently has an 18 French, 10 mL suprapubic catheter in place, which is managed by her urologist and changed monthly at Kaiser Clinic. Catheter site appears intact without reported complications. The patient reports recent evaluation by her primary care provider, who prescribed magnesium supplementation and benzonatate; however, she has not yet obtained these medications from the pharmacy. She continues to intermittently use an expired supply of benzonatate (expiration date 2025) for cough management. Despite education regarding the risks associated with expired medications and proper disposal recommendations, the patient declined to discard the medication and verbalized her belief that expired medications remain effective. Extensive education was provided regarding medication compliance, risks of using expired medications, the importance of glycemic control, diabetes self-management, safe insulin administration, and suprapubic catheter care. Medication reconciliation was completed. Regarding mental health management, she is currently prescribed bupropion 450 mg orally once daily for depression. The patient acknowledges prior noncompliance but verbalizes understanding of the importance of adhering to her medication regimen. Functionally, prior to hospitalization she primarily utilized a manual wheelchair for independent mobility, with assistance from her niece for instrumental and some basic activities of daily living. She resides alone in a single-story home without steps at the entrance; additional information indicates there are two tenants in the home. Currently, she demonstrates impaired balance and mobility. Objective testing reveals a Tinetti score of 12/28 and a Timed Up and Go (TUG) time of 38.7 seconds, indicating a high risk for falls. She presents with gait dysfunction, lower extremity weakness, transfer deficits, and difficulty with functional mobility, making leaving the home a considerable and taxing effort. Although she owns a walker, she reports rarely using it due to fear of falling and primarily mobilizes via manual wheelchair. The patient is considered homebound due to significant mobility limitations, high fall risk, and need for assistive devices. She demonstrates good rehabilitation potential and is an appropriate candidate for skilled home health services. The plan of care includes skilled nursing for ongoing assessment of medical status, medication management and compliance monitoring, diabetes education and glucose monitoring reinforcement, and catheter care oversight. Skilled physical therapy is recommended to address balance deficits, gait training, strengthening, and transfer training to reduce fall risk and improve functional independence. Ongoing interdisciplinary collaboration will focus on maximizing safety, promoting adherence to medical treatment, and preventing rehospitalization.
 Date of Order 02/23/2026 Orders Physician Face-to-Face Date: 02/18/2026 Clinical Condition Requiring Home Care per Certifying Physician: SN disease management, PT eval and treat, OT eval and treat, SW community resources, HHA daily adl's due to Type 2 <mh class="chrome-extension-FindManyStrings chrome-extension-FindManyStrings-style-12 CE-FMS-Diabetes">Diabetes</mh> Mellitus Without Complications Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home

PARAMETERS FOR PHYSICIAN NOTIFICATION: temperature < 95 > 100.5, heart rate < 50 > 110, respiratory rate < 8 > 22, blood pressure systolic < 90 > 169, blood pressure diastolic < 60 > 90, O2 saturation < 88 > 100, pain < 0 > 5

CAREGIVER: 4. Assistance needed, but no non-agency caregiver(s) available

HOSPITALIZATION RISKS: 7. Currently taking 5 or more medications, 8. Currently reports exhaustion, 9. Other risk(s) not listed in 1- 8

STANDING ORDERS: infection control: hygiene, proper hand washing; advance directive: plan if patient is unable to make healthcare decisions ; fall precautions: wear sensible shoes, remove home hazards, living space adequately lit, assistive devices prn; emergency preparedness: plan for prn evacuation, resumption of home health visits; Assess the patient's incision on post op day 7 and the nurse or physical therapist will remove aquacel dressing leaving OTA; if incision is draining educate pt/pcg on cleaning with normal saline and covering with dry gauze daily and as needed.
Assess/Instruct Pt/Pcg: Ice to ____ x 20 minutes each hour while awake. If cold machine ordered apply 20 minutes on and 20 minutes off for 3-4 times a day.
Assess/Instruct all body systems/vital signs/complications, Blood Pressure; systolic is greater than 169 mm Hg or less than 90 mm Hg; diastolic is greater than 100 mm Hg or less than 55 mm Hg, Clinician to assess comorbidities and report changes in condition to the patient's physician, Pain Rating is greater than 6 on 0-10 scale, Pulse is greater than 110 or less than 50, Respirations are greater than 22 or less than 8, SPO2: is less than 90 % at rest /with exertion, Temperature is greater than 100.5 F or less than 95.0 F, Pain Rating is greater than 6 on 0-10 scale
Implement Fall Prevention Program, Instruct and educate the patient/PCG on wearing compression stockings for the next 4 weeks per discharge instructions.
Instruct the pt/PCG on using the incentive spirometer 10 times every 2 hour while awake.
Provide education content at patient's level of health literacy.
Assess/Instruct Pt/Pcg: Safety measures to prevent injury.
Assess: Musculoskeletal status.
Teach Pt/Pcg to maintain appropriate wt bearing status as ordered by MD, total joint replacement precautions as applicable, Safe stair climbing skills, Safe, effective use of adaptive/assist device
Assess/Instruct Pt/Pcg: Pain management measures; assess pain level, pain medication, rest, body alignment, ROM, meditation, massage.
Pt/Pcg educated in pain management techniques including positioning and relaxation techniques
Instruct Pt/Pcg: Medication actions, uses, frequency, dose, side effects, interactions of all new/change meds, Provide medication education,.
Assess/Instruct Pt/Pcg: Safety measures to prevent injury, Therapeutic Exercise, Transfer Training
Monitor surgical wound for s/s of infection, educate on s/s of concern and infection prevention to promote wound healing.

; Skin Preservation: Measures to prevent skin breakdown; pressure relief, incontinence care, nutrition, hydration ; Pain: Pain management measures; pain medication, rest, body alignment, ROM, meditation, massage ; Medications: Medication actions, uses, frequency, dose, interactions of all new/change meds
Advance Directive:No Advance Directive

PROBLEMS IDENTIFIED ON ASSESSMENT: D0160 - Depression, M2020 - Oral Med Management, M2102c - Med Admin, M2102f - Patient Supervision, M2102d - Caregiver Performs Treatment, M1033 - Exhaustion, M1400 - Dyspnea, abn cholesterol > 200 mg/dL, abnormal BS < 70/140 > mg/dL, M1610 - Urinary Catheter, muscle weakness, Pain Interference with ADLs, balance deficit

PROCEDURES: glucose testing via monitor, catheter change, care & irrigation: Managed by the urologist., catheter change, care & irrigation: Managed by the urologist., catheter change, care & irrigation: Managed by the urologist., teach/coordinate/arrange medication packaging and/or administration

TEACH PATIENT/CAREGIVER: * lifestyle modifications to manage respiratory condition including diet changes and regular exercise strategies to control shortness of breath home remedies to keep lungs healthy, related medication(s) purpose, schedule, * how to maintain a diary to monitor effective and non-effective pain relief including documenting time of pain, rating, precipitating events, medications, treatments, and what works best to relieve pain teach relaxation skills and diversional activities, related medication(s) purpose, schedule, * depression-prevention strategies including avoidance of isolation healthy eating sleeping habits identification of activities that bring pleasure preventive care, related medication(s) purpose, schedule, * urinary catheter management including how to flush catheter change and wash drainage bags prevent infection including proper handwashing positioning of catheter, related medication(s) purpose, schedule, * strategies to minimize fatigue and exhaustion including work simplification energy conservation lifestyle changes diet, related medication(s) purpose, schedule, patient self-administers medications as prescribed, related medication(s) purpose, schedule, patient is adequately supervised, caregiver administers and/or packages medications appropriately, caregiver performs medical/rehabilitation treatments with adequate competence

SN Goals

PATIENT-STATED GOAL: to walk with an assistive devices

GOALS
patient/caregiver recalls
* how to maintain a diary to monitor effective and non-effective pain relief including documenting time of pain, rating, precipitating events, medications, treatments, and what works best to relieve pain
* teach relaxation skills and diversional activities
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* lifestyle modifications to manage respiratory condition including
* diet changes and regular exercise
* strategies to control shortness of breath
* home remedies to keep lungs healthy
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* depression-prevention strategies including avoidance of isolation
* healthy eating
* sleeping habits
* identification of activities that bring pleasure
* preventive care
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* urinary catheter management including how to flush catheter
* change and wash drainage bags
* prevent infection including proper handwashing
* positioning of catheter
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* strategies to minimize fatigue and exhaustion including work simplification
* energy conservation
* lifestyle changes
* diet
* recalls related medication(s) purpose, schedule

patient self-administers medications as prescribed
* recalls related medication(s) purpose, schedule

patient is adequately supervised

caregiver administers and/or packages medications appropriately

caregiver performs medical/rehabilitation treatments with adequate competence
