SN FREQUENCY: SN 1w8 and prn for complications or medication changes

CLINICAL SUMMARY:

Recertification visit completed today. Wife is primary cg and she was also present for visit. SN assessed pt head to toe. Skin is intact. Heart and lungs sounds are normal. Bowel sounds are active x4 quadrants. Per cg pt has good appetite and regular bowel movements. Pt denies pain. No falls since fall approximately a month ago. Per cg pt uses walker to ambulate. The house has stairs so he is not able to use the walker on the stairs. This was one of the places where he had his recent fall. HH Physical therapist is also working with the pt and cg reports this has been helpful. Pt has dementia and requires frequent reminders for safety. Vitals are wnl today. Nurse reviewed medications with pt and normal vital signs. Encouraged cg to obtain bp monitor for use at home. She agreed. Pt should be seeing his kidney doctor in early March. Nurse administerd ozempic injection today 0.25mg subQ in right lower abdomen. Blood sugar also checked by nurse. Procedures well tolerated by pt. Nurse will return next week for another visit.

PARAMETERS FOR PHYSICIAN NOTIFICATION: temperature < 95 > 101, heart rate < 50 > 120, respiratory rate < 12 > 29, blood pressure systolic < 85 > 170, blood pressure diastolic < 50 > 90, O2 saturation < 88 > 100, pain < 0 > 8, blood sugar < 60 > 300

CAREGIVER: 1. Non-agency caregiver(s) currently provide assistance

HOSPITALIZATION RISKS: 1. History of falls (2 or more falls- or any fall with an injury- in the past 12 months), 6. Reported or observed history of difficulty complying with any medical instructions (for example, medications, diet, exercise) in the past 3 months, 7. Currently taking 5 or more medications, 8. Currently reports exhaustion

STANDING ORDERS:

Infection control: hygiene, proper hand washing.;

Advance directive: plan if patient is unable to make healthcare decisions: Living Will;

Fall precautions: wear sensible shoes, remove home hazards, living space adequately lit, assistive devices prn.;

Emergency preparedness: plan for prn evacuation, resumption of home health visits.

PROCEDURES:

ozempic injecion administered to pt subQ weekly (0.25 mg),

glucose testing via monitor

TEACH PATIENT/CAREGIVER: * lifestyle modifications to manage cardiac condition including symptom management diet changes regular exercise getting enough sleep, related medication(s) purpose, schedule, * management of mental health condition including joining a peer group maintaining regular contact with mental health professional avoiding known stressors controlling impulses, related medication(s) purpose, schedule, * diabetic medication management blood sugar testing diabetic foot care exercise diabetic diet, related medication(s) purpose, schedule, * strategies to minimize fatigue and exhaustion including work simplification energy conservation lifestyle changes diet, related medication(s) purpose, schedule, patient self-administers medications as prescribed, related medication(s) purpose, schedule

PATIENT-STATED GOAL: blood sugar checks, ozempic injection

GOALS
patient self-administers medications as prescribed
