19. Mental & Pyschosocial Status: COGNITION: 0. Alert/ oriented, able to focus and shift attention, comprehends and recalls task directions independently., ANXIETY: 0. Never, SOCIAL ISOLATION: 0. Never, BEHAVIORAL ISSUES: 7. None of the above behaviors demonstrated, HISTORY OF DEPRESSION: No					
20. Prognosis: good					
22. A Rehabilitation Potential: SELF-CARE: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper., MOBILITY: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper.				22.B.Discharge Plans family/caregiver will be responsible for managing treatment	
Homebound status: Due to diagnosis of Cellulitis Of Buttock, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.					
Clinical Condition <div>The patient is a 94-year-old male with a significant past medical history of atrial fibrillation (previously managed with anticoagulation), congestive heart failure, hypertension, hyperlipidemia, and chronic anemia, who was hospitalized for generalized weakness and subsequently diagnosed with methicillin-sensitive Staphylococcus aureus (MSSA) bacteremia secondary to right gluteal cellulitis. Repeat blood cultures obtained during hospitalization were negative. Infectious Disease consultation recommended intravenous cefazolin 2 grams every 8 hours to be continued through 02/18/2026 via midline/PICC access, with repeat blood cultures planned one week after completion of antibiotic therapy. The hospital course was complicated by atrial fibrillation with rapid ventricular response; Cardiology was consulted, and the patient was maintained on metoprolol 100 mg twice daily with the addition of digoxin 125 mcg daily for improved rate control. The admission was further complicated by symptomatic anemia with low hemoglobin, requiring transfusion of two units of packed red blood cells. Anticoagulation therapy (Pradaxa) was held due to anemia. Hemoglobin stabilized prior to discharge, and a repeat complete blood count is scheduled for 02/20/2026 at the GBMC laboratory. If hemoglobin remains stable, anticoagulation may be resumed per primary care provider and cardiology recommendations. During hospitalization, the patient was also diagnosed with a left lower extremity deep vein thrombosis. Due to the temporary contraindication to anticoagulation, an inferior vena cava filter was placed. Additionally, computed tomography imaging incidentally revealed a 4 4 1.5 cm mass in the head of the pancreas. Gastroenterology evaluated the patient and did not recommend further inpatient workup; outpatient follow-up was advised for further assessment. The patient resides alone in a single-family home; however, his daughter and two sons-in-law are currently providing around-the-clock assistance, including administration of intravenous antibiotic infusions. He ambulates with a walker and requires one-person assistance for mobility. He has a single-lumen PICC line in the left upper arm with the dressing intact and the window seal uncompromised. An extension tubing was applied to facilitate ease of antibiotic administration. Skilled nursing provided education and hands-on demonstration regarding PICC line care, including proper flushing technique before and after antibiotic infusion and final heparin lock administration. The daughter and sons-in-law successfully performed return demonstration of IV antibiotic administration using aseptic technique. Antibiotic infusions require approximately six minutes per dose. The last PICC dressing change was completed on 02/13, with the next scheduled dressing change on 02/20. Follow-up blood cultures are planned at the Infectious Disease appointment one week after antibiotic completion. The patient has no known drug allergies and is designated as full code, with a MOLST form on file. The current plan of care includes completion of intravenous cefazolin therapy through 02/18/2026,					
23. Signature and Date of Verbal SOC Where Applicable: Electronically Signed by Messick, Charles RN on 02/14/2026				25. Date HHA Received Signed POT

SN Careplans

SN WK1: 1 (02/14/26-02/14/26) ,WK2: 1 (02/15/26-02/21/26) ,WK3: 2 (02/22/26-02/28/26) ,WK4: 1 (03/01/26-03/07/26) ,WK5: 1 (03/08/26-03/14/26) ,WK6: 1 (03/15/26-03/21/26) ,WK7: 1 (03/22/26-03/28/26) ,WK8: 1 (03/29/26-04/04/26)

PARAMETERS FOR PHYSICIAN NOTIFICATION: temperature < 95 > 100.5, heart rate < 50 > 110, respiratory rate < 8 > 22, blood pressure systolic < 90 > 169, blood pressure diastolic < 60 > 90, O2 saturation < 88 > 100, pain < 0 > 5

CAREGIVER: 2. Non-agency caregiver(s) need training/supportive services to provide assistance

HOSPITALIZATION RISKS: 3. Multiple hospitalizations (2 or more) in the past 6 months, 4. Multiple emergency department visits (2 or more) in the past 6 months, 7. Currently taking 5 or more medications, 8. Currently reports exhaustion

STANDING ORDERS: infection control: hygiene, proper hand washing; advance directive: plan if patient is unable to make healthcare decisions ; fall precautions: wear sensible shoes, remove home hazards, living space adequately lit, assistive devices prn; emergency preparedness: plan for prn evacuation, resumption of home health visits; Assess the patient's incision on post op day 7 and the nurse or physical therapist will remove aquacel dressing leaving OTA; if incision is draining educate pt/pcg on cleaning with normal saline and covering with dry gauze daily and as needed. Assess/Instruct Pt/Pcg: Ice to ____ x 20 minutes each hour while awake. If cold machine ordered apply 20 minutes on and 20 minutes off for 3-4 times a day. Assess/Instruct all body systems/vital signs/complications, Blood Pressure; systolic is greater than 169 mm Hg or less than 90 mm Hg; diastolic is greater than 100 mm Hg or less than 55 mm Hg, Clinician to assess comorbidities and report changes in condition to the patient's physician, Pain Rating is greater than 6 on 0-10 scale, Pulse is greater than 110 or less than 50, Respirations are greater than 22 or less than 8, ~~S~~O2: is less than 90 % at rest /with exertion, Temperature is greater than 100.5 F or less than 95.0 F, Pain Rating is greater than 6 on 0-10 scale Implement Fall Prevention Program, Instruct and educate the patient/PCG on wearing compression stockings for the next 4 weeks per discharge instructions. Instruct the pt/PCG on using the incentive spirometer 10 times every 2 hour while awake. Provide education content at patient's level of health literacy. Assess/Instruct Pt/Pcg: Safety measures to prevent injury. Assess: Musculoskeletal status. Teach Pt/PCg to maintain appropriate wt bearing status as ordered by MD, total joint replacement precautions as applicable, Safe stair climbing skills, Safe, effective use of adaptive/assist device Assess/Instruct Pt/Pcg: Pain management measures; assess pain level, pain medication, rest, body alignment, ROM, meditation, massage. Pt/PCg educated in pain management techniques including positioning and relaxation techniques Instruct Pt/PCg: Medication actions, uses, frequency, dose, side effects, interactions of all new/change meds, Provide medication education,. Assess/Instruct Pt/Pcg: Safety measures to prevent injury, Therapeutic Exercise, Transfer Training Monitor surgical wound for s/s of infection, educate on s/s of concern and infection prevention to promote wound healing.

; Skin Preservation: Measures to prevent skin breakdown; pressure relief, incontinence care, nutrition, hydration ; Pain: Pain management measures; pain medication, rest, body alignment, ROM, meditation, massage ; Medications: Medication actions, uses, frequency, dose, interactions of all new/change meds Advance Directive:Living Will

PROBLEMS IDENTIFIED ON ASSESSMENT: M2020 - Oral Med Management, M2102c - Med Admin, M2102f - Patient Supervision, M2102d - Caregiver Performs Treatment, M1033 - Exhaustion, M1400 - Dyspnea, muscle weakness, limited strength, limited endurance, difficulty sleeping, daytime fatigue, balance deficit, B0200 - Hearing Deficit

PROCEDURES: Infusion Therapy: Cellulitis of Right Buttock IV Cefazolin 2 gram every 8 hours, End of Therapy 2/1/2026 For mid-Line NS 3-5 mL pre/post use 5mL pre lab draw and 10 mL post lab draw Heparin (10units .mL) 3 mL post draw dressing change 2/20/26 Plan for repeat blood cultures one week after completion of antibiotics will be done at patients follow up appointment with infectious disease, Infusion Therapy: Cellulitis of Right Buttock IV Cefazolin 2 gram every 8 hours, End of Therapy 2/1/2026 For mid-Line NS 3-5 mL pre/post use 5mL pre lab draw and 10 mL post lab draw Heparin (10units .mL) 3 mL post draw dressing change 2/20/26, cough/deep breathing exercises, incentive spirometer, teach/coordinate/arrange medication packaging and/or administration, coordinate/arrange home modifications for hearing impaired, i.e. alarms

TEACH PATIENT/CAREGIVER: * lifestyle modifications to manage respiratory condition including diet changes and regular exercise strategies to control shortness of breath home remedies to keep lungs healthy, related medicatio, * strategies to minimize fatigue and exhaustion including work simplification energy conservation lifestyle changes diet, related medication(s) purpose, schedule, *

SN Goals

PATIENT-STATED GOAL: Patient states he wants to finish his antibiotics so he can go have a beer with his son in-law and go to the race track.

GOALS

patient/caregiver recalls

- * lifestyle modifications to manage respiratory condition including
- * diet changes and regular exercise
- * strategies to control shortness of breath
- * home remedies to keep lungs healthy
- * recalls related medicatio

patient self-administers medications as prescribed

- * recalls related medication(s) purpose, schedule

caregiver administers and/or packages medications appropriately

patient/caregiver recalls

- * how to keep home safe for hearing-impaired including installing special fire-detector/CO2 alarms
- * recalls related medication(s) purpose, schedule

patient/caregiver recalls

- * strategies to minimize fatigue and exhaustion including work simplification
- * energy conservation
- * lifestyle changes
- * diet
- * recalls related medication(s) purpose, schedule
