SELF-CARE: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper., MOBILITY: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper.

22.B.Discharge Plans

patient will be responsible for managing treatment

Homebound status:

Due to diagnosis of Essential (primary) hypertension, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.

Clinical Condition Requiring Homecare:

The patient is a 73-year-old female who is alert and oriented to person, place, and time, and ambulates with an assistive device without voiced complaints. She has a significant past medical history of hypertension, hyperlipidemia, diabetes mellitus, cerebrovascular accident with memory loss, dementia, and neurocognitive disorder, and was recently hospitalized due to dizziness of unknown etiology. Prior to hospitalization, she was independent with mobility without the use of an assistive device. Currently, she demonstrates intact lower extremity strength (4/5 MMT) and scored 10 repetitions on the 30-second chair rise test; however, her primary limitation is impaired balance, requiring supervision for transfers and contact guard assistance for short-distance ambulation, particularly during turns. She also presents with bilateral upper extremity weakness (4-/5 MMT). Functionally, she is independent with toileting hygiene and transfers, performs bathing at the sink due to inability to safely access the tub, and requires standby assistance for upper and lower body dressing while seated. The patient lives alone in an apartment and experienced the loss of her husband two years ago. She would benefit from skilled physical therapy services to address balance deficits and improve safety and independence in functional mobility in order to return to her prior level of function.<o:p></o:p> <o:p> </o:p> Bottom of Form<o:p></o:p> <o:p> </o:p> Date of Order<o:p></o:p> 03/07/2026
