14. DME and Supplies: rolling walker, bath bench, hand held shower, diabetic supplies, commode, grab bars, walker, 4 wheeled walker				15. Safety Measures: walker precautions, smoke detectors , , , diabetic precautions, , ambulates with device, ambulates with assistance, emergency phone # clearly displayed, supervision at all times, transfer with assist, , cardiac precautions, bathroom safety, activity supervision	
16. Nutrition: diabetic				17. Allergies: bupropion celebrex crestor invokana januvia lasix lipitor losartan motrin prasugi	
18.A. Functional Limitations Ambulation, Bowel/Bladder Incontinence, Endurance				18.B. Activities Permitted Up As Tolerated, Exercises Prescribed, Walker	
19. Mental & Pyschosocial Status: COGNITION: 0. Alert/ oriented, able to focus and shift attention, comprehends and recalls task directions independently., ANXIETY: 0. Never, SOCIAL ISOLATION: 0. Never, BEHAVIORAL ISSUES: 7. None of the above behaviors demonstrated, HISTORY OF DEPRESSION: No					
20. Prognosis: good					
22. A Rehabilitation Potential: SELF-CARE: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities., MOBILITY: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities.				22.B.Discharge Plans patient will be responsible for managing treatment patient will be responsible for managing treatment family/caregiver will be responsible for managing treatment	
Homebound status: After undergoing Left Total Hip Arthroplasty, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.					
Clinical Condition Requiring Homecare: <div>The patient is a 79-year-old female status post left total hip arthroplasty performed on 02/11/2026, with a past medical history significant for advanced osteoarthritis affecting the knees and contralateral hip, which previously limited mobility. Her postoperative course has been complicated by persistent pain and decreased functional mobility. The patient has an extensive allergy profile including Bupropion, Celebrex, Crestor, Invokana, Januvia, Lasix, Lipitor, Losartan, Motrin, Prasugrel, Repaglinide, statins (general class), sulfa drugs, tetracycline, vitamin D, Vytorin, and Zetia. She resides alone in a second-floor apartment requiring navigation of multiple steps and receives assistance from a paid aide approximately 20 hours per week. Prior to hospitalization, the patient regularly attended an adult medical daycare, where she also received daily insulin administration; however, she is currently homebound due to inability to safely manage stairs. Her insulin has been delivered to the home, and she will require education and training for self-administration. The patient is a full code, and all prescribed medications are available in the home. She is primarily Russian-speaking but is able to communicate in English as a second language. At present, the patient ambulates with a walker and requires one-person assistance. Physical therapy evaluation reveals significant deficits in strength and mobility, with manual muscle testing of the left lower extremity graded at 2-/5, limited by pain and adherence to hip precautions. She demonstrates decreased range of motion and strength in the left shoulder as well. The patient requires contact guard assistance for transfers and short-distance ambulation using a rollator. Prior to surgery, she was independent with indoor ambulation using a rollator and utilized a single-point cane for stair negotiation. During therapy, she was instructed in seated therapeutic exercises and demonstrated the ability to follow instructions; a written home exercise program was provided. Functionally, the patient requires contact guard assistance for sit-to-stand transfers, particularly from low surfaces. She requires maximal assistance for lower body dressing and is able to complete upper body dressing with setup assistance. She is able to perform toilet transfers with contact guard assistance using the bathroom counter for support, and adaptive equipment is available, including a chair for tub transfers. Given her current functional limitations, pain, and environmental barriers, the patient will require ongoing skilled physical therapy to improve strength, range of motion, and safety with mobility in order to progress toward her prior level of function. Additionally, extensive education is required regarding diabetes management, including insulin self-administration, pain management strategies, and home safety to reduce fall risk and support independence.</div><div> </div><div>Date of Order</div><div>03/17/2026</div><div>Orders</div><div>Physician Face-to-Face Date: 02/16/2026</div><div>Clinical Condition Requiring Home Care per Certifying Physician: Skilled Nursing, Physical Therapy, and Occupational Therapy for Strengthening Exercises and Evaluate due to Left Total Hip Arthroplasty</div><div>Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home</div><div> </div><div><div>1 - SOC - SN Notes: soc</div><div>PT Eval Notes:</div><div>OT Eval Notes:</div><div>Physician</div><div>Ilori, Oludolapo</div>

SN WK1: 2 (03/17/26-03/21/26) ,WK2: 2 (03/22/26-03/28/26) ,WK3: 1 (03/29/26-04/04/26) ,WK4: 1 (04/05/26-04/11/26) ,WK5: 1 (04/12/26-04/18/26) ,WK6: 1 (04/19/26-04/25/26)			PATIENT-STATED GOAL: I want to learn how to give myself my own insulin with my insulin pen.		
PARAMETERS FOR PHYSICIAN NOTIFICATION: temperature < 95 > 100.5, heart rate < 50 > 110, respiratory rate < 8 > 22, blood pressure systolic < 90 > 169, blood pressure diastolic < 60 > 90, O2 saturation < 88 > 100, pain < 0 > 5			GOALS patient/caregiver recalls * lifestyle modifications to manage respiratory condition including * diet changes and regular exercise * strategies to control shortness of breath * home remedies to keep lungs healthy * recalls related medication(s) purpose, schedule		
CAREGIVER: 2. Non-agency caregiver(s) need training/supportive services to provide assistance			patient/caregiver recalls * how to maintain a diary to monitor effective and non-effective pain relief including documenting time of pain, rating, precipitating events, medications, treatments, and what works best to relieve pain * teach relaxation skills and diversional activities * recalls related medication(s) purpose, schedule		
HOSPITALIZATION RISKS: 1. History of falls (2 or more falls - or any fall with an injury - in the past 12 months), 6. Reported or observed history of difficulty complying with any medical instructions (for example, medications, diet, exercise) in the past 3 months, 7. Currently taking 5 or more medications			patient/caregiver recalls * urinary incontinence management including bladder training * Kegel exercises * skin care * recalls related medication(s) purpose, schedule		
STANDING ORDERS: infection control: hygiene, proper hand washing; advance directive: plan if patient is unable to make healthcare decisions ; fall precautions: wear sensible shoes, remove home hazards, living space adequately lit, assistive devices prn; emergency preparedness: plan for prn evacuation, resumption of home health visits; Assess the patient's incision on post op day 7 and the nurse or physical therapist will remove aquacel dressing leaving OTA; if incision is draining educate pt/pcg on cleaning with normal saline and covering with dry gauze daily and as needed. Assess/Instruct Pt/PCg: Ice to ____ x 20 minutes each hour while awake. If cold machine ordered apply 20 minutes on and 20 minutes off for 3-4 times a day. Assess/Instruct all body systems/vital signs/complications, Blood Pressure; systolic is greater than 169 mm Hg or less than 90 mm Hg; diastolic is greater than 100 mm Hg or less than 55 mm Hg, Clinician to assess comorbidities and report changes in condition to the patient's physician, Pain Rating is greater than 6 on 0-10 scale, Pulse is greater than 110 or less than 50, Respirations are greater than 22 or less than 8, SPO2: is less than 90 % at rest /with exertion, Temperature is greater than 100.5 F or less than 95.0 F, Pain Rating is greater than 6 on 0-10 scale Implement Fall Prevention Program, Instruct and educate the patient/PCG on wearing compression stockings for the next 4 weeks per discharge instructions. Instruct the pt/PCG on using the incentive spirometer 10 times every 2 hour while awake. Provide education content at patient's level of health literacy. Assess/Instruct Pt/PCg: Safety measures to prevent injury. Assess: Musculoskeletal status. Teach Pt/PCg to maintain appropriate wt bearing status as ordered by MD, total joint replacement precautions as applicable, Safe stair climbing skills, Safe, effective use of adaptive/assist device Assess/Instruct Pt/PCg: Pain management measures; assess pain level, pain medication, rest, body alignment, ROM, meditation, massage. Pt/PCg educated in pain management techniques including positioning and relaxation techniques Instruct Pt/PCg: Medication actions, uses, frequency, dose, side effects, interactions of all new/change meds, Provide medication education,. Assess/Instruct Pt/PCg: Safety measures to prevent injury, Therapeutic Exercise, Transfer Training Monitor surgical wound for s/s of infection, educate on s/s of concern and infection prevention to promote wound healing.			patient self-administers medications as prescribed * recalls related medication(s) purpose, schedule		
; Skin Preservation: Measures to prevent skin breakdown; pressure relief, incontinence care, nutrition, hydration ; Pain: Pain management measures; pain medication, rest, body alignment, ROM, meditation, massage ; Medications: Medication actions, uses, frequency, dose, interactions of all new/change meds Advance Directive:POLST (Physician Orders for Life-Sustaining Treatment)			caregiver administers and/or packages medications appropriately		
PROBLEMS IDENTIFIED ON ASSESSMENT: M2020 - Oral Med Management, M2102c - Med Admin, M2102f - Patient Supervision, M2102d - Caregiver Performs Treatment, M1400 - Dyspnea, M1610 - Urinary Incontinence, limited strength, muscle weakness, limited endurance, Pain Effect on Sleep, Pain Interference with ADLs, daytime fatigue, balance deficit					
PROCEDURES: incentive spirometer, bladder training, teach/coordinate/arrange medication packaging and/or administration					
TEACH PATIENT/CAREGIVER: * lifestyle modifications to manage respiratory condition including diet changes and regular exercise strategies to control shortness of breath home remedies to keep lungs healthy, related medication(s) purpose, schedule, * how to maintain a diary to monitor effective and non-effective pain relief including documenting time of pain, rating, precipitating events, medications, treatments, and what works best to relieve pain teach relaxation skills and diversional activities, related medication(s) purpose, schedule, * urinary incontinence management including bladder training Kegel exercises skin care, related medication(s) purpose, schedule, patient self-administers medications as prescribed, related medication(s) purpose, schedule, caregiver administers and/or packages medications appropriately
