Z79.891	Long term (current) use of opiate analgesic	05/02/26

10. Medications: Dose/Frequency/Route (N)ew (C)hanged

ALLOPURINOL 100 mg/tablet / Give 2.5 tablet by mouth one time a day for Gout GOUT
Carvedilol - Carvedilol 12.5 mg tablet by mouth every 12 hours for HTN
Colchicine - Colchicine 0.6 mg capsule by mouth once a day every 24 hours as needed for Gout
Gabarone 100 mg tablet by mouth every 8 hours for Neuropathy
LACTULOSE 20gm/packet Oral Solution 20 GM/30ML / Give 30 ml by mouth at bedtime for constipation hold for loose stool CONSTIPATION
Pantoprazole Sodium - Pantoprazole Sodium Delayed Release 40 mg tablet by mouth two times a day for GERD GERD
Sennosides - Senna 8.6 mg/tablet / Give 2 tablet by mouth twice a day for constipation
SIMVASTATIN 40 mg 40 mg tablet by mouth at bedtime for HLD HLD
TORSEMIDE 20 mg 20 mg tablet by mouth two times a day for CHF CHF
Sertraline Hcl - Sertraline Hydrochloride 50 mg tablet by mouth one time a day for Depression DEPRESSION
Empagliflozin 10 mg tablet by mouth once a day for DM
Albuterol Sulfate - Albuterol Sulfate 0 Inhalation Nebulization Solution / 3 ml inhale by mouth every 6 hours as needed for Wheezing/SOB SOB
Fluticasone-Salmeterol Inhalation Aerosol Powder Breath Activated 100-50 MCG/ACT / 1 inhalation by mouth twice a day for SOB/Wheezing Rinse and spit after use
Oxycodone-Acetaminophen 5-325 mg / 1 Tablet by mouth every 8 hours as needed for Pain PAIN
Flonase Allergy Relief - Fluticasone Propionate 50 MCG/ACT / 1 spray in both nostrils twice a day for allergy
Semaglutide Subcutaneous Solution Pen Injector 2 MG/3ML / Inject 0.5 mg; 16 UNITS subcutaneous at bedtime every Sun for DM
Insulin Glargine Subcutaneous Solution 100 UNIT/ML / Inject 16 units subcutaneous every 12 hours for DM

14. DME and Supplies:

diabetic supplies, urinary/catheter supplies, wheelchair, hospital bed, wound care supplies, commode, HOYER LIFT

15. Safety Measures:

wheelchair precautions, standard precautions, fall precautions, diabetic precautions, medication safety, transfer with assist, supervision at all times, sharps precautions, activity supervision

16. Nutrition:

cardiac diet, diabetic,

17. Allergies:

no known allergies

18.A. Functional Limitations

Endurance, Bowel/Bladder Incontinence, Ambulation

18.B. Activities Permitted

Wheelchair, Up As Tolerated, Transfer bed/Chair, Exercises Prescribed

19. Mental & Pyschosocial Status: COGNITION: 2. Requires assistance and some direction in specific situations (for example, on all tasks involving shifting of attention) or consistently requires low stimulus environment due to distractibility, ANXIETY: 1. In new or complex situations only, SOCIAL ISOLATION: 0. Never, BEHAVIORAL ISSUES: 1. Memory deficit: failure to recognize familiar persons/places, inability to recall events of past 24 hours, significant memory loss so that supervision is required, HISTORY OF DEPRESSION: Yes

20. Prognosis: fair

22. A Rehabilitation Potential:

SELF-CARE: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities., MOBILITY: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities.

22.B.Discharge Plans

another facility/provider will be responsible for managing treatment
family/caregiver will be responsible for managing treatment

Homebound status: Due to diagnosis of Hypertensive heart and chronic kidney disease with heart failure and stage 1 through stage 4 chronic kidney disease, or unspecified chronic kidney disease, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.

Clinical Condition Requiring Homecare: The patient was recently hospitalized with diagnoses of cardiomyopathy with newly reduced ejection fraction, hypertensive emergency, acute kidney injury (AKI), intermittent chest pain, and shortness of breath. Additional recent hospitalization diagnoses include transient hypoxemia, hyperglycemia, neuropathic lower extremity pain, and arterial heel and ankle wounds. Past medical history is significant for arterial vascular disease, congestive heart failure (CHF), type 2 diabetes mellitus, gout, hyperlipidemia, essential hypertension, atrial fibrillation, chronic kidney disease stage 3, morbid obesity, chronic pain, and urinary incontinence. Skilled nursing services were initiated with planned frequency of 1 visit weekly for 1 week, followed by 2 <mh class="chrome-extension-FindManyStrings chrome-extension-FindManyStrings-style-6 CE-FMS-visits">visits</mh> weekly for 2 weeks, then 1 visit weekly for 3 weeks. Physical and occupational therapy evaluations and treatment were also ordered. Spouse assists with activities of daily living (ADLs) and instrumental activities of daily living (IADLs) as needed. During the skilled nursing assessment, the patient was alert and oriented 3, pleasant, and able to participate appropriately in the visit. Patient denied current shortness of breath or chest pain at the time of assessment. Lung sounds were clear throughout all lung fields with

23. Signature and Date of Verbal SOC Where Applicable:

Electronically Signed by Messick, Charles RN on 05/02/2026

25. Date HHA Received Signed POT

24. Physician's Name and Address

Nigussie Geleta
12500 Willowbrook Rd
Cumberland, MD 21502
PHONE: FAX: NPI: 1194088302

26. I certify/recertify that this patient is confined to his/her home and needs intermittent skilled nursing care, physical therapy and/or speech therapy or continues to need occupational therapy. The patient is under my care, and I have authorized the services on this plan of care and will periodically review the plan.

F2F date : 04/29/2026

27. Attending Physician's Signature and Date Signed : Date of physician last face-to-face

28. Anyone who misrepresents, falsifies, or conceals essential information required for payment of Federal funds may be subject to fine, imprisonment, or civil penalty under applicable Federal laws.

Home Health Certification and Plan of Care

Order ID: 1150/18433

1. Patient s HI claim No.	2. Start Of Care Date	3. Certification Period	4. Medical Record No.	5. Provider No.
99128763	05/02/2026	From: 05/02/2026 To: 06/30/2026	25417	217058

6. Patient's Name and Address	7. Provider's Name, Address and Telephone Number
Joseph Polanka 4802 Wendel Ave, Baltimore, MD 21206- 443-762-0314	HomeCentris Healthcare LLC 10 Crossroads Drive, Suite 102 Owings Mills, MD 21117-8284 410-321-8448 1487113239

no acute respiratory distress noted. Patient reported good appetite, and last bowel movement occurred today. Decreased endurance and activity tolerance were noted; however, patient was not utilizing an assistive device at the time of assessment. Medication reconciliation and review were completed, including discussion of medication names, dosages, frequencies, purposes, and pertinent side effects. Skilled nursing initiated disease process education related to cardiomyopathy, congestive heart failure management, and blood pressure monitoring. Patient and spouse were instructed on the importance of daily weight monitoring, adherence to prescribed medications, energy conservation techniques, and recognizing symptoms requiring physician or nursing notification, including worsening shortness of breath, chest pain, sudden weight gain, edema, dizziness, or uncontrolled blood pressure. Patient and spouse verbalized understanding of all teaching provided. Occupational therapy evaluation revealed significant functional decline following recent hospitalization. Patient is currently residing in a personal care home, though previously lived with her son in a single-family home with four steps to enter and a first-floor setup. Prior to hospitalization, the patient was reportedly independent with basic self-care tasks, functional transfers, and functional ambulation. Current assessment demonstrated decreased standing balance, standing tolerance, sitting balance, sitting tolerance, bilateral upper extremity strength, and overall activity tolerance, resulting in impaired performance with self-care activities, functional transfers, and ambulation tasks. These deficits significantly impact the patient's ability to safely perform daily activities and return to prior level of function. Skilled occupational therapy services are medically necessary to address strengthening, balance training, endurance, functional mobility, safety awareness, adaptive techniques, and self-care retraining to maximize independence and reduce risk of further decline or rehospitalization. Ongoing skilled nursing and therapy services remain indicated for cardiopulmonary monitoring, disease management education, medication management, wound monitoring, endurance training, fall prevention, and restoration of functional independence to the highest achievable level.
 Date of Order 05/02/2026 Orders Physician Face-to-Face Date: 04/29/2026 Clinical Condition Requiring Home Care per Certifying Physician: sn-disease management pt-eval & treat ot-eval & treat hha-adl's due to Hypertensive heart and chronic kidney disease with heart failure and stage 1 through stage 4 chronic kidney disease, or unspecified chronic kidney disease Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home

PARAMETERS FOR PHYSICIAN NOTIFICATION: temperature < 95 > 100.5, heart rate < 50 > 110, respiratory rate < 8 > 22, blood pressure systolic < 90 > 169, blood pressure diastolic < 60 > 90, O2 saturation < 88 > 100, pain < 0 > 5

CAREGIVER: 1. Non-agency caregiver(s) currently provide assistance

HOSPITALIZATION RISKS: 3. Multiple hospitalizations (2 or more) in the past 6 months, 7. Currently taking 5 or more medications, 8. Currently reports exhaustion, 9. Other risk(s) not listed in 1- 8

STANDING ORDERS: infection control: hygiene, proper hand washing; advance directive: plan if patient is unable to make healthcare decisions ; fall precautions: wear sensible shoes, remove home hazards, living space adequately lit, assistive devices prn; emergency preparedness: plan for prn evacuation, resumption of home health visits; Assess the patient's incision on post op day 7 and the nurse or physical therapist will remove aquacel dressing leaving OTA; if incision is draining educate pt/pcg on cleaning with normal saline and covering with dry gauze daily and as needed.
Assess/Instruct Pt/Pcg: Ice to ____ x 20 minutes each hour while awake. If cold machine ordered apply 20 minutes on and 20 minutes off for 3-4 times a day.
Assess/Instruct all body systems/vital signs/complications, Blood Pressure; systolic is greater than 169 mm Hg or less than 90 mm Hg; diastolic is greater than 100 mm Hg or less than 55 mm Hg, Clinician to assess comorbidities and report changes in condition to the patient's physician, Pain Rating is greater than 6 on 0-10 scale, Pulse is greater than 110 or less than 50, Respirations are greater than 22 or less than 8, SPO2: is less than 90 % at rest /with exertion, Temperature is greater than 100.5 F or less than 95.0 F, Pain Rating is greater than 6 on 0-10 scale
Implement Fall Prevention Program, Instruct and educate the patient/PCG on wearing compression stockings for the next 4 weeks per discharge instructions.
Instruct the pt/PCG on using the incentive spirometer 10 times every 2 hour while awake.
Provide education content at patient's level of health literacy.
Assess/Instruct Pt/Pcg: Safety measures to prevent injury.
Assess: Musculoskeletal status.
Teach Pt/Pcg to maintain appropriate wt bearing status as ordered by MD, total joint replacement precautions as applicable, Safe stair climbing skills, Safe, effective use of adaptive/assist device
Assess/Instruct Pt/Pcg: Pain management measures; assess pain level, pain medication, rest, body alignment, ROM, meditation, massage.
Pt/Pcg educated in pain management techniques including positioning and relaxation techniques
Instruct Pt/Pcg: Medication actions, uses, frequency, dose, side effects, interactions of all new/change meds, Provide medication education,.
Assess/Instruct Pt/Pcg: Safety measures to prevent injury, Therapeutic Exercise, Transfer Training
Monitor surgical wound for s/s of infection, educate on s/s of concern and infection prevention to promote wound healing.

; Skin Preservation: Measures to prevent skin breakdown; pressure relief, incontinence care, nutrition, hydration ; Pain: Pain management measures; pain medication, rest, body alignment, ROM, meditation, massage ; Medications: Medication actions, uses, frequency, dose, interactions of all new/change meds
Advance Directive:MOLST form on file

PROBLEMS IDENTIFIED ON ASSESSMENT: M1700 - Cognition, M1745 - Behavioral Issues, D0160 - Depression, meal preparation, M2020 - Oral Med Management, dependent edema, M1400 - Dyspnea, M1033 - Exhaustion, M1620 - Bowel Incontinence, M1610 - Urinary Incontinence, muscle weakness, limited range of motion, limited strength, limited endurance, weak hand grips, #3 - Other - Other - RIGHT ANKLE - , #2 - Other - Other - LEFT ANKLE - , #1 - Other - Posterior Right Heel - , rough/scaly/cracked skin

SN Goals

PATIENT-STATED GOAL: family has hopes of patient to walk again

GOALS
patient/caregiver recalls
* depression-prevention strategies including avoidance of isolation
* healthy eating
* sleeping habits
* identification of activities that bring pleasure
* preventive care
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* lifestyle modifications to manage respiratory condition including
* diet changes and regular exercise
* strategies to control shortness of breath
* home remedies to keep lungs healthy
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* how to keep home safe for patient with dementia
* coping strategies for the caregiver* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* management of mental health condition including joining a peer group
* maintaining regular contact with mental health professional
* avoiding known stressors
* controlling impulses
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* how to achieve wound healing including cleaning and dressing wound
* position changes
* skin care
* diet modification
* record wound measurements
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* bowel incontinence management including dietary changes
* bowel training
* skin care
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* urinary incontinence management including bladder training
* Kegel exercises
* skin care
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* strategies to minimize fatigue and exhaustion including work simplification
* energy conservation
* lifestyle changes
* diet
* recalls related medication(s) purpose, schedule
