day for foot infection x 10 days
Doxycycline - Doxycycline Hyclate eq 100 mg base 1 tablet by mouth twice a day for foot infection x 10 days

14. DME and Supplies:	15. Safety Measures:
diabetic supplies, bath bench, wheelchair, walker, cane, 4 wheeled walker	anticoagulant precautions, infectious material management, bleeding precautions, diabetic precautions, fall precautions, sharps precautions, walker precautions, standard precautions, wheelchair precautions, smoke detectors , medication safety, cardiac precautions, bathroom safety, ambulates with device

16. Nutrition:	17. Allergies:
diabetic, cardiac diet	no known allergies

18.A. Functional Limitations	18.B. Activities Permitted
Ambulation, Endurance	Up As Tolerated, Walker, Wheelchair

19. Mental & Pyschosocial Status: COGNITION: 0. Able to get to and from the toilet and transfer independently with or without a device., ANXIETY: 0. Never, SOCIAL ISOLATION: , BEHAVIORAL ISSUES: , HISTORY OF DEPRESSION:

20. Prognosis: fair

22. A Rehabilitation Potential:	22.B.Discharge Plans
SELF-CARE: , MOBILITY:	patient will be responsible for managing treatment

Homebound status: homebound due to generalized weakness, chronic pain and dependence on assistive device to ambulate

Clinical Condition Requiring Homecare: Diabetic patient with several comorbidities requires SN assessment for cardiopulmonary, neuro, GI/GU, musculoskeletal and integumentary systems, safety with ADLs and fall precautions, medication and diagnoses management and education, ozempic injections weekly and as needed for medication changes or diabetic complications. 5/9/26-5/31/26 Diabetic patient with several comorbidities requires SN assessment for cardiopulmonary, neuro, GI/GU, musculoskeletal and integumentary systems, safety with ADLs and fall precautions, medication and diagnoses management and education, ozempic injections weekly and as needed for medication changes or diabetic complications. 6/1/26-6/30/26 Diabetic patient with several comorbidities requires SN assessment for cardiopulmonary, neuro, GI/GU, musculoskeletal and integumentary systems, safety with ADLs and fall precautions, medication and diagnoses management and education, ozempic injections weekly and as needed for medication changes or diabetic complications. 7/1/26-7/7/26

SN Careplans

SN FREQUENCY: SN 1w8 and prn for medication changes

CLINICAL SUMMARY:

Recertification visit today. Pt had A1C recently (7.7). This is improved. Fasting blood sugar 157 today. PCP visit tomorow. Nurse will contact physician to request orders for recertification. Pt is requesting to be put on ozempic and will need assistance with injections and education related to the medication. Pt disclosed that she was at Valleywise ER overnight on 4/29. She had chest pain. Pt denies chest pain today. Reviewed signs of heart attack with pt. She says she has occasional chest pain. She said her blood pressure was low when she was having the pain. No new medications started. Reviewed discharge summary with pt. Head to toe assessment performed. Skin intact. No new areas of concern identified. Pt denies pain. Nurse will continue to see pt weekly to administer ozempic injection, monitor for side effects or complications and to provide education.

PARAMETERS FOR PHYSICIAN NOTIFICATION: temperature < 95 > 101, heart rate < 50 > 120, respiratory rate < 12 > 29, blood pressure systolic < 85 > 170, blood pressure diastolic < 50 > 90, O2 saturation < 88 > 100, pain < 0 > 8, blood sugar < 60 > 300

CAREGIVER: 1. Non-agency caregiver(s) currently provide assistance

HOSPITALIZATION RISKS: 1. History of falls (2 or more falls- or any fall with an injury- in the past 12 months), 3. Multiple hospitalizations (2 or more) in the past 6 months, 8. Currently reports exhaustion

STANDING ORDERS:

Infection control: hygiene, proper hand washing.;

Advance directive: plan if patient is unable to make healthcare decisions. MPOA (daughter and granddaughter);

Fall precautions: wear sensible shoes, remove home hazards, living space adequately lit, assistive devices prn.;

Emergency preparedness: plan for prn evacuation, resumption of home health visits.

PROBLEMS IDENTIFIED ON ASSESSMENT: abnormal blood pressure, chest pain, abnormal BS < 70/140 > mg/dL, muscle weakness, limited strength, limited endurance, extremity burn/tingle/numb, balance deficit, loss of appetite, #1 - Non-Observable Surgical Wound - Anterior Right Foot - right great toenail removed (non-removable dressing in place)

PROCEDURES:

ozempic injecion administered to pt subQ weekly (0.25 mg): administered by RN at nurse visits weekly,

SN Goals

PATIENT-STATED GOAL: improve knowledge of medical diagnosis and improved diabetic compliance

GOALS
patient/caregiver recalls
* how to maintain a diary to monitor effective and non-effective pain relief including documenting time of pain, rating, precipitating events, medications, treatments, and what works best to relieve pain
* teach relaxation skills and diversional activities
* recalls related medication(s) purpose, schedule

patient self-administers medications as prescribed
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* diabetic medication management
* blood sugar testing
* diabetic foot care
* exercise
* diabetic diet
* recalls related medication(s) purpose, schedule

patient/caregiver recalls
* lifestyle modifications to manage respiratory condition including
* diet changes and regular exercise
* strategies to control shortness of breath
* home remedies to keep lungs healthy
* recalls related medication(s) purpose, schedule
