Never, BEHAVIORAL ISSUES: 7. None of the above behaviors demonstrated, HISTORY OF DEPRESSION: No				18.B. Activities Permitted Up As Tolerated	
20. Prognosis: fair					
22. A Rehabilitation Potential: SELF-CARE: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper., MOBILITY: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper.				22.B.Discharge Plans patient will be responsible for managing treatment	
Homebound status: Patient homebound due to generalized weakness and recent surgeries					
Clinical Condition Patient with recent history of multiple surgeries, jp drain and colostomy in place requires SN assessment for Requiring Homecare:cardiopulmonary, neuro, GI/GU, musculoskeletal and integumentary systems, safety with ADLs and fall precautions, medication and diagnoses management and education, weekly and as needed for complications. 					
SN Careplans SN FREQUENCY: SN 1w8 and prn for wound, JP drain or ostomy complications CLINICAL SUMMARY: Nurse met with patient at her home for home health start of care visit. Patient recently discharged from the hospital. She was hospitalized on April 30 and discharged yesterday. During her hospital stay she had a hysterectomy, fistula repair and removal of her rectum. Patient had a colonostomy placed in October. She currently has a large midline surgical wound which has a non-removable surgical dressing in place. Nurse confirm with the doctor that that dressing should stay in place until she sees them again. JP drain located at right lower abdomen. Nurse provided education to pt on how to milk the tubing, measure the output and create vacuum in bulb. Patient reports and output of 10 cc this morning. Colonostomy is located at the left lower abdomen. Discussed proper diet and appropriate output. Patient has a right upper chest port which is not accessed currently. Several bruises on her arms from IVs, which were in place while hospitalized. Nurse performed head to toe assessment of patient. Skin intact except surgical sites mentioned previously. Heart sounds normal, lungs clear, bowel sound hyperactive. Patient reports a poor appetite, but she is eating. Nurse encouraged patient to increase protein in her diet to promote wound healing. She has generalized weakness and requires some assistance with ADLs. However, she is not using an assistive device to ambulate at this time. Home health physical therapy has been ordered. Nurse reviewed all medications with patient advised patient of her increased risk of bleeding. Discussed signs of bleeding and what to look for and what to do in case of bleeding. Patient reports peristomal skin is within normal limits. She is knowledgeable about how to change the ostomy appliance she receives assistance from her mother. Denies pain at this time. Provided education on fall prevention and performed home safety assessment. Nurse will see patient once a week through certification period. PARAMETERS FOR PHYSICIAN NOTIFICATION: temperature < 95 > 101, heart rate < 50 > 120, respiratory rate < 12 > 29, blood pressure systolic < 85 > 170, blood pressure diastolic < 50 > 90, O2 saturation < 88 > 100, pain < 0 > 8 CAREGIVER: 1. Non-agency caregiver(s) currently provide assistance				SN Goals PATIENT-STATED GOAL: Safety in home GOALS patient/caregiver recalls * ostomy management including how to clean stoma * change ostomy pouch * recalls related medication(s) purpose, schedule patient/caregiver recalls * how to achieve wound healing including cleaning and dressing wound * position changes * skin care * diet modification * record wound measurements * recalls related medication(s) purpose, schedule patient/caregiver recalls * strategies to increase caloric intake * recalls related medication(s) purpose, schedule patient/caregiver recalls * ostomy management including how to clean stoma * change drainage pouch * diet restrictions * recalls related medication(s) purpose, schedule patient/caregiver recalls * strategies to minimize fatigue and exhaustion including work simplification * energy conservation * lifestyle changes * diet * recalls related medication(s) purpose, schedule patient self administers medications as prescribed
