1. Patient s HI claim No.		2. Start Of Care Date		3. Certification Period		4. Medical Record No.		5. Provider No.		
10003655		05/15/2026		From: 05/15/2026 To: 07/13/2026		25713		217058		
6. Patient's Name and Address Geraldine Maddox 730 Rainbow Court, Edgewood, MD 21040- 443-230-6923					7. Provider's Name, Address and Telephone Number HomeCentris Healthcare LLC 10 Crossroads Drive, Suite 102 Owings Mills, MD 21117-8284 410-321-8448 1487113239					
8. DOB 07/28/1943 9.Sex Female					10. Medications: Dose/Frequency/Route (N)ew (C)hanged MECLIZINE 25 mg / 1 Tablet PO 3x/day					
11. ICD 195.1		Principal Diagnosis Orthostatic hypotension		Date 05/15/26						
13. ICD R42.		Other Pertinent Diagnoses Dizziness and giddiness		Date 05/15/26						
J30.2		Other seasonal allergic rhinitis		05/15/26						
H66.91		Otitis media unspecified right ear		05/15/26						
E04.2		Nontoxic multinodular goiter		05/15/26		15. Safety Measures: standard precautions, hand rails, ambulates with assistance, activity supervision				
Z87.891		Personal history of nicotine dependence		05/15/26						
14. DME and Supplies: grab bars, bath bench, walker					17. Allergies: iodine penicillin sulfa drugs					
16. Nutrition: regular					18.B. Activities Permitted Exercises Prescribed, Transfer bed/Chair, Up As Tolerated					
18.A. Functional Limitations Ambulation, Hearing					19. Mental & Pyschosocial Status: COGNITION: 0. Alert/ oriented, able to focus and shift attention, comprehends and recalls task directions independently., ANXIETY: 0. Never, SOCIAL ISOLATION: 1. Rarely, BEHAVIORAL ISSUES: 7. None of the above behaviors demonstrated, HISTORY OF DEPRESSION: No					
20. Prognosis: good					22. A Rehabilitation Potential: SELF-CARE: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper., MOBILITY: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper.					
22.B.Discharge Plans patient will be responsible for managing treatment					Homebound status: Due to diagnosis of Orthostatic hypotension, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.					
Clinical Condition Requiring Homecare:					<div>The patient is an 82-year-old female referred to home health services following a recent hospitalization for complaints of dizziness and lightheadedness. She was diagnosed with orthostatic hypotension and acute right otitis media. MRI results were negative for cerebrovascular accident (CVA). The patient was treated with antibiotics during hospitalization. Past medical history is significant for goiter and a history of smoking. Prior to hospitalization, the patient resided alone and was fully independent within the community, including performance of all basic and instrumental activities of daily living, functional mobility, transfers, and ambulation without an assistive device. The patient plans to eventually return home and resume living independently. Physical therapy assessment revealed minor balance and lower extremity strength deficits. Objective findings include a Tinetti Balance Assessment score of 18/28, indicating an increased fall risk, and a Timed Up and Go (TUG) test result of 10.3 seconds. The patient demonstrated minor difficulty negotiating steps and mild unsteadiness during ambulation without an assistive device, along with mild lower extremity weakness. Despite these deficits, the patient remains independent with basic activities of daily living (ADLs), instrumental activities of daily living (IADLs), transfers, and household mobility. The patient demonstrates good rehabilitation potential and is expected to benefit from skilled physical therapy services focused on improving balance, lower extremity strength, gait stability, stair negotiation, and overall safety with functional mobility to reduce fall risk and support return to prior level of function. Occupational therapy evaluation was also completed following hospitalization. Assessment findings indicate the patient is currently functioning at an independent level with basic self-care activities, functional transfers, and functional ambulation tasks without the use of an assistive device. The patient demonstrates adequate ability to safely perform daily routines and functional tasks consistent with prior level of function. At this time, no additional skilled occupational therapy services are warranted. Continued monitoring through home health services is recommended, with emphasis on safety awareness, fall prevention, medication compliance, and gradual return to independent community functioning as tolerated.</div><div> </div><div>Date of Order</div><div><div>05/15/2026</div><div>Orders</div><div>Physician Face-to-Face Date: 05/06/2026</div><div>Clinical Condition Requiring Home Care per Certifying Physician: PT-eval & treat, OT-eval & treat due to Orthostatic hypotension</div><div>Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home</div><div> </div><div>1 - SOC - PT Notes: soc</div><div>OT Eval Notes:</div><div> </div><div>Physician</div><div>Kalaria, Neha</div>
