Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |                                                                                                                      |  | family/caregiver will be responsible for managing treatment                                                                                                                                                                                                                                                                       |  |
| Homebound status: After undergoing Whipple procedure, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |                                                                                                                      |  |                                                                                                                                                                                                                                                                                                                                   |  |
| Clinical Condition Requiring Homecare: <div>Physical therapy evaluation was completed for this 85-year-old female referred to skilled home health services due to a decline in functional mobility, strength, endurance, and overall safety following recent hospitalization and thoracic surgery workup. The patient's past medical history is significant for pancreatic cancer status post Whipple procedure, recently diagnosed right lower lobe adenocarcinoma/non-small cell lung carcinoma, coronary artery disease, hypertension, osteoporosis, chronic diarrhea, lumbar degenerative disc disease, and a history of hip fracture with subsequent hip replacement. Upon evaluation, the patient demonstrated generalized bilateral lower extremity weakness, impaired balance, altered gait mechanics, decreased activity tolerance, and an increased risk for falls. These impairments significantly impact her ability to safely perform functional mobility tasks, including bed mobility, transfers, household ambulation, and stair negotiation. The patient requires the use of an assistive device and caregiver supervision to ensure safety during mobility activities. Functional limitations have reduced her independence within the home and have made exiting the residence difficult, requiring considerable effort and assistance. Assessment findings indicate that the patient is at elevated risk for falls, functional decline, and potential rehospitalization due to decreased strength, endurance deficits, impaired balance, and compromised gait performance. These deficits interfere with her ability to safely complete daily activities and maintain optimal independence within her home environment. Skilled home health physical therapy is medically necessary to address these impairments through individualized therapeutic interventions focused on lower extremity strengthening, balance retraining, gait training, transfer training, endurance enhancement, stair negotiation, and fall prevention strategies. Patient and caregiver were educated regarding safety awareness, proper use of assistive devices, fall prevention techniques, energy conservation strategies, and the importance of adherence to prescribed therapeutic activities. The plan of care includes ongoing skilled physical therapy services to improve strength, balance, endurance, and functional mobility, maximize safety during daily activities, reduce fall and hospitalization risk, and promote the highest achievable level of independence within the home environment.</div><div><br></div><div>Date of Order</div><div>05/21/2026</div><div>Orders</div><div>Physician Face-to-Face Date: 05/15/2026</div><div>Clinical Condition Requiring Home Care per Certifying Physician: PT-eval & treat due to Whipple procedure</div><div>Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home</div><div><br></div><div><br></div><div>1 - SOC - PT Notes: soc</div><div><br></div><div>Physician</div><div>Gattuso, Robert</div> |  |                                                                                                                      |  |                                                                                                                                                                                                                                                                                                                                   |  |

| HOSPITALIZATION RISKS: 7. Currently taking 5 or more medications, 8. Currently reports exhaustion                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                       | patient/caregiver recalls<br>* lifestyle modifications to manage respiratory condition including<br>* diet changes and regular exercise<br>* strategies to control shortness of breath<br>* home remedies to keep lungs healthy<br>* recalls related medication(s) purpose, schedule |                       |                      |
| STANDING ORDERS: infection control: hygiene, proper hand washing; advance directive: plan if patient is unable to make healthcare decisions ; fall precautions: wear sensible shoes, remove home hazards, living space adequately lit, assistive devices prn; emergency preparedness: plan for prn evacuation, resumption of home health visits; Assess the patient's incision on post op day 7 and the nurse or physical therapist will remove aquacel dressing leaving OTA; if incision is draining educate pt/pcg on cleaning with normal saline and covering with dry gauze daily and as needed. Assess/Instruct Pt/PCg: Ice to ____ x 20 minutes each hour while awake. If cold machine ordered apply 20 minutes on and 20 minutes off for 3-4 times a day. Assess/Instruct all body systems/vital signs/complications, Blood Pressure; systolic is greater than 169 mm Hg or less than 90 mm Hg; diastolic is greater than 100 mm Hg or less than 55 mm Hg, Clinician to assess comorbidities and report changes in condition to the patient's physician, Pain Rating is greater than 6 on 0-10 scale, Pulse is greater than 110 or less than 50, Respirations are greater than 22 or less than 8, SPO2: is less than 90 % at rest /with exertion, Temperature is greater than 100.5 F or less than 95.0 F, Pain Rating is greater than 6 on 0-10 scale Implement Fall Prevention Program, Instruct and educate the patient/PCG on wearing compression stockings for the next 4 weeks per discharge instructions. Instruct the pt/PCG on using the incentive spirometer 10 times every 2 hour while awake. Provide education content at patient's level of health literacy. Assess/Instruct Pt/PCg: Safety measures to prevent injury. Assess: Musculoskeletal status. Teach Pt/PCg to maintain appropriate wt bearing status as ordered by MD, total joint replacement precautions as applicable, Safe stair climbing skills, Safe, effective use of adaptive/assist device Assess/Instruct Pt/PCg: Pain management measures; assess pain level, pain medication, rest, body alignment, ROM, meditation, massage. Pt/PCg educated in pain management techniques including positioning and relaxation techniques Instruct Pt/PCg: Medication actions, uses, frequency, dose, side effects, interactions of all new/change meds, Provide medication education,. Assess/Instruct Pt/PCg: Safety measures to prevent injury, Therapeutic Exercise, Transfer Training Monitor surgical wound for s/s of infection, educate on s/s of concern and infection prevention to promote wound healing. |                       | patient/caregiver recalls<br>* strategies to minimize fatigue and exhaustion including work simplification<br>* energy conservation<br>* lifestyle changes<br>* diet<br>* recalls related medication(s) purpose, schedule                                                            |                       |                      |
