36243938		04/16/2026		From: 04/16/2026 To: 06/14/2026	
4. Medical Record No.		5. Provider No.			
16458		217058			
6. Patient's Name and Address			7. Provider's Name, Address and Telephone Number		
William Tyler 3214 Carlswood Circle, WINDSOR MILL, MD 21244- 443-596-1550			HomeCentris Healthcare LLC 10 Crossroads Drive, Suite 102 Owings Mills, MD 21117-8284 410-321-8448 1487113239		
8. DOB			9. Sex		
01/19/1950			Male		
11. ICD		Principal Diagnosis		Date	
I65.21		Occlusion and stenosis of right carotid artery		04/16/26	
13. ICD		Other Pertinent Diagnoses		Date	
I10.		Essential (primary) hypertension		04/16/26	
E11.9		Type 2 diabetes mellitus without complications		04/16/26	
E78.5		Hyperlipidemia unspecified		04/16/26	
Z79.82		Long term (current) use of aspirin		04/16/26	
Z79.02		Long term (current) use of antithrombotics/antiplatelets		04/16/26	
Z86.73		Prsnl hx of TIA (TIA) and cereb infrc w/o resid deficits		04/16/26	
14. DME and Supplies:			15. Safety Measures:		
diabetic supplies, bath bench, walker, cane			standard precautions, fall precautions, diabetic precautions, ambulates with device, walker precautions, medication safety, sharps precautions, anticoagulant precautions		
16. Nutrition:			17. Allergies:		
cardiac diet, diabetic			no known allergies		
18.A. Functional Limitations			18.B. Activities Permitted		
Endurance, Ambulation, LEFT SIDED WEAKNESS			Cane, Walker, Exercises Prescribed		
19. Mental & Pyschosocial Status: COGNITION: 0. Alert/ oriented, able to focus and shift attention, comprehends and recalls task directions independently., ANXIETY: 0. Never, SOCIAL ISOLATION: 0. Never, BEHAVIORAL ISSUES: 2. Impaired decision-making: failure to perform usual ADLs or IADLs, inability to appropriately stop activities, jeopardizes safety through actions, HISTORY OF DEPRESSION: No					
20. Prognosis: fair					
22. A Rehabilitation Potential:			22.B.Discharge Plans		
SELF-CARE: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper., MOBILITY: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper.			patient will be responsible for managing treatment		
Homebound status: Due to diagnosis of Occlusion and stenosis of right carotid artery, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.					
Clinical Condition Requiring Homecare: <div>The patient is a 76-year-old male recently discharged from Levindale Specialty Hospital following hospitalization on 03/20/2026 for a cerebrovascular accident (CVA) involving a small infarct in the posterior right frontal lobe, resulting in left-sided weakness. His past medical history is significant for hypertension, hyperlipidemia, and poorly controlled diabetes mellitus, with a most recent hemoglobin A1c of 12.2%. The patient resides at home with his daughter, who provides assistance with activities of daily living (ADLs) and instrumental activities of daily living (IADLs) as needed. Skilled nursing services have been initiated with a planned frequency of once weekly for 12 weeks, followed by two additional weekly visits and one final visit. Physical and occupational therapy evaluations have been ordered. The patient is currently monitoring fingerstick blood glucose levels twice daily. On assessment, the patient is alert and oriented to person, place, and time. He denies pain and shortness of breath, and lung sounds are clear throughout. He reports a good appetite, with last bowel movement occurring the previous day. Fingerstick blood glucose was recorded at 128 mg/dL. Bilateral lower extremities demonstrate trace edema. The patient ambulates with the use of a quad cane for safety. Medication reconciliation was completed, and the patient was instructed on medication names, dosages, frequencies, and potential side effects. Education was also provided regarding diabetes management and the importance of glycemic control in relation to stroke recovery, as well as initial teaching on CVA, including risk factors and prevention strategies. The patient was receptive to all education provided. Physical therapy evaluation completed on 04/09/2026 indicates the patient presents with minimal residual deficits following CVA, including mild left-sided weakness graded at approximately 4+/5 and impaired dynamic standing balance requiring contact guard assistance, particularly on narrow base or uneven surfaces. No significant range of motion limitations or pain were noted. The patient demonstrates independent and steady transfers and is able to ambulate greater than 100 feet on level surfaces without an assistive device, although he utilizes a quad cane for added safety. Vital signs were stable at the time of evaluation. Skilled physical therapy services are indicated to address dynamic balance deficits, improve lower extremity strength, enhance gait safety, and implement a structured home exercise program, along with fall prevention strategies. Caregiver education and training will also be provided to support safe mobility and progression toward modified independence in both household and community settings.</div><div> </div><div>Date of Order</div><div>04/16/2026</div><div>Orders</div><div>Physician Face-to-Face Date: 04/03/2026</div><div>Clinical Condition Requiring Home Care per Certifying Physician: sn-disease management pt-eval & treat ot-eval & treat due to Occlusion and stenosis of right carotid artery</div><div>Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home</div><div> </div><div>1 - SOC - SN Notes: soc</div><div>PT Eval Notes:</div><div>OT Eval Notes:</div><div>Physician</div><div>Nkwanyuo, Joseph</div></div>
