19. Mental & Psychosocial Status: COGNITION: 1. When reminded, assisted, or supervised by another person, able to get to and from the toilet and transfer, ANXIETY: 0. Never, SOCIAL ISOLATION: , BEHAVIORAL ISSUES: , HISTORY OF DEPRESSION:					
20. Prognosis: good					
22. A Rehabilitation Potential:			22.B.Discharge Plans		
SELF-CARE: , MOBILITY:			patient will be responsible for managing treatment		
Homebound status: Due to diagnosis of Type 2 diabetes mellitus with foot ulcer, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device					
Clinical Condition Requiring Homecare:		<p class="MsoNoSpacing">Patient seen for recertification related to ongoing wound care needs for a right posterior ankle wound requiring skilled nursing intervention to prevent worsening of the wound and infection, making leaving the home a taxing effort. Patient is alert and oriented 3 and lives with family. Assessment revealed a right posterior lower ankle wound measuring 2.9 cm x 2.5 cm with a pink, flesh-colored wound bed and mild swelling noted. Patient reports tenderness to palpation that has improved, minimal pain rated at 3/10, and occasional bleeding down the foot with increased ambulation activity. Minimal drainage was reported while the wound was open to air, with no active drainage or odor noted during the visit. Wound improvement is evident, and the patient independently performs wound care appropriately in the absence of nursing. Patient ambulates with a rollator and cane, remains primarily on the first floor for safety, but is able to access the upstairs shower as needed. No falls, abnormal bleeding, or urinary discomfort were reported. Last bowel movement was yesterday. Patient reports sleeping well and variable appetite. Medications were reviewed with the patient, including actions and potential side effects, with no medication changes reported. Skilled nursing services remain medically necessary for continued wound assessment, wound care management, infection prevention, medication education, and monitoring of healing progress with the goal of complete wound resolution.<o:p></o:p></p> <p class="MsoNoSpacing"><o:p> </o:p></p> <p class="MsoNoSpacing">Date of Order<o:p></o:p></p> <p class="MsoNoSpacing">06/03/2026 Order<o:p></o:p></p> <p class="MsoNoSpacing">Physician Face-to-Face Date: 01/22/2026 Clinical Condition Requiring Home Care per Certifying Physician: sn-disease management pt-eval & treat ot-eval & treat due to Type 2 Diabetes Mellitus With Foot Ulcer Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home<o:p></o:p></p> <p class="MsoNoSpacing"> 4 - Recertification SN Notes: due to wound to lower right posterior ankle area<o:p></o:p></p> <p class="MsoNoSpacing">Physician: Berkenblit, Gail</p>
