8. DOB 01/17/1952		9.Sex Female		10. Medications: Dose/Frequency/Route (N)ew (C)hanged Tylenol - Acetaminophen 325 mg / 1 Tablet by mouth every 8 hours Give 2 tablet as needed for pain Atorvastatin Calcium - Atorvastatin Calcium 40 mg / 1 Tablet by mouth once a day for HDL nightly. Gabapentin - Gabapentin 100 mg 1 capsule by mouth twice a day For nerve pain Carbidopa And Levodopa - Carbidopa: Levodopa 25 mg;100 mg 2 tab by mouth three times a day Started 6/23 see titrating schedule on pills bottle Dabigatran Etxilate - Dabigatran Etxilate 150mg by mouth twice a day Amlodipine Besylate - Amlodipine Besylate eq 10 mg base 1 tab by mouth once a day Losartan Potassium - Losartan Potassium 100 mg by mouth once a day Take 1 tablet my mouth daily for HTN, hold for SBP les than 110 or HR less than 60 Carvedilol - Carvedilol 12.5 mg by mouth once a day For Heart			
11. ICD I82.401	Principal Diagnosis Acute embolism and thombos unsp deep veins of r low extrem		Date 06/29/26				
13. ICD I10. R53.81 Z91.81	Other Pertinent Diagnoses Essential (primary) hypertension Other malaise History of falling		Date 06/29/26 06/29/26 06/29/26				
14. DME and Supplies: wheelchair, walker, , commode, , cane, bath bench				15. Safety Measures: fall precautions, cardiac precautions, diabetic precautions, bleeding precautions, anticoagulant precautions, activity supervision			
16. Nutrition: cardiac diet, diabetic,				17. Allergies: no known allergies			
18.A. Functional Limitations Ambulation, Endurance, Bowel/Bladder Incontinence				18.B. Activities Permitted Wheelchair, Up As Tolerated			
19. Mental & Psychosocial Status:		COGNITION: 2. Requires assistance and some direction in specific situations (for example, on all tasks involving shifting of attention) or consistently requires low stimulus environment due to distractibility, ANXIETY: 3. During the day and evening, but not constantly, SOCIAL ISOLATION: 2. Sometimes, BEHAVIORAL ISSUES: 1. Memory deficit: failure to recognize familiar persons/places, inability to recall events of past 24 hours, significant memory loss so that supervision is required, HISTORY OF DEPRESSION: No					
20. Prognosis:		fair					
22. A Rehabilitation Potential: SELF-CARE: 1. Dependent - A helper completed all the activities for the patient., MOBILITY: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities.				22.B.Discharge Plans SN and OT: family/caregiver will be responsible for managing treatment PT: pat			
Homebound status:							Due to diagnosis of Acute embolism and thrombosis of unspecified deep veins of right lower extremity, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device
Clinical Condition Requiring Homecare:		<p class="p">The patient is a 74-year-old female with a past medical history significant for hypertension (HTN), diabetes mellitus (DM), a recent right lower extremity deep vein thrombosis (DVT), and a new diagnosis of Parkinson's disease. She lives with her son, who is her primary caregiver, in a first-floor apartment with several steps at the entrance. The patient is wheelchair-bound for most mobility, has a history of frequent falls, and demonstrates generalized weakness with bilateral lower extremity strength of approximately 3-/5 and bilateral upper extremity strength of 3+/5. She requires minimal to contact guard assistance for transfers, including sit-to-stand and commode transfers, and assistance with all activities of daily living (ADLs), including bathing and dressing. Ambulation with a rolling walker is limited to short distances and requires verbal cueing for trunk extension due to impaired balance, weakness, right knee instability, and decreased endurance. She is unable to safely negotiate stairs or uneven surfaces and is considered homebound, requiring assistance to leave the home. The patient sleeps in a hospital bed and uses a bedside commode with assistance; an appropriately sized wheelchair and commode, as well as home health aide (HHA) services, are recommended to support her ADLs and mobility needs. She reports right knee pain rated 3/10 at rest, increasing to 8/10 with standing, as well as lower back pain while sitting. A physical therapy evaluation was completed, and the patient would benefit from continued skilled physical therapy to improve strength, balance, safety, and functional mobility with the goal of maximizing independence and returning to her prior level of function.<o:p></o:p></p><p class="p"> </p><p class="16">Date of Order<o:p></o:p></p><p class="16">0629/2026<o:p></o:p></p><p class="16">Physician Face-to-Face Date:<o:p></o:p></p><p class="16">Clinical Condition Requiring Home Care per Certifying Physician: sn-disease management pt-eval & treat ot-eval & treat hha-adl's dx: Acute embolism and thrombosis of unspecified
