8. DOB			9. Sex		
07/22/1953			Female		
11. ICD			10. Medications: Dose/Frequency/Route (N)ew (C)hanged		
113.0			Irbesartan - Irbesartan 300 MG / 1 Tablet by mouth once a day for HTN Hold Med for SBP <110 or HR<50		
13. ICD			Carvedilol - Carvedilol 12.5 MG / 1 Tablet by mouth every 12 hours for HTN Hold med for SBP <110		
150.9			Sennosides-Docusate Sodium 8.6-50 mg/tablet / Give 2 tablet by mouth every 12 hours as needed for Bowel Regimen		
E11.22			Terbinafine Hydrochloride - Terbinafine Hydrochloride 250 MG / 1 Tablet by mouth once a day for Fungal Infection		
N18.9			Duloxetine Hydrochloride - Duloxetine Hydrochloride DR 30 MG / 1 Capsule by mouth once a day for depression		
D63.1			Cholecalciferol 125 MCG (5000 UT) / 1 Tablet by mouth once a day every other day for Vitamin D Deficiency		
E11.40			Rosuvastatin Calcium - Rosuvastatin Calcium 40 MG / 1 Tablet by mouth at bedtime for HLD		
K22.0			Pyridoxine Hydrochloride - Pyridoxine Hydrochloride ER 200 MG / 1 Tablet by mouth once a day for Supplement		
R13.10			Cyanocobalamin - Cyanocobalamin 500 MCG / 1 Tablet by mouth once a day for Supplement		
J44.9			Lasix - Furosemide 40 MG / 1 Tablet by mouth once a day for Edema		
I87.2			Acetaminophen - Acetaminophen 500 mg/tablet / Give 2 tablet by mouth every 8 hours as needed for pain		
K52.9			Cyclobenzaprine Hydrochloride - Cyclobenzaprine Hydrochloride 5 MG / 1 Tablet by mouth every 8 hours as needed for Muscle Spasm		
E78.00			Centrum Silver - Ascorbic Acid: Biotin: Cyanocobalamin: Ergocalciferol: Folic Acid: Niacinamide: Pantothenic Acid: Phytonadione: Pyridoxine: Ribo 0 Give 1 tablet by mouth once a day for vitamin supplement		
G40.901			Insulin Lispro 100 UNIT/ML / Inject 10 unit subcutaneous after meal for monitoring		
E53.8			Insulin Lispro 100 UNIT/ML subcutaneous before meal Inject as per sliding scale: if 0 - 69 = 0 if BS <70, notify doctor; 70 - 200 = 0; 201 - 250 = 2 units; 251 - 300 = 4 units; 301 - 350 = 6 units; 351 - 400 = 8 units; 401+ = 8 units if BS >400, give insulin & notify doctor		
E53.1			Insulin Glargine Subcutaneous Solution 100 UNIT/ML / Inject 22 unit subcutaneous at bedtime for DM

14. DME and Supplies:			15. Safety Measures:		
bath bench, grab bars, cane			medication safety, fall precautions, diabetic precautions, ambulates with device, standard precautions, bathroom safety		
16. Nutrition:			17. Allergies:		
diabetic			nortriptyline penicillin pregabalin crestor metformin		
18.A. Functional Limitations			18.B. Activities Permitted		
Ambulation			Cane		
19. Mental & Pyschosocial Status:			COGNITION: 0. Alert/ oriented, able to focus and shift attention, comprehends and recalls task directions independently., ANXIETY: 0. Never, SOCIAL ISOLATION: 0. Never, BEHAVIORAL ISSUES: 7. None of the above behaviors demonstrated, HISTORY OF DEPRESSION: Yes		
20. Prognosis:			Good		
22. A Rehabilitation Potential:			22.B.Discharge Plans		
SELF-CARE: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper., MOBILITY: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper.			patient will be responsible for managing treatment		
Homebound status:			Due to diagnosis of Hypertensive heart and chronic kidney disease with heart failure and stage 1 through stage 4 chronic kidney disease, or unspecified chronic kidney disease, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.		
Clinical Condition			<div>The patient is a 72-year-old female admitted to home health services following hospitalization and subsequent subacute		
Requiring Homecare:			rehabilitation after multiple syncopal episodes resulting in an unwitnessed fall with head injury. The patient reported that she was living alone at the time of the fall and struck the posterior aspect of her head, sustaining a hematoma. Following acute hospitalization, she completed a course of inpatient rehabilitation and was discharged to her granddaughter's home, where she currently resides. Her granddaughter serves as her primary caregiver and provides assistance as needed. The patient's past medical history is significant for type 2 diabetes mellitus (T2DM), hypertension (HTN), congestive heart failure (CHF), chronic obstructive pulmonary disease (COPD), hyperlipidemia (HLD), chronic kidney disease (CKD), polyneuropathy, achalasia, chronic diarrhea, dysphagia, and a history of left rotator cuff surgery. Upon skilled nursing assessment, the patient was alert and oriented to person, place, time, and situation (A&O 4). She denied pain, nausea, vomiting, dizziness, lightheadedness, and reported no additional syncopal episodes or falls since her hospitalization. Skin assessment revealed warm, intact skin without evidence of breakdown. Vital signs were obtained and remained within acceptable parameters. The patient ambulates with a cane and wears compression stockings as prescribed. A comprehensive medication reconciliation was completed, including review of her sliding-scale Novolog insulin regimen. Education was provided regarding proper insulin administration, blood glucose monitoring, medication adherence, recognition and management of signs and symptoms of hypo- and hyperglycemia, fall prevention strategies, safe use of her cane, energy conservation techniques, and the importance of attending scheduled follow-up appointments, including her ophthalmology appointment on 07/12/2026. The patient verbalized understanding of all teaching provided and expressed that her

9WK4GA3FC90	06/25/2026	From: 06/25/2026 To: 08/23/2026	27187	217058
6. Patient's Name and Address Deborah Garrett 5071 Silver Oak Drive, ROSEDALE, MD 21237- 443-622-9338			7. Provider's Name, Address and Telephone Number HomeCentris Healthcare LLC 10 Crossroads Drive, Suite 102 Owings Mills, MD 21117-8284 410-321-8448 1487113239	

primary goal is to regain the ability to ambulate safely without experiencing additional falls. Prior to hospitalization, the patient resided independently in a two-story home with 13 stairs leading to the bedroom and was independent with basic activities of daily living, functional transfers, and household ambulation. Occupational therapy evaluation initially identified decreased standing balance, reduced standing tolerance, decreased bilateral upper extremity strength, and diminished activity tolerance, resulting in deficits with self-care, functional transfers, and functional mobility. Although skilled occupational therapy was initially recommended to address these impairments and facilitate return to her prior level of function, a subsequent reassessment demonstrated that the patient had regained independence with basic self-care, functional transfers, and household ambulation within the home environment. As no additional skilled occupational therapy needs were identified, occupational therapy services were concluded following the evaluation only. The patient remains appropriate for continued home health services, including skilled nursing for ongoing assessment, medication management, diabetes education, chronic disease monitoring, and reinforcement of fall prevention strategies. Continued skilled physical therapy is medically necessary to improve strength, balance, gait, endurance, and overall functional mobility, with the goal of maximizing safety, reducing fall risk, preventing rehospitalization, and restoring the patient to her highest attainable level of independence within the home environment.

PARAMETERS FOR PHYSICIAN NOTIFICATION: temperature < 95 > 100.5, heart rate < 50 > 110, respiratory rate < 8 > 22, blood pressure systolic < 90 > 169, blood pressure diastolic < 60 > 90, O2 saturation < 88 > 100, pain < 0 > 5

CAREGIVER: 1. Non-agency caregiver(s) currently provide assistance

HOSPITALIZATION RISKS: 7. Currently taking 5 or more medications, 9. Other risk(s) not listed in 1- 8

STANDING ORDERS: infection control: hygiene, proper hand washing; advance directive: plan if patient is unable to make healthcare decisions ; fall precautions: wear sensible shoes, remove home hazards, living space adequately lit, assistive devices prn; emergency preparedness: plan for prn evacuation, resumption of home health visits; Assess the patient's incision on post op day 7 and the nurse or physical therapist will remove aquacel dressing leaving OTA; if incision is draining educate pt/pcg on cleaning with normal saline and covering with dry gauze daily and as needed. Assess/Instruct Pt/Pcg: Ice to ____ x 20 minutes each hour while awake. If cold machine ordered apply 20 minutes on and 20 minutes off for 3-4 times a day. Assess/Instruct all body systems/vital signs/complications, Blood Pressure; systolic is greater than 169 mm Hg or less than 90 mm Hg; diastolic is greater than 100 mm Hg or less than 55 mm Hg, Clinician to assess comorbidities and report changes in condition to the patient's physician, Pain Rating is greater than 6 on 0-10 scale, Pulse is greater than 110 or less than 50, Respirations are greater than 22 or less than 8, SPO2: is less than 90 % at rest /with exertion, Temperature is greater than 100.5 F or less than 95.0 F, Pain Rating is greater than 6 on 0-10 scale Implement Fall Prevention Program, Instruct and educate the patient/PCG on wearing compression stockings for the next 4 weeks per discharge instructions. Instruct the pt/PCG on using the incentive spirometer 10 times every 2 hour while awake. Provide education content at patient's level of health literacy. Assess/Instruct Pt/Pcg: Safety measures to prevent injury. Assess: Musculoskeletal status. Teach Pt/Pcg to maintain appropriate wt bearing status as ordered by MD, total joint replacement precautions as applicable, Safe stair climbing skills, Safe, effective use of adaptive/assist device Assess/Instruct Pt/Pcg: Pain management measures; assess pain level, pain medication, rest, body alignment, ROM, meditation, massage. Pt/Pcg educated in pain management techniques including positioning and relaxation techniques Instruct Pt/Pcg: Medication actions, uses, frequency, dose, side effects, interactions of all new/change meds, Provide medication education,. Assess/Instruct Pt/Pcg: Safety measures to prevent injury, Therapeutic Exercise, Transfer Training Monitor surgical wound for s/s of infection, educate on s/s of concern and infection prevention to promote wound healing.

; Skin Preservation: Measures to prevent skin breakdown; pressure relief, incontinence care, nutrition, hydration ; Pain: Pain management measures; pain medication, rest, body alignment, ROM, meditation, massage ; Medications: Medication actions, uses, frequency, dose, interactions of all new/change meds Advance Directive:POLST (Physician Orders for Life-Sustaining Treatment)

PROBLEMS IDENTIFIED ON ASSESSMENT: D0160 - Depression, M2020 - Oral Med Management, abnormal blood pressure, M1400 - Dyspnea, abnormal BS < 70/140 > mg/dL, muscle weakness, limited strength, balance deficit, Pain Interference with ADLs

PROCEDURES: glucose testing via monitor

TEACH PATIENT/CAREGIVER: * lifestyle modifications to manage respiratory condition including diet changes and regular exercise strategies to control shortness of breath home remedies to keep lungs healthy, related medication(s) purpose, schedule, * how to maintain a diary to monitor effective and non-effective pain relief including documenting time of pain, rating, precipitating events, medications, treatments, and what works best to relieve pain teach relaxation skills and diversional activities, related medication(s) purpose, schedule, * depression-prevention strategies including

SN Goals

PATIENT-STATED GOAL: To walk without falling

GOALS

patient/caregiver recalls

- * how to maintain a diary to monitor effective and non-effective pain relief including documenting time of pain, rating, precipitating events, medications, treatments, and what works best to relieve pain
- * teach relaxation skills and diversional activities
- * recalls related medication(s) purpose, schedule
