10. Medications: Dose/Frequency/Route (N)ew (C)hanged				Amlodipine Besylate - Amlodipine Besylate 10 MG / 1 Tablet by mouth once a day for HTN Hold for SBP less than 110 or HR less than 60	
				CARVEDILOL 12.5 MG / 1 Tablet by mouth twice a day for HTN Hold for SBP less than 110 or HR less than 60	
				Ferrous Sulfate - Ferrous Sulfate: Folic Acid 325 (65 Fe) MG / 1 Tablet by mouth once a day every other day for Supplement	
				GABAPENTIN 400 MG / 1 Capsule by mouth three times a day for Neuropathy	
				LISINAPRIL 40 MG / 1 Tablet by mouth once a day for HTN Hold for SBP less than 110 OR HR less than 60	
				SENNA 8.6 mg/tablet / Give 2 tablet by mouth twice a day for Bowel regimen	
				Tylenol Es 500 Mg - Acetaminophen Give 2 tablet by mouth every 8 hours for Pain Management	
				Diclofenac Sodium - Diclofenac Sodium External Gel 1 % / Apply 4 gms to B knees topical as necessary every 6 hours for Pain	
				Lidocaine Patch - Lidocaine 5 % / Apply to L thigh topical once a day for Pain and remove per schedule	
14. DME and Supplies:				15. Safety Measures:	
hospital bed, walker, wheelchair, bath bench				standard precautions, fall precautions, medication safety, wheelchair precautions, walker precautions, smoke detectors , emergency phone # clearly displayed, bathroom safety, ambulates with assistance, ambulates with device	
16. Nutrition:				17. Allergies:	
soft				latex penicillin	
18.A. Functional Limitations				18.B. Activities Permitted	
Ambulation, Endurance				Wheelchair, Transfer bed/Chair, Exercises Prescribed, Walker, Up As Tolerated	
19. Mental & Pyschosocial Status:				COGNITION: 0. Alert/ oriented, able to focus and shift attention, comprehends and recalls task directions independently., ANXIETY: 0. Never, SOCIAL ISOLATION: 0. Never, BEHAVIORAL ISSUES: 7. None of the above behaviors demonstrated, HISTORY OF DEPRESSION: No	
20. Prognosis:				good	
22. A Rehabilitation Potential:				22.B.Discharge Plans	
SELF-CARE: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper., MOBILITY: 3. Independent - Patient completed all the activities by him/herself, with or without an assistive device, with no assistance from a helper.				family/caregiver will be responsible for managing treatment	
				patient will be responsible for managing treatment	
Homebound status:				Due to diagnosis of Essential (primary) hypertension, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.	
Clinical Condition				<div>The patient is a 51-year-old female admitted to skilled home health services following hospitalization and subsequent Requiring Homecare:subacute rehabilitation. Her past medical history is significant for nontraumatic intracerebral hemorrhage with residual left-sided deficits, brain compression, protein-calorie malnutrition, hypertension, dysphagia, and leiomyoma of the uterus. The patient is now residing at home with her daughter and spouse, who serve as her primary caregivers and provide assistance with activities of daily living (ADLs), mobility, and other care needs. The patient is alert and oriented 3, and vital signs were assessed and found to be within normal limits. Skin assessment revealed no current wounds, pressure injuries, or areas of skin breakdown. Medication reconciliation was completed, and comprehensive education was provided regarding medication management, adherence, and the importance of taking medications as prescribed. Additional education focused on fall prevention and home safety, including the proper use of assistive devices, maintaining a clutter-free environment, and utilizing caregiver assistance during ambulation and transfers. Pressure injury prevention was also reinforced through instruction on frequent repositioning, offloading pressure areas, maintaining adequate nutrition and hydration, and routinely monitoring the skin for redness or breakdown. Both the patient and caregivers verbalized understanding of all education provided. The patient continues to require skilled nursing services for ongoing comprehensive assessment, medication management and education, monitoring for complications related to her chronic medical conditions, skin integrity surveillance, fall prevention, and continued patient and caregiver education to promote safety and prevent rehospitalization. An occupational therapy evaluation was completed following the patient's hospitalization and subacute rehabilitation. Prior to her illness, the patient was independent with basic self-care activities, functional transfers, and household ambulation without the use of an assistive device. Since her intracerebral hemorrhage, the patient demonstrates significant functional decline characterized by impaired standing balance, decreased standing tolerance, reduced bilateral upper extremity strength, diminished activity tolerance, and impaired functional mobility, resulting in decreased independence with self-care tasks, functional transfers, and ambulation. The patient currently requires the use of a walker with caregiver assistance for mobility or a wheelchair for longer distances due to her mobility limitations and residual left-sided deficits. Skilled occupational therapy services are medically necessary to address deficits in strength, balance, endurance, functional mobility, transfer techniques, and performance of ADLs, with the goal of maximizing safety, reducing caregiver burden, improving functional independence, and facilitating the patient's return to her highest attainable level of function within the home environment.</div><div> </div><div>Date of Order</div><div>07/30/2026</div><div>Orders</div><div>Physician Face-to-Face Date: 06/16/2026</div><div>Clinical Condition Requiring Home Care per Certifying Physician: SN-disease management PT-eval & treat OT-eval & treat due to Essential (primary) hypertension</div><div>Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home</div><div> </div><div>SOC - SN Notes: soc</div><div>OT Eval Notes:</div><div> </div><div>Physician</div><div>Arabi, Bizhan</div></div>
