Z85.46 Personal history of malignant neoplasm of prostate Date 07/15/26					
14. DME and Supplies: walker, bath bench			15. Safety Measures: standard precautions, supervision at all times, walker precautions, medication safety, diabetic precautions, fall precautions, bathroom safety, ambulates with device, , ambulates with assistance, activity supervision		
16. Nutrition: low cholesterol, diabetic,			17. Allergies: no known allergies		
18.A. Functional Limitations Ambulation, Endurance!Hearing!Paralysis			18.B. Activities Permitted Up As Tolerated		
19. Mental & COGNITION: 0. Alert/ oriented, able to focus and shift attention, comprehends and recalls task directions independently., ANXIETY: 0. Never, SOCIAL ISOLATION: 0. Pyschosocial Status: Never, BEHAVIORAL ISSUES: 7. None of the above behaviors demonstrated, HISTORY OF DEPRESSION: No					
20. Prognosis: Fair					
22. A Rehabilitation Potential: SELF-CARE: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities., MOBILITY: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities.			22.B.Discharge Plans patient will be responsible for managing treatment		
Homebound status: Due to diagnosis of Type 2 diabetes mellitus with diabetic peripheral angiopathy without gangrene, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device					
Clinical Condition Requiring Homecare: <p class="p" align="justify" style="mso-margin-top-alt:auto;mso-pagination:widow-orphan;text-align:justify; text-justify:inter-ideograph;">Start of care (SOC) was completed, and all required consents were signed by the patient. The patient is an 86-year-old male with a past medical history of diabetes mellitus, hypertension, tic disorder, cognitive impairment, right open-angle glaucoma with visual impairment/blindness, bilateral knee osteoarthritis, hyperlipidemia, iron deficiency, and a history of falls. He is alert and oriented and lives alone in a dwelling on his sister's property, requiring navigation of 23 stairs daily, making it a taxing effort to leave the home due to lower extremity weakness, impaired vision, ambulatory difficulty, and the need for a rolling walker, vision cane, and supervision for safety. Slip guards have been installed on the stairs to reduce fall risk. The patient's goal is to improve stair negotiation and walking endurance. Assessment revealed no open wounds, no recent falls, good appetite and hydration, a bowel movement the previous day without abdominal discomfort, and abnormal lung sounds. Medication reconciliation was completed, and the patient reported that Jardiance caused loose stools and was subsequently discontinued. His most recent HbA1c was 6.3%, and a written medication list was provided. The patient also reported that prescribed eye drops were not administered during his recent skilled nursing facility stay and continues to wear dark glasses due to visual impairment. Physical therapy evaluation demonstrated bilateral lower extremity weakness (MMT 3-/5), decreased balance, and impaired functional mobility, requiring contact guard assistance for transfers and short-distance ambulation with a rolling walker and verbal cues to improve trunk extension. Skilled nursing and physical therapy services are medically necessary to provide ongoing disease and medication management, cardiopulmonary assessment, fall prevention, strengthening, balance training, gait and stair training, and to improve safety, functional independence, and return to the patient's prior level of function.</p><p class="p" align="justify">					
23. Signature and Date of Verbal SOC Where Applicable: Electronically Signed by Messick, Charles RN on 07/15/2026				25. Date HHA Received Signed POT	
24. Physician's Name and Address OLIVETTE GUEDON 10 North Greene Street BALTIMORE, MD 21201 PHONE: 4106057000 FAX: 14106057912 NPI: 1497857312			26. I certify/recertify that this patient is confined to his/her home and needs intermittent skilled nursing care, physical therapy and/or speech therapy or continues to need occupational therapy. The patient is under my care, and I have authorized the services on this plan of care and will periodically review the plan. F2F date : 06/18/2026
