10. Medications: Dose/Frequency/Route (N)ew (C)hanged					
				Tylenol Es - Acetaminophen 500 mg/tablet / Give 2 tablet by mouth every 8 hours as needed for pain	
				Atorvastatin Calcium - Atorvastatin Calcium 40 MG / 1 Tablet by mouth at bedtime for hyperlipidemia	
				Dabigatran Etexilate Mesylate 150 MG / 1 Capsule by mouth twice a day for Afib/recurrent LLE DVT's	
				DIGOXIN 125 MCG / 1 Tablet by mouth one time a day for heart failure. Hold if <60	
				Diltiazem Hydrochloride - Diltiazem Hydrochloride 90 MG / 1 Tablet by mouth in the morning for HTN HOLD FOR SBP <110 OR HR <60	
				Hydroxyzine Hydrochloride - Hydroxyzine Hydrochloride 25 MG tablet by mouth in the evening for ANXIETY	
				MELATONIN 3 MG / 1 Tablet by mouth once a day every 24 hours as needed for insomnia give at hs	
				Metoprolol Tartrate - Metoprolol Tartrate 50 MG / 1 Tablet by mouth two times a day for HTN hold Sbp less than 110 and heart rate less than 50	
				MIRALAX Powder 17GM/SCOOP / Give 1 scoop by mouth every 24 hours as needed for Bowel Regimen Dissolve in 4oz of water; hold for loose stools	
				Tramadol Hcl - Tramadol Hydrochloride 50 MG / 1 Tablet by mouth every 8 hours as needed for pain 7-10	
				Senna S - Senna 8.6-50 MG / 1 Tablet by mouth twice a day for bowel regimen Hold for loose stools	
				Naloxone Hcl - Naloxone Hydrochloride Nasal Liquid 4 MG/0.1ML / 1 spray nasal as necessary every 3 minutes for suspected opioid overdose 1 spray in nostril every 3 minutes as needed for overdose may repeat in alternating nostrils every 3 minutes until Coherent. Call 911, continue until paramedics arrive. Notify provider	
				Dulcolax - Bisacodyl Suppository 10 MG / Insert 1 suppository rectally every 24 hours as needed for promote bm if miralax ineffective	
14. DME and Supplies:				15. Safety Measures:	
wound care supplies, bath bench, hand held shower, grab bars				smoke detectors , medication safety, fall precautions, bleeding precautions, transfer with assist, medical alert/lifeline, emergency phone # clearly displayed, ambulates with assistance, standard precautions, hand rails, cardiac precautions, bathroom safety, anticoagulant precautions, activity supervision	
16. Nutrition:				17. Allergies:	
Z. NO PHYSICIAN-ORDERED DIET				no known allergies	
18.A. Functional Limitations				18.B. Activities Permitted	
Endurance, Bowel/Bladder Incontinence, Ambulation!Dyspnea With Minimal Exertion				Exercises Prescribed, Up As Tolerated	
19. Mental & Pyschosocial Status:				COGNITION: 2. Requires assistance and some direction in specific situations (for example, on all tasks involving shifting of attention) or consistently requires low stimulus environment due to distractibility, ANXIETY: 1. In new or complex situations only, SOCIAL ISOLATION: 0. Never, BEHAVIORAL ISSUES: 7. None of the above behaviors demonstrated, HISTORY OF DEPRESSION: Yes	
20. Prognosis:				Fair	
22. A Rehabilitation Potential:				22.B.Discharge Plans	
SELF-CARE: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities., MOBILITY: 2. Needed Some Help - Patient needed partial assistance from another person to complete any activities.				family/caregiver will be responsible for managing treatment patient will be responsible for managing treatment	
Homebound status:				Due to diagnosis of Other atherosclerosis of native arteries of extremities, left leg, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device.	
Clinical Condition Requiring Homecare:				<div>The patient is a 79-year-old female with a past medical history significant for chronic atrial fibrillation, heart failure with preserved ejection fraction (HFpEF), chronic kidney disease stage 3, peripheral arterial disease (PAD), and a prior left middle cerebral artery (MCA) stroke. The patient was assessed during today's skilled nursing visit and was found to be clinically stable with no acute distress observed. Vital signs were obtained and remained within acceptable parameters. The patient denied chest pain, shortness of breath at rest, dizziness, or any other acute complaints. A comprehensive nursing assessment and cardiovascular assessment were completed without complications. A thorough skin assessment revealed that the previously documented left lower extremity ulcer has completely healed with intact skin. No open wounds, drainage, erythema, signs of infection, or new pressure injuries were identified. Preventive skin care measures were reinforced, and continued skin surveillance remains part of the patient's ongoing plan of care. Medication reconciliation was completed, and the patient's medication regimen was reviewed with the patient and caregiver. The patient reported adherence to all prescribed medications without adverse effects. Education was provided regarding medication compliance, recognition of signs and symptoms of worsening heart failure and stroke, <hility is-highlighty="true" role="mark" data-hility="93032137-0230-4c13-a00b-e29ab027a8f4" data-hility-name="bleeding precautions" data-hility-match="highlight-pass-53:1" data-decoration-type="background" style="--decoration-thickness: auto;">bleeding precautions</hility> associated with anticoagulation therapy for atrial fibrillation when applicable, and indications for notifying the physician. Additional teaching included reinforcement of a low-sodium diet, prescribed fluid management, chronic kidney disease-friendly dietary recommendations, daily weight monitoring, edema surveillance, fall prevention, infection prevention, and recognition of emergency symptoms requiring immediate medical attention. The plan is to continue skilled nursing services for ongoing cardiovascular assessment and monitoring, renal status monitoring, medication management and education, continued skin surveillance and preventive skin care, reinforcement of disease process management related to atrial fibrillation, HFpEF, chronic kidney disease, peripheral arterial disease, and prior stroke, as well as coordination of care with the primary care provider and specialists as indicated. The patient remained clinically stable throughout the visit and tolerated the
