SN Careplans		SN Goals	
SN FREQUENCY: SN 2w8 and prn for wound complications		PATIENT-STATED GOAL: heal wound; decreased pain	
CLINICAL SUMMARY:		GOALS	
Head to toe assessment completed. Right lower leg edema has resolved. Pt continues to use compression stockings. Skin intact except wound at right lower leg which is being treated today. Lungs clear, heart sounds normal. Bowel sounds active x4 quadrants. Pt reports eating well. Denies falls. Bowel movements have been regular. There have been no medication changes. Nurse reinforced fall prevention and energy conservation with pt during visit today. Pt able to verbalize understanding of education provided. Wound bed with a very minimal amount of slough tissue present. Small amount of sanguineous drainage. No signs of infection noted. Pt admitted to applying santyl and dry dressing (instead of vashe wet to dry) last night. Nurse performed wound care as ordered. After the visit updated wound care instructions were obtained. Nurse instructed cg on updated wound care instructions. Santyl has been discontinued. Vashe wet to dry ordered. Pt had questions about slough present on wound bed. Instructed pt to perform wet to dry as ordered as wet to dry does act as a mechanical debridement. Pt verbalized understanding. Nurse will see pt twice per week in upcoming certification period. Wound appears to be healing appropriately and nurse anticipates discharging pt from HH within the next two months.		patient/caregiver recalls	
PARAMETERS FOR PHYSICIAN NOTIFICATION: temperature < 95 > 101, heart rate < 50 > 120, respiratory rate < 12 > 29, blood pressure systolic < 85 > 170, blood pressure diastolic < 50 > 90, O2 saturation < 88 > 100, pain < 0 > 8, blood sugar < 60 > 300		* how to maintain a diary to monitor effective and non-effective pain relief including documenting time of pain, rating, precipitating events, medications, treatments, and what works best to relieve pain	
CAREGIVER: 0. No assistance needed - patient is independent or does not have needs in this area		* teach relaxation skills and diversional activities	
		* recalls related medication(s) purpose, schedule	
		patient/caregiver recalls	
		* how to achieve wound healing including cleaning and dressing wound	
		* position changes	
		* skin care	
		* diet modification	
		* record wound measurements	
		* recalls related medication(s) purpose, schedule	
		patient self-administers medications as prescribed	
		* recalls related medication(s) purpose, schedule	
		patient/caregiver recalls	
		* strategies to increase caloric intake	
		* recalls related medication(s) purpose, schedule
