Clinical Condition Requiring Homecare:

Patient is a 74-year-old female with a past medical history significant for hypertension, hyperlipidemia, GERD, atherosclerosis of the aorta, osteoarthritis of the right first CMC joint, cervical disc degeneration, bilateral lower-extremity varicose veins, asthma, and latex allergy. Patient is status post left total hip arthroplasty on 8/20/2026 following same-day surgery and has been referred for skilled home health nursing and physical therapy. Patient is alert and oriented 4 with hearing impairment and wears bilateral hearing aids. She resides with her spouse, who is the primary caregiver and assists with daily care as needed. Assessment revealed vital signs within acceptable parameters, use of compression stockings for circulation, and no signs or symptoms of infection or postoperative complications. Patient reports postoperative left hip pain and presents with bilateral lower-extremity weakness/deconditioning, impaired gait mechanics, decreased functional mobility, and reliance on a rolling walker, limiting safe bed mobility, transfers, household ambulation, stair negotiation, and completion of functional activities at her prior level of function. Skilled nursing provided education to the patient and caregiver regarding infection prevention, proper hand hygiene, recognition of signs and symptoms of infection, and when to notify the healthcare provider. Medication reconciliation was completed, including education regarding medication effects and potential adverse reactions. Patient and caregiver verbalized understanding of all teaching provided. Skilled physical therapy is medically necessary to address lower-extremity strength, balance, transfers, gait training, stair negotiation, safe use of the assistive device, therapeutic exercise, and development and progression of the home exercise program to promote safe functional mobility, reduce fall risk, and facilitate return toward prior level of function.<o:p></o:p>   Date of Order<o:p></o:p> 08/21/2026<o:p></o:p> Physician Face-to-Face Date: 08/13/2026<o:p></o:p> Clinical Condition Requiring Home Care per Certifying Physician: SN-pain control PT-eval & treat due to Pain due to internal orthopedic prosthetic devices, implants and grafts, subsequent encounter<o:p></o:p> Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home<o:p></o:p>   1 - SOC - SN Notes:<o:p></o:p> PT Eval Notes:<o:p></o:p> Physician:Huang, James
