Homebound status:					
Due to diagnosis of Other spondylosis with radiculopathy lumbar region, the patient is experiencing decreased endurance and mobility, increasing the likelihood of falls. To safely leave their home, the patient needs assistance from another person and an assistive mobility device					
Clinical Condition Requiring Homecare:		<p class="MsoNoSpacing">PT recertification was completed for a patient receiving home health services due to hypertensive heart disease and congestive heart failure. The patient is oxygen-dependent and resides with her son and his family in a two-story home with a first-floor setup and ramp access through the garage. Skilled therapy has focused on improving lower extremity strength, activity tolerance, gait sequencing, transfer safety, curb negotiation using a rolling walker, and safe management of the oxygen line during mobility tasks. The patient has demonstrated measurable progress, including improved transfers, enhanced gait sequencing with the rolling walker, and improved dynamic balance, as evidenced by a Tinetti score improvement to 14/28. Family training has also been provided to support safety and functional mobility within the home. Although oxygen line management continues to present safety challenges, the patient demonstrates good rehabilitation potential and continues to benefit from skilled therapeutic intervention to further improve functional mobility, balance, strength, and overall safety with daily activities.</o:p></o:p></p> <p class="MsoNoSpacing"> </p> <p class="MsoNoSpacing">Bottom of Form<o:p></o:p></p> <p class="MsoNoSpacing">Date of Order<o:p></o:p></p> <p class="MsoNoSpacing">05/08/2026 Order<o:p></o:p></p> <p class="MsoNoSpacing">Physician Face-to-Face Date: 02/03/2026 Clinical Condition Requiring Home Care per Certifying Physician: Discharge home 02/27/2026 with home health services to include RN for medication management, PT/OT for evaluation and treatment, aid for ADL care. due to Other Spondylosis With Radiculopathy Lumbar Region Homebound Status per Certifying Physician: patient requires another person or medical equipment such as crutches, a walker, or a wheelchair to leave home<o:p></o:p></p> <p class="MsoNoSpacing"> 4 - Recertification PT Notes: due <span
